THE MONITOR.

Ericsson's Historic Ironclad and Its Trip to Hampton Roads.

The Monitor had been formally commissioned on Feb. 25, 1862, under command of Lieutenant John L. Worden, U. S. N. Twelve officers and 45 enlisted men comprised her personnel. Chief Engineer A. C. Stimers, the superintendent of construction, went to sea in the vessel to observe her performance and give the officers the benefit of his knowledge. He was, as stated by Colonel W. C. Church in his "Life of John Ericsson," "the only man on board who thoroughly understood the characteristics of the vessel."

The voyage to Hampton Roads was eventful, and almost ended the career of the Monitor, and with it the fate of ironclads for an indefinite time. Rough weather was encountered, and water broke over the smoke and blower trunks, nearly putting out the fires and stopping the pumps from lack of steam for four or five hours on one occasion. Loss by foundering was imminent at this time, because of the great quantity of water that got into the vessel under the base of the turret and through the hawse pipes. The blowers stopped because the belts got wet and the engine and fire-rooms filled with noxious gas from the fires and had to be abandoned. In trying to remedy this trouble the chief engineer, Mr. Newton, and his assistants were overcome by the gas and were carried to the top of the turret, where they revived, though they were thought dead when dragged out of the engine room. Trouble and danger also resulted from the wheel ropes jumping off the steering wheel and becoming jammed.

After two days of toil and peril the Monitor escaped from the dangers of the sea into the presence of a new enemy. Late in the afternoon of March 8 she passed in at the capes of Chesapeake, and from the sound of shotted guns knew that her time for action had come.

thus early in her career. The Merrimac was abroad that very afternoon, and wreck and destruction fouled her wake. A rude improvised ironclad herself, she marked a new era in naval warfare, and before her lay a large fleet of supposedly formidable ships of war as helpless as a flock of sheep assailed by a wolf.

Night fell before the Monitor came up to the seemingly doomed Union fleet in Hampton Roads. The Merrimac had glutted her thirst for blood for the day and was at anchor and at rest, but in her silence in presence of the ships that she meant to attack in the morning she stood for all that men understand by the dominion of the seas. Lighted by the burning wreck of the frigate Congress, the Monitor moved up toward Newport News and anchored near the stranded Minnesota, upon which vessel, it was certain, the first blow of the morrow would fall.

From either a historical or a theatrical point of view the stage settings were now complete. With the night the curtain had fallen upon the last of a long series of glorious deeds, performed under an order of seamanship or sea tactics that had already long passed its meridian, but which for romance and chivalry excelled any that had preceded it, and, it must be admitted, excelled that which was now to rudely supplant it. A new type of sea warrior and a new type of warship were about to appear upon the waters. The engineer's machine of John Ericsson was to face the fabric that represented the engineering ingenuity of the American south, and the result of the encounter would inflict fright upon the romance of the sea and transform the masthead navies of the world into useless relics in a day.—F. M. Bennet, U. S. N., in Cassier's magazine.

The Coin Came Back.

"I have once or twice read how small the world was," said a young fellow, "and once or twice I have seen stories of the same kind I am going to tell. I confess I never believed them, but now I know better. Last summer, when in New York on my annual visit, I was struck with a sudden whim and scratched my initials on a 25 cent piece, cutting into the silver deep enough to make a lasting impression. I paid for a cigar in the Hoffman House with the coin and gazed myself with being foolish. I had forgotten all about the quarter when I entered a Carrollton car and gave a half dollar to the conductor. Imagine my surprise when he handed me in change the 25 cent piece I spent in the Hoffman House! I think I will keep the coin now and ever more as a curiosity," and the speaker pulled the money from his pocket and showed it in verification of his story.—New Orleans Times-Democrat.

Making Sandwiches.

Ninety-nine women in a hundred making sandwiches for company expected in the evening, and wanting them crustless, will cut the crust off after slicing the bread. Take a whole loaf of bread, cut the sides and top crust off, leaving the bottom crust on. Then, having squared off one end, spread on your deviled ham, sardine paste or whatever and cut a thin slice back to the bottom crust. Release the slice by running your knife down just inside the bottom crust. Then neither the bread nor your temper is crumpled.—New York Tribune.

Of Another Sort.

Flo—Do you love me, sweet?  
Will—Dearly.  
Flo—Would you die for me?  
Will—No, my precious girl. Mine is an undying love.—Philadelphia Call.

Simple Ruby Lamp.

Secure an ordinary quart size red Rhine wine bottle and by gently tapping on the bottom thereof break out enough glass to allow the insertion of a candle. A hammer can be used for this purpose, if a little care be taken. Then wrap a piece of ruby paper all around the bottle, securing same by paste or mucilage. The lamp is now ready for use, and by standing the bottle on a triangle of burned matches and lighting the candle, will burn without any trimming of wick and other oil lamp inconveniences. The little white light emanating from the top will do absolutely no harm.—New York Mail and Express.

Curious Typographical Errors.

Dr. Daniel of the Texas Medical Journal, referring to a recent editorial in The Statesman on typographical errors, gives an amusing experience in that line. He says he wrote, "Dr. Jno. Bailyhache aet 74 years, born July 22, 1822, and died"—Imagine his disgust when it appeared in The Journal, "Dr. Bellyache ate 74 years of corn July 22, 1822, and died."—Austin Statesman.

It is claimed that the X rays are rendered harmless to the human flesh by a process discovered by Elliott Woods, superintendent of the capitol at Washington, which involves passing the rays through gold foil specially prepared for the purpose.

The land covered by new houses in greater London every year is 1,146 acres.

Canadian Pacific Railway.

**A SURE CATARRH CURE.**

No matter what your experience has been with so-called catarrh "remedies," your ultimate, complete recovery can surely and positively be effected. Don't suffer any longer. Don't trifle with a distressing and dangerous disease when a sure cure is within your grasp. Thousands of sufferers whose condition was worse than yours have been cured and are now in perfect health. Their enthusiastic and unsolicited testimonies show beyond the shadow of a doubt that

**Dr. Agnew's Catarrhal Powder**

is the most wonderfully effective remedy ever compounded. It relieves the most severe cases in from 10 to 60 minutes; it effects a full cure in a short time. The most eminent nose and throat specialists in the world have given it their unqualified endorsement. In all cases of catarrh, colds, sore throat, asthma, hay fever and influenza it acts like magic. It is easy and pleasant to use. It never fails to do precisely what is claimed for it. In less than an hour it will prove its worth if you will but give it a chance. A prominent evangelist gives testimony:

Rev. Warren Bentley, writes:—"While in Newark, N. J., conducting religious services, I was troubled with catarrh and used Dr. Agnew's Catarrhal Powder. It gave me great relief and I have recommended it to many among whom I have labored." Hon. David Mills, Minister of Justice of Canada, has used this remedy and highly recommends it over his own signature. At all druggists.

Dr. Agnew's Cure for the Heart cures all cases of organic and sympathetic disease of the heart. Relieves in 30 minutes. Dr. Agnew's Liver Pills are at once a mild cathartic and an invigorator, system renovator and blood maker and purifier. 20c for 40 doses. Dr. Agnew's Ointment relieves in a day and cures eczema, tetter and all skin diseases. Cures piles in 2 to 5 nights. 35c.

Sold by Dr. S. W. Doid and Geo. E. Hughes, Drugg

**Every Housekeeper wants pure hard soap that lasts well—lathers freely, is low in price and high in quality. Surprise Soap fills the want perfectly.**

**Tailor-Made vs. Factory-Made!**

Take up the printed announcements of makers and importers of ready-made clothing, and when they strive to give emphasis to the alleged merits of their clothing they invariably tell how nearly they approach to tailor-made. Here are some quotations—

"Elegantly tailored."  
Cut and finished equal to order-work," Equal in quality, fit, and finish to suits made to order, or similar statements.

Then tailor-made clothes are different to imported factory-made, otherwise there would be no need to make comparisons. If tailor-made were not the better clothes they would not be held up as the ideal to which the ready-made strive to reach.

The fact is there is a great deal of difference between a factory-made imported suit and a tailor-made in style and durability.

The man that is indifferent as to the appearance of his clothes when he buys them and when worn a month, may be satisfied with a factory-made, but if he has regard to looks and economy, he will buy tailor-made garments.

For those who are not disposed to give the prices usually paid for clothes made to special order, and are not satisfied with the imported ready-made clothing, we have made, and are daily adding, Suits and Overcoats of superior workmanship that we are selling as low in price as imported makes of inferior quality.

All Wool Oxford Tweed Suits, \$9.15  
All Wool Serge Snits, \$9.50
