

**FLIES FOR JOHN**

An ardent angler, Prime Minister John Diefenbaker received a set of fishing flies from Heather Watson of Kelowna, B. C., during a campaign stop. At the moment, however, he is casting for more than fish.

**Large Mineral Discoveries Expected In The Yukon**

By FORBES RHUDE  
Canadian Press Business Editor  
TORONTO (CP)—Further exploration in the Yukon probably will result in discoveries which will revolutionize the territory's mining industry, Aaro E. Aho, consulting geological engineer of Vancouver, said Wednesday in an address to the Prospectors and Developers Association.

In a 16-page paper which examined the Yukon's geology in considerable detail, Mr. Aho said: "The Yukon probably now has five potential \$250,000,000 camps—the Klondyke, now largely mined; the Mayo area, partly mined; and Vangorda Creek, Macmillan Pass and Dawson asbestos area, all unmined. "Further exploration will probably result in discovery or development of more such deposits or perhaps a \$1,000,000,000 camp or two. "Even with little or no mapping of some of the geological units of the Yukon, major structural features generally considered favorable for ore deposits and similar to those in established major mining camps can be noted." **SIMILAR TO B.C.** "In a general way the geologic environment of the Yukon is similar to that of the southern third of British Columbia, which has

produced the largest part of British Columbia's \$3,883,000,000 worth of mineral wealth, with promise of much more—chiefly from base metal deposits developed subsequent to the precious metals. "The Yukon, a comparable and even more complex region, has by comparison produced chiefly precious metals and only recently has produced large amounts of silver-rich lead-zinc ore. "The Yukon past production of over \$350,000,000, plus its known reserves of over \$600,000,000, total about a third of the production of southern British Columbia (with southern B.C.'s reserves not included). "It therefore seems reasonable by comparison to expect that the Yukon may some day match or even outstrip southern British Columbia in production, especially since the patterns of geology and sequence of discoveries seem to be developing similarly." **OFFICERS ELECTED** Meeting with the prospectors this year in a triple-headed convention was the Geological Association of Canada and the Mineralogical Association of Canada. Dr. T. H. Clark of Montreal was elected president of the Geological Association for the coming year; John S. Stevenson of Hudson Heights, Que., was elected president of the Mineralogical As-

sociation, while Mrs. Viola MacMillan of Toronto continues to head the prospectors for the 15th year. In another of Wednesday's addresses J. F. Davies, chief geologist of Manitoba's mines branch, described the chromite deposits of southeastern Manitoba as probably the largest reserves of the mineral in North America. In order to be useful in the manufacture of ferrochrome the chrome would have to be beneficiated to raise the chrome-iron ratio. The main problem to be overcome was economic—as cost of beneficiation must be low enough to permit competition with natural chromite ores from foreign sources. **ANKA TOURS U.K.** LONDON (CP)—Paul Anka, Ottawa's 16-year-old rock 'n' roll singer, arrived Thursday at London airport for the start of his second British tour in three months. He made a 16-day tour of Britain last December. **Fire - Auto - Casualty Marine**

**Gaspe Copper Mines Reports Loss In 1957**

TORONTO, (CP)—Tempera Copper Mines Ltd. had net loss after writeoffs in 1957 of \$2,327,000 or 88 cents a share, compared with net profit in 1956 of \$8,218,000 or \$3.10 a share. The annual report says earnings were adversely affected by last year's extended strike and by the decline in the price of copper. Local action for damages and loss of profits had been taken against the United Steelworkers of America (CLC). Total tonnage of ore treated was 941,000 tons, some 28 per cent below that of 1956, while copper production of 35,368,000 pounds was 36 per cent below 1956. The average price received for copper was 33 per cent below

that of the previous year. The report says mine production has been rising steadily in recent months. From an average of 2,970 tons a day in October, output rose to 3,860 tons in December and to more than 5,000 tons in February. It is expected full capacity of 6,500 tons daily will be reached in April. **STEADY GAIN** Sweden's total industrial production in 1957 was 3½ per cent higher than in 1956.

**One-Legged Boy Is Great Goalie**

SHERBROOKE, Que. (CP)—Gilles Desruisseau, 15, is a goal-keeper with a goals-against average of 1.16 a game, a remarkable one in any hockey league these days. More remarkable is that Gilles has an artificial leg. This young net-minding wizard plays with the midget club of nearby East Angus. At first the players on other teams thought it would be easy pickings to score on Gilles. Now they're wondering what he would be like if he had two good legs. Gilles, son of Mr. and Mrs. Raymond Desruisseau, was seven years old when he lost his leg. He was watching workmen set up a pole when it toppled over and pinned his right limb. **HAD TO AMPUTATE** The youngster spent a long time in hospital. Despite every effort to save the leg, doctors finally had to amputate it below the knee. After a long period of convalescence Gilles became interested in trying to skate. He has been skating now several years. Brother Luc, a teacher at Gil-

**Chevrefils Is Back In Boston**

BOSTON (AP)—Winger Real Chevrefils Friday was summoned by Boston Bruins on emergency recall to replace injured Jerry Toppazzini. The Bruins, scheduled to meet New York today in a televised contest, went down to nine forwards following Toppazzini's loss. Chevrefils is returning from the Springfield farm club of the American League where he has been since Feb. 3. Toppazzini is in Massachusetts Eye and Ear Infirmary recovering from an injured right eye which he received Thursday night in Boston's 7-3 victory over Montreal. He was reported in good condition Friday but will not be able to play again this season.

**Whitby Team Wins Exhibition**

PARIS (CP)—Canada's world hockey champions from Whitby defeated 8-1 a team of Canadians who live and play hockey in Europe in an exhibition at the Palais des Sports Friday night. Whitby took a quick 4-0 lead in the first period and was never threatened. Connie Broden, the leading scorer for the Canadians in their march to the world championship at Oslo, netted Whitby's first goal. Broden, George Samolenko and Jean Paul Lamirande all scored twice. Charlie Burns and Gord Myles added singles. **SCORELESS SECOND** The Canadians in Europe launched a strong counter-attack in the second period. Neither side scored but Whitby goalie Roy Edwards was kept busy. The lone goal from the European squad came early in the final period when Stuart Cruikshank skated close to the net and whipped the puck past Edwards. The world champions arrived in Paris Friday from Switzerland where they won two post-tournament exhibitions. They leave here Sunday for Scotland and three more exhibitions before sailing March 21 from Liverpool. The team is due at Saint John, N.B., March 27.

**Big Four And W.I.F.U. Take Over Control Of Rugby Union**

TORONTO (CP)—The Big Four and Western Interprovincial Football Unions Friday took over control of the Canadian Rugby Union in a bitter, behind-closed doors meeting during which the two big leagues threatened to withdraw from the CRU unless they received this power. The two leagues received support from the Maritime and Quebec Rugby Unions on their proposal to increase their voting power to five votes each from three. The Ontario Rugby Football Union and the Intercollegiate Union voted against it. Under the new setup, which will be formally voted upon at the windup of the three-day CRU annual meeting today, the voting structure of the CRU will be: Big Four and WIFU, five votes each; ORFU, two votes; Maritimes, Quebec and Intercollegiate Unions, one each. **HOLD BIG STICK** "The two big unions now def-

**Scores Made At York Rifle Club**

The following are the scores of York Rifle Club for March 12:

|                   |     |
|-------------------|-----|
| Jack Andrews      | 100 |
| Tom Vessey        | 99  |
| Albert Court      | 99  |
| Myron Ling        | 98  |
| George Andrews    | 98  |
| Willard Murray    | 97  |
| Lloyd Vessey      | 97  |
| Harold Taylor     | 96  |
| Shirley Vessey    | 96  |
| Glenda Campbell   | 95  |
| Marion Vessey     | 95  |
| Leigh Vessey      | 94  |
| Raymond Vessey    | 94  |
| Angus Cluney      | 94  |
| Kurt Bopahra      | 93  |
| Betty Andrews     | 93  |
| Frank Vessey      | 93  |
| Had Ings          | 93  |
| Stuart Vessey     | 92  |
| Freeman MacLennan | 92  |
| Erma Watts        | 91  |
| Roddie Mann       | 91  |
| Louis Vessey      | 91  |
| Laken Lewis       | 91  |
| Bill Crockett     | 91  |
| Garrett Pater     | 88  |
| George Proud      | 88  |
| Marjorie Lewis    | 85  |
| Harry Welton      | 82  |
| Earla Ling        | 81  |
| Carl Pirch        | 80  |
| Algert Hayes      | 80  |
| Gunther Pirch     | 80  |
| Ferne Vessey      | 80  |
| Sonny Cooper      | 80  |

The next shoot will be held on March 19.

**Russians Beat Americans 2-1**

MOSCOW (AP)—The Moscow hockey team Sunday night scored a 2-1 victory over an injury-riddled American squad. The game was the first of two exhibitions and the first Soviet-American hockey competition in Russia. The Moscow team which won Sunday night is considered a B team. The Americans face what was expected to be even stiffer opposition Monday night when they play the same Soviet A aggregation which defeated them in Oslo.

**Speedskating Meet Planned**  
DALHOUSIE, N.B. (CP)—Entries have been received from various parts of Canada and the United States for a speedskating meet here March 29. They include Pat Underhill of Dawson Creek, B.C., North American and Canadian champion. She will be accompanied by a champion in the juvenile girls' class on the west coast. Johnny Walsh, Maritime senior titleholder and formerly of Saint John, N.B., will bring three or four other skaters from Boston. Among the entries are L. E. Bessant of Quebec City, Gus Chester of Worcester, Mass., and 19 skaters from Biddford, Mass.,

**METALIOUS WEDS**

NEW YORK (AP)—Grace Metalious, author of the novel Peyton Place, will marry T. J. Martin, a former disk jockey, Friday in Baltimore, her publishers said Thursday. Both are 33. Mrs. Metalious obtained a divorce Tuesday in Phenix City, Ala., from her first husband, George, a New Hampshire school teacher to whom she had been married 15 years.

*Where tomorrow's dreams are realities today!*

**DE SOTO 1958**

**Everything about it says tomorrow!**

If you could look ahead, you'd be amazed to see how much De Soto has *already* previewed the future!

Imaginative stylists started with a sleek, strikingly different, ultramodern design. Then forward-looking engineers added features to match. Like easier shifting push-button automatic drive... smoother riding Torsion-AIRE Ride... safer stopping Total-Contact brakes. Then they came up with brilliant new V-8 power, to give De Soto a new kind of fun-loving heart.

You can see the stunning result at your nearest De Soto dealer's right now. But seeing it is only half the fun... *driving* this car-of-tomorrow is the BIG thrill! Climb into a new De Soto soon... and watch tomorrow's dreams become realities today before your very eyes.

**QUALITY BUILT**  
to the highest standards of automotive craftsmanship

You're always a step ahead in cars of The Forward Look!

CHRYSLER CORPORATION OF CANADA, LIMITED

Features of tomorrow on every model... push-button Torque-Flite automatic transmission, De Soto's remarkable '58 Torsion-AIRE Ride!
