TCA sets the pace in jet age planning

... new VANGUARD for medium range routes

TCA's equipment plans for the jet age are now complete. In the new era of air travel ahead, TCA will be the first inter-continental airline in the world to operate an all-turbine fleet.

The Vanguard, luxurious newcomer to Canadian skies, will be big ... carrying 102 passengers in spacious comfort. Its high cruising speed of 420 miles an hour will cut flying times on inter-city routes across Canada, to the United States, and to Bermuda, Nassau and the Caribbean. Yet for all the power of its four Rolls-Royce Tyne prop-jet engines, flying in the Vanguard will be quiet ... smooth ... almost vibration-free!

A design innovation of the aircraft is its "double bubble" fuselage; the cargo holds in the lower section will carry a 10 ton payload, and contribute to economical operation. The Vanguard will be a major factor in the TCA plan to bring the speed and comfort of air transportation to a still wider public.

DC-8 Giant jet-liner for express trans-continental and trans-Atlantic routes.

VANGUARD Fast prop-jet airliner for TCA's domestic, U.S., and Southern routes.

VISCOUNT Already the firm favourite of Canadian air travellers, and the best short-range aircraft for years to come.

TCA TRANS-CANADA AIR LINES one of the world's great airlines
