Mr. Simpson is one of the Simpsons, of Cavendish.

The experience of the manufacturers of the "Myrtle Navy" tobacco is a valuable lesson to political economy. Previous to their commencing that brand, the tobacco made of the finest Virginia leaf was always held at fancy prices, and put up in some fancy style of manufacture. It was thought that only the rich would buy such tobacco, and at the old prices none but the rich could buy it. The makers of the "Myrtle Navy" resolved to strip the manufacturer of his tobacco of all its fancy costs and put their profit at so low a rate that no competitor could possibly undersell them with the same quality of article. From the very first until now their rate of profit has been a uniform percentage upon the cost. It is their enormous sales which make their low rate of profit a satisfactory one in the aggregate, and also gives them firm hold upon the market. Their success is an excellent lesson for manufacturers to study over.

THE PUBLIC HEALTH.

NEW CASES. Since yesterday's issue a case has developed in the house of Mrs. Wattara, Upper Great George Street, near the infected district. The victim is a boy about seven years of age. The case is a light one. Miss Murphy was removed to the hospital to-day. Her's is a light case. Another child of Mrs. McInnis, Rockin House, has contracted the disease.

CONDITION OF PATIENTS. Mr. Charles Heartz is much better to-day. Mrs. McCarey, at the hospital, is in a critical condition. She is suffering very much from bronchitis. All the other patients are doing well.

DEATHS. Miss Breen, who was removed to the hospital on the 26th ult., died last night. She was seventeen years of age. Mrs. McCarey's infant died at the hospital last night. It did not contract smallpox. The child was seven weeks old. John Prenty's child, on which the disease fully developed on Thursday, died last night.

REPLY TO "CITIZEN." SIR.—Will you allow me, through THE EXAMINER, to take notice of that contemptible production signed "Citizen" in this evening's Patriot. It is just possible that some may be entrapped and prejudiced by this low maligner; but the mass of the people know that already all "that money can do" has been done in the way of procuring the best of medical skill, etc. Dr. Johnson is respected and trusted by the whole community; Dr. Jenkins has not only experience in the actual treatment of smallpox, but possesses the superior medical training of Europe; Dr. Warburton is known to possess a diploma from one of the first medical schools in existence, that of Edinburgh; whilst Dr. S. R. Jenkins (already deservedly popular), besides the possession of fair medical training, has all the benefit accruing to him as the son and student of an experienced physician. It would be a foul disgrace to our people, who have behaved so admirably under the late trying circumstances, were they to accept the vile insinuations of such individuals as "Citizen." Had it not been for the timely warning of those he maligns, probably the whole city would, by this time, be "depopulated."

Yours, OBSERVER. Charlottetown, Dec. 4, 1885.

THE GOSPED ARMY. SIR.—The unwearied efforts of the Board of Health, under God's blessing, has about restored our city to its former security, and after consultation with His Worship the Mayor the Army have decided to hold the usual Sunday afternoon meeting in the Academy of Music, to begin at 3 o'clock. The usual free breakfast will be held at 7.30 in the morning, but there will be no public service at night.

W. T. FILLMORE, Lieut. SMALLPOX CASES AT RUSTICO AND NEW GLASGOW.

SIR.—I am informed that a rumor is in circulation to the effect that the man Peter Peters, who died at the residence of William Laird, Esq., New Glasgow, had no smallpox. For the information of all parties interested, I beg to say Peter Peters had confluent hemorrhagic variola—a very severe type. He was never vaccinated. Recovery is the exception in such a type. The other cases under my care are so far doing well. Bertha McKenzie has the semi-confluent variety, while her sister, Louisa, has varioloid without an eruption. In the latter case the power of vaccination is plain—the vaccination developed regularly, but in Bertha's case the vaccination appears to be retarded by the variolous disease; but, no doubt, the disease is also modified partly in her case. I fail to see what motives can prompt people to circulate falsehoods in cases of this kind. I think they must belong to the tribe of fishes known as "Silurus glanis." It is singular while the Board of Health at Rustico were doing their utmost to secure the services of a man who had the smallpox to bury the man, not one of those Christian slanderers would venture within a mile to the house, and were it not for Capt. John McKay, of Stanley, who heroically confined and buried the man alone, he would in all probability be unburied yet. The Rustico and New London Boards are doing their utmost to guard the public interests and prevent the disease from spreading, and should therefore receive public sympathy instead of slander.

Yours truly, R. McNEILL, M. D. Health Officer. Stanley, Dec. 3, 1885.

THE EPIDEMIC IN MONTREAL. The returns for last week show another reduction in the death rate from smallpox, both in the city and adjoining municipalities, the average deaths in the last seven days of November having been only sixteen a day, while in the first week in October there were sixty a day! The subjoined record is the highest testimony to the thoroughness and effective character of the work performed by the boards of health:—

Table with 4 columns: Week ending, City, Municipalities, Total. Data for weeks ending Oct 4, 11, 18, 25, Nov 1, 8, 15, 22, 29.

NOTES. Mr. Bourke, the patient at the Quarantine Hospital, is recovering rapidly. The farm house at Keppoch in which the crew of the Lucy Pope were quarantined, was cleaned out and fumigated by Dr. Warburton this morning.

Foul Play Suspected. A MURDER SUPPOSED TO HAVE BEEN COMMITTED AT BLACK RIVER, N. S. There is suspicion of foul play in connection with the human remains found in the woods of Black River, N. S., last month. A despatch from Amherst to the Halifax Mail of the 3rd inst., says Coroner Black held an inquest yesterday, and after evidence in regard to the finding of the remains, a resident of Black River, named Horton, gave testimony. He stated that two years ago last autumn, while his son was driving through the woods in the early evening, he met a man walking and carrying a valise, and a little later on another man in a buggy. The man with the valise was well dressed, about forty years old, and medium in size, while the one in the buggy resembled a ruffian. When young Horton was returning home the following morning by the same road, a few miles from where he had first met these men, he observed a buggy track leading into the ditch. He observed a valise in the edge of the woods, together with papers and letters, which were close to the open valise. Fearing that some desperate deed had been committed, he touched neither valise nor papers, but hurried home and stated the facts to his father, who in company with another man immediately visited the locality to find that all had gone except the papers and letters, some of which they took home. These were placed in the Coroner's hands to-day by Mr. Horton. Their contents would indicate a patent medicine man or agent of some kind. Many of them were stubs of orders and receipts, showing he had collected considerable sums of money. Coroner Black has about 50 of these coupons. They bear the names of places in Ontario, Quebec and northern New York state and the months of April, May and June, 1882. On one, opposite the name and place, appears "W. J. L. Southworth, Aultriville," and one dozen of something had been ordered and \$84 had been paid. On the back was signed the name W. C. Hill. Owing to the absence of young Horton and another witness the court was adjourned for a fortnight to get fuller particulars.
