CENTRAL GUARDIAN

WE HAVE in stock a limited number of Hardie Sprayers, James A. MacNeill and Sons, Summerside.

This column is reserved for news of local interest, but advertising of every nature may be inserted at five cents a word, strictly payable in advance.

Body Recovered At Ferry Wharf

A body found floating in the water near Prince Street wharf yesterday morning was identified as that of Mr. James Trainor, 75 of Johnston's River. Identification was made by William Trainor, also of Johnston's River. The body was first seen by Mr. Frank Doyle, Charlottetown, who immediately notified the City Police who accompanied City Firemen to the wharf to remove the body.

JIMMIE'S TAIL Phone 525.- FIRST QUALITY HOSIERY 98 cents. Sunter's Ladies' Wear.

ALL ORANGEMEN will gather at Cavendish on July 12th.

T SHIRTS AND SWIM SUITS arrived at the Fashion Shoppe.

NEW SHIPMENT of Corduroy Slacks. Sunter's Ladies' Wear.

REDDIN BROS. will be the only Drug Store open this afternoon and evening.

CIVIC TAXES—June 30th is final date for payment of second installment City of Charlottetown taxes.

CIVIC TAXES—Lists of overdue personal property and poll taxes will be prepared and handed to the police for immediate collection.

THREE FLIGHTS WEEKLY to Sydney, Nova Scotia, Phone Maritime Central Airways Limited, 2001

CIVIC TAXES—All Poll taxes were due and payable April 15th. If immediate payment is not made, court action will be taken for collection.

WE HAVE in stock a limited number of Hardie Sprayers, James A. MacNeill and Sons, Summerside.

CROSS ROADS CHURCH OF CHRIST—Come to open air service tonight at 8 p.m. led by Salvation Army. Major Hutcheson will bring the message of the evening. Thursday evening will feature Lic. Robert Snyder, pastor of Annandale and Dundas Baptist Churches as special speaker. Mrs. Robert Snyder and Mrs. Byron Howlett will sing a duet. All are welcome.

SUPREME COURT—Eight witnesses for the plaintiff were heard by the Supreme Court yesterday in the civil action of Vincent Doucette vs. Mary Jean Murphy. Counsel for the defendant then opened with a brief review of the case and commenced the direct examination of the defendant, Mrs. Murphy. The court adjourned until 10:30 this morning. The case is being heard before Mr. Justice G. J. Tweedy and a petit jury. Counsel for the plaintiff is Mr. J. A. MacDonald, K.C., for the defendant, Hon. F. A. Lange, K.C.

PERSONALS Mrs. M. D. MacLeod of North Sydney, N. S. is visiting with her mother, Mrs. Allan MacDonald of Glen William.

CHILDREN DIE IN FIRE KIRKLAND LAKE, June 27—(CP)—Two children were burned to death in the log farm home at nearby Charlottetown when a match was dropped into a pool of kerosene after it spilled from a lamp. The dead are Stanley Alfred, three, and his sister, Diane, five, children of Mr. and Mrs. Sydney Alfred.

BIRTHS, MARRIAGES, DEATHS 50c Per Insertion

CAMPBELL—At the Prince County Hospital, June 23rd, 1950, to Mr. and Mrs. Borden F. Campbell, Irishtown, P. E. I., a daughter, Thelma Gwendy, 9 lbs. 2 ozs.

HOUSKA—At Barra Maternity Hospital, Cleveland, Ohio, on June 25th, 1950, to Mr. L. A. and Mrs. N. A. Houska (nee Joyce Newson) a daughter, Weight 6 lbs. 9 ozs. Donna Joy.

MARRIAGES RAMSAY — MacGILLIVRAY—At the United Church Manse, Kensington, Thursday, June 1st, 1950, by Rev. L. M. Murray, William Wilton Ramsay to Grace Lily MacGillivray, both of Malpeque, P.E.I.

DEATHS TRAINOR — At Charlottetown, June 27, James J. Trainor in his 53th year. His remains will rest at the A. Hennessey Funeral Home from Wednesday afternoon till Thursday morning when the funeral will take place at St. Patrick's Church at 9:30. Interment in the Church Cemetery.

BOISNER—In the Veterans Hospital, Roxbury, Mass., June 23rd, 1950, Richard Boisner in his fifty-seventh year. Son of Mrs. George Pickard.

MACDONALD — At Sudbury, Ont., June 10th, 1950, Margaret Jane MacDonald, of Creighton Mine, Ontario, beloved wife of the late Judge Aeneas A. MacDonald of Charlottetown, P. E. I., in her 78th year. Funeral service was held at Christ the King Church, Sudbury, Ont., on June 12th, 1950. Interment Sudbury, Ont.

STEWART — At Northam, June 8th, 1950, Mrs. Ida M. Stewart, widow of the late David Stewart in her 77th year.

Dr. Lattimer Speaks On Livestock Economics

"With ceilings and floors provided for grains it follows that ceilings and floors are just as necessary for livestock products in order to maintain the desired balance," Dr. J. E. Lattimer, of Westmount, Quebec, told the Canadian Society of Animal Production (Eastern Section) in session here yesterday. Dr. Lattimer is well known in Prince Edward Island for the farm economic survey he conducted here some years ago for the Provincial Government.

Dr. J. E. Lattimer

"The economics of the livestock industry," he emphasized, "includes not only the raising of raw materials, long distance but also arranging prices of both raw materials and finished products that provide the required quantities of both."

Livestock production, he noted, has declined relatively due to the greater attraction of alternative opportunities. Grazing has declined in relation to grain fed animals, and beef in relation to dairy farming. The lines that permit the combination of more labor with less feed and less land have expanded most and persisted longest on the small farms of Eastern Canada.

Present economic problems include the economical movement of raw materials from surplus to deficit areas, the improvement of the quality of meat for the domestic market, the maintenance and extension of export outlets overseas, and a price relationship between raw materials (feed grains) and finished products (livestock and livestock products) that will ensure the required supply and quality of livestock.

Dr. Lattimer revealed that notwithstanding Canada's position as a surplus food country, six out of ten provinces are deficient areas for even Canadian grown farm products. These six provinces with four-fifths of the population have only 30 per cent of the land in farms and even a smaller proportion in improved farm land. They have only two and one-quarter acres of improved land per person against 26 acres per person in the other four provinces. This necessitates a huge international trade not only in food products but also in feeds.

Speaking before the Soils Section at yesterday's conference, Messrs. A. J. Sutherland and G. R. Smith, of the Nova Scotia Agricultural College, Truro, discussed the cobalt content of some Nova Scotia soils and the herbage crop. Cobalt deficiency symptoms in cattle and sheep have been noted in certain parts of Nova Scotia, particularly the South Shore district. He said cattle suffering from this deficiency, known as "wasting disease," have responded to the addition of small amounts of cobalt in the diet.

The necessity of having a sound and accurate knowledge of the quality and quantity of soil resources in an area was emphasized by Mr. N. E. Richards, of the Ontario Agricultural College, Guelph. Mr. Richards explained how, through classifying the soils in an area, salient differences are established, after which improved land use programs can be developed scientifically.

President Truman's order to MacArthur called for "cover and support" for the South Korean troops, indicating fighter planes also would be used.

Already, American Mustang fighters guarding the air evacuation of American civilians from Korea had shot down four Russian-made North Korean Yak fighters that tried to interfere Tuesday.

Today quoted Rhee as saying a General Church had been appointed commander of a "joint defense operation" by the United States and South Korean forces.

Apparently he referred to Brig.-Gen. John H. Church, commander of the Ryukyus (Okinawa) Military Government. There is no confirmation of this report, however American naval dispositions were not disclosed. The United States has 500-plus planes and 18 warships in the Western Pacific area. United States military manpower totals 123,500.

The American planes, including more than 400 fighters, both jets and conventional piston-engine jobs, and B-29 and B-36 bombers, included in the United States Far East Air Force, based in Japan, Okinawa, Guam and the Philippines.

The light cruiser Juneau and four destroyers are based in Japan—readily available—while the United States seventh fleet in the Philippines-Guam area has 14 combat ships, including the aircraft carrier Valley Forge.

Results of a detailed erosion survey in a selected area of Queen's County, together with observations over the Province generally, were cited by Mr. Whiteside.

In the surveyed area approximately 84 per cent of the land is maintained under grass crops, both cultivated and natural, with about 23 per cent under cultivated crops. The survey has shown that around 34.7 per cent of the soils have suffered slight erosion, 39.7 per cent moderate erosion, and 8.6 per cent severe erosion.

"This," Mr. Whiteside said, "would suggest that farm practices in the past have not maintained a dense enough vegetative cover, particularly on the grasslands, to provide proper protection for the soil."

WASHINGTON, June 27—(AP)—The American Newspaper Guild (C. I. O.) today received from its executive board a far-reaching proposal for Guild operation of commercial newspaper enterprises. The Guild's survey has shown that a special committee to be acted upon later in the week.

Reviews Plans For Marshland Rehabilitation

The response from property owners to date has been excellent and considerable progress is being made in the programme of marshland rehabilitation in the Maritimes, reported Mr. J. S. Parker in addressing the Agricultural Engineering Section of the Agricultural Institute here yesterday. Mr. Parker is in charge of the administration of the project at Amherst, N. S.

At present steps are underway to construct, on the part of the Federal Department of Agriculture, the necessary protective works—dykes, abattoirs and breakwaters—while at the same time the Provinces are initiating their drainage program and are establishing an agricultural policy for their use.

Mr. Parker estimated the marshlands of the Maritime Provinces at approximately 90,000 acres, made up of fertile soil deposited by tidal waters. When protected from the sea and properly drained and cultivated, they will constitute some of the most valuable and productive soils in Canada.

Although strawberries are his principal crop, Mr. MacIntyre has 40 acres of hay, 28 acres of grain, and ten acres of potatoes on his large farm which comprises 240 acres. Throughout the season many tourists from various parts, particularly Ontario, visit the berry fields, and many in the past have remarked the excellent quality and large production such as is seldom seen.

Mr. MacIntyre and his sons also run a large farm, but he winters his time for curling. He is president of the P. E. I. Curling Association, and was president of the Montague Curling Club in 1948. One may see Mr. MacIntyre at practically any MacArthur, Gaboury, British Consols, or any other trophy competition, either playing or cheering his home team on to victory.

OTTAWA, June 27—(CP)—Rising lumber prices, resulting from heavy exports to the buoyant United States market, are "likely" to reduce private home construction this year, Reconstruction Minister Winters told the Commons tonight.

The cost of houses "will increase," he said as the Chamber considered a \$75,000,000 item for advances to Central Mortgage and Housing Corporation, the Government-operated lending institution.

"Prices of lumber have increased sharply in all parts of the country," he said, "and there now is evidence that even at increased prices lumber is not readily available for house builders."

The Corporation had postponed four projects for defence personnel quarters because the bids ranged from \$500 to \$1,300 a unit above prices in 1949.

"The same trend is showing in private house building. The cost of individual houses will increase, and already in certain areas there is a shortage of lumber which is stopping the framing of houses. This condition is likely to reduce the number of houses for the year."

In the first four months of 1950, he said, new residential starts were 5.5 per cent above 1949. Completions were almost the same as 1949.

In cities and towns with populations of 5,000 or more, starts during the four months were 12.2 per cent in excess of starts in the same period of 1949.

This, said Mr. Winters, reflected greater residential activity in the Maritimes, Quebec and Ontario. Starts in the Prairies and British Columbia were three per cent and 10 per cent, respectively, below last year.

Large Strawberry Crops Anticipated At Montague

During the past two weeks, the farm of Fred G. MacIntyre, Montague, has been bustling with activity in preparation for the strawberry season which, this year, gives evidence of being the greatest in the past three years in which Mr. MacIntyre has engaged in commercial production. Although many farmers have grown one or two acres of berries, none have even approached the heavy production as was witnessed last summer on Mr. MacIntyre's farm.

Having grown strawberries on a small scale for many years, Mr. MacIntyre, in 1948, started commercial production, beginning with three acres to test growth. He later increased this acreage to six, consisting of two of Warfield, two of Dunlap, and two of Dorset.

From this acreage, some 20,000 boxes were picked. Last year Mr. MacIntyre had twenty acres under cultivation, and was picking off twelve. Beginning on the 22nd day of July, an average of eighty pickers moved over the field for 23 days gathering the ripest and loveliest strawberries in the area. Mr. MacIntyre had several samples of six and seven berries growing to a single hull, all of which were of fine color, shape and size, indicating that Mr. MacIntyre has chosen an excellent variety to grow, yielding some 5,000 boxes per acre. On the last day the pickers totalled 52,000 boxes, which was made by six pickings over the same area.

Approximately half the total yield was sold to the local canner, under the management of Mr. Leon Johnston, who canned the berries and also made preserves. Some 10,000 boxes were sold locally to citizens, and the remainder was shipped by the Strawberry Growers Association, of which Mr. MacIntyre is a member, to various cities in Canada and U.S.A.

Industry Increasing A word might be inserted here regarding the valuation of this new, growing industry which employs over 150 for the growing season. Together with the pickers and the 60 employed at the factory, one may realize the importance of this industry to Montague and vicinity, all of whom benefit from the added employment which this industry gives.

This year Mr. MacIntyre has twenty-two acres under cultivation, comprising 10 acres of Dunlap, 7 of Dorset, 3 of Midlands, and 2 of Warfield. Mr. MacIntyre will have sixteen acres on which to pick berries this year, and he expects a possible yield of 60,000 boxes, the greater part of which will be taken by the local canner.

Although strawberries are his principal crop, Mr. MacIntyre has 40 acres of hay, 28 acres of grain, and ten acres of potatoes on his large farm which comprises 240 acres. Throughout the season many tourists from various parts, particularly Ontario, visit the berry fields, and many in the past have remarked the excellent quality and large production such as is seldom seen.

Mr. MacIntyre and his sons also run a large farm, but he winters his time for curling. He is president of the P. E. I. Curling Association, and was president of the Montague Curling Club in 1948. One may see Mr. MacIntyre at practically any MacArthur, Gaboury, British Consols, or any other trophy competition, either playing or cheering his home team on to victory.

OTTAWA, June 27—(CP)—Rising lumber prices, resulting from heavy exports to the buoyant United States market, are "likely" to reduce private home construction this year, Reconstruction Minister Winters told the Commons tonight.

The cost of houses "will increase," he said as the Chamber considered a \$75,000,000 item for advances to Central Mortgage and Housing Corporation, the Government-operated lending institution.

"Prices of lumber have increased sharply in all parts of the country," he said, "and there now is evidence that even at increased prices lumber is not readily available for house builders."

The Corporation had postponed four projects for defence personnel quarters because the bids ranged from \$500 to \$1,300 a unit above prices in 1949.

"The same trend is showing in private house building. The cost of individual houses will increase, and already in certain areas there is a shortage of lumber which is stopping the framing of houses. This condition is likely to reduce the number of houses for the year."

In the first four months of 1950, he said, new residential starts were 5.5 per cent above 1949. Completions were almost the same as 1949.

In cities and towns with populations of 5,000 or more, starts during the four months were 12.2 per cent in excess of starts in the same period of 1949.

This, said Mr. Winters, reflected greater residential activity in the Maritimes, Quebec and Ontario. Starts in the Prairies and British Columbia were three per cent and 10 per cent, respectively, below last year.

Busy Opening Day For A. I. C. Members

Specialists of the Agricultural Institute of Canada launched their four-day series of meetings and entertainments here yesterday in auspicious fashion with morning and evening sessions, official opening ceremonies and a garden party at the Experimental Farm yesterday evening.

With close to 200 agricultural scientists from outside the Province on hand the conference opened at nine o'clock in the morning with three meetings in Prince of Wales College. Other meetings were held one and two hours later.

His Honor Lieutenant-Governor J. A. Bernard and His Worship Mayor E. Earle MacDonald welcomed the visitors at the official opening in the Prince Edward Theatre in the afternoon.

Canadian Institute President, Dr. F. J. Greaney, director of Line Elevators Farm Service, Winnipeg, presided at the opening and delivered the presidential address. Guest speaker was Dr. John D. Black, Harvard University, Cambridge, Mass., who was introduced by Dr. F. J. Booth, Department of Agriculture, Ottawa, and was tendered the thanks of the meeting by Dr. W. V. Longley, Director of Extension, Nova Scotia. Premier J. Walter Jones, who is scheduled to preside at Thursday's dinner function, was present at the opening.

A short downpour of rain failed to dampen the enthusiasm of the members at the Experimental Farm garden party. Tent shelters were provided for the members and the ladies in which lunch was served by the Parkdale Women's Institute.

Maple Tree Planted Feature of the party was the planting of a sugar maple tree by the Institute President, Dr. Greaney, on the Farm lawn. Using a blue and yellow ribboned golden shovel, Dr. Greaney assisted by Mrs. Greaney filled the clay around the young tree as an interested crowd looked on. Hon. C. C. Baker, Minister of Agriculture, extended his welcome to the visitors at the ceremony.

Dr. Greaney was the eleventh person to use the golden shovel in planting trees at the Experimental Farm. The shovel was first used in 1912 by the Duke of Connaught and since then has been employed by the Prince of Wales in 1919 and the Duke of Devonshire in 1920.

Lady Byng planted a tree with the shovel in 1923 and the Earl of Bessborough in 1931. Lord Tweedsmuir was the planter in 1937 and the Earl of Athlone in 1940. He was followed by the Duke of Kent in 1941 and Lord Alexander in 1947. Dr. L. H. Newman planted a tree here in 1947.

Last night the Soils Section group returned to their meetings while the Canadian Agricultural Economics Society met for the first time in the Vocational School with Mr. J. G. Taggart, Deputy Minister of Agriculture, Ottawa, presiding.

The ladies, after taking in the City yesterday morning, visited Mrs. Gordon MacMillan's flower garden in Cornwall in the evening. They were transported in two buses and several cars.

Other Group Meetings During the day, six separate meetings were held. At the Agricultural Engineering section which met in Prince of Wales College in the morning Mr. Angus Banquh of Nova Scotia, Agriculture, Ottawa, presided and General papers on irrigation and drainage were given.

Two Island members presented papers at the Soils Section meeting. They were Mr. G. B. White, side, Dominion Experimental Station here, and Mr. D. C. Schurman, Mr. T. J. Heeg, Ontario Agricultural College, president.

The story of P. E. I. Yorkshire Swine" was given by Mr. Harold Clay, Provincial senior livestock fieldman, at the Canadian Society of Animal Production meeting. Dr. J. E. Lattimer of Westmont, Quebec, also gave a paper at the meeting presided over by Mr. E. S. Manning, Toronto. Yesterday evening the members visited the pig testing station at the Experimental Farm on a tour conducted by Mr. R. C. Parent and Mr. H. W. Clay.

The Canadian Phytopathological Society met in P. W. C. during the morning, with Dr. D. J. MacLeod, Fredericton, N. B., presiding. Yesterday evening they held a dinner at the Charlottetown Hotel. The Scholarship Committee met in The Club at 11 o'clock yesterday morning.

Several other papers were given at the Soils Section meeting in Prince of Wales College yesterday evening, the meeting being presided over by Mr. W. A. DeLong, MacDonald College, Quebec.

Dr. J. D. Black and Dr. E. C. Hope, Canadian Federation of Agriculture, spoke at the meeting of the Canadian Agricultural Economics Society in the Vocational Wing last evening. The meeting chaired by Mr. C. G. Taggart, Deputy Minister of Agriculture, Ottawa, also featured a discussion led by Drs. J. F. Booth, Department of Agriculture, Ottawa; A. N. Duckham, United Kingdom Embassy, B.C., and G. S. H. Barton, Canada Department of Agriculture, Ottawa.

This morning the Institute will hold a business session at the Vocational Wing presided over by Dr. Greaney. Committee reports will be presented at this meeting.

Special tours will be held for the various groups this afternoon and this evening a lobster party will be held at Cavendish.

The ladies will make a tour of the North Shore during the day. They will leave the City at 1 o'clock this morning and will join the lobster party in Cavendish.

President's Address Advances in agricultural tech-

Newfoundlanders Seek To Supply Home Market Needs

Dr. F. J. Greaney

President of the Agricultural Institute of Canada who presided at yesterday's opening conference.

ST. JOHN'S, Nfld., June 27—(CP)—Backed by a contribution of \$50,000 from the Provincial Government, farmers and manufacturers in an organization known as "Local Industries Organization" met tonight to prepare to do battle for the home market.

The idea was conceived by Premier Smallwood to overcome the effect of duty-free mainland goods resulting from confederation, such as Prince Edward Island produce now flooding this island. This year and the next are to be used as a testing period for an advertising campaign with this end in view. One clothing manufacturer explained the difficulty of Newfoundland manufacturers is that they employ too much labor and too little machinery. On the other hand the home market is so small that if large machinery were used it would produce sufficient for the population in a few days and would have to lie idle for the rest of the time unless manufacturers could compete in the export market.

in the past half-century, stimulated by the necessity of obtaining greater production during a period embracing two wars, has been greater than in almost any other field, stated Dr. Greaney, in his presidential address at the Institute convention opening.

It is impossible to calculate accurately the economic rewards of these scientific achievements, Dr. Greaney said. The enormous gains to the farmers, and to the Canadian economy, are so great that they more than justify the relatively small amounts spent to achieve them.

Further, it is not enough that these scientists produce new techniques; they have a definite responsibility to see that the public is informed of the work they are doing and that their findings are interpreted to the public as rapidly as possible.

The speaker predicted that in the years ahead the victory in the inevitable competition between the world's primary producers will rest ultimately with those countries which, first of all, recognize the economic value of scientific research and then apply its findings without undue delay to the winning of wealth from the soil.

"It is this job to be done in Canada," he said, "we must direct scientific effort towards the solution of our major agricultural problems—the problems of soil conservation, drought and land reclamation. Our attack on insect infestations and plant diseases must be strengthened. Progress must be made in animal breeding and feeding, dairying, poultry raising, fruit and vegetable growing, and in other aspects of agriculture. Our economic problems, including transportation and marketing, must receive greater consideration."

The Agricultural Institute has a public relations job of first-rate importance in enlightening public opinion with regard to the work of its members, Dr. Greaney said. It must also continue to examine Canada's research and educational programs to determine whether or not they are meeting the challenges posed by the remarkable changes that, with each passing year, are being brought about in other agrarian countries.

PLEASANT GROVE SCHOOL School report for month of May: Grade X—1. Luella McCabe. Grade IX—1. Margaret Lamphier.

Grade VII—1. Alfred Morrison; 2. Edward Morrison; 3. Dannie Lamphier.

Grade V—1. Carol Hardy; 2. Leo McCabe; 3. Mary Morrison and James Morrison (equal).

Grade IV—1. Blanche MacDonald; 2. Phyllis MacDonald.

Grade III—1. Anne Morrison; 2. Annabelle Hardy, Lucy Buell (equal); 3. Dick Lawlor, Hubert Morrison (equal).

Grade II—1. Jole Caswell; 2. Ray MacDonald.

ONE MINUTE NEWS ABOUT JOHNS-MANVILLE NOW IS TIME TO CHECK HEATING

While your furnace is off for summer, have your home heating system installed with Johns-Manville Asbestos Insulations. You'll find they'll save up to ten per cent on fuel!

With J-M Insulations on your furnace, hot water tank and heating pipes, you get full benefit from the fuel you burn—save several tons of coal a year, or the equivalent in gas or oil. You see, insulation minimizes heat leaks.

Your plumber can quickly install Johns-Manville Asbestos Boiler Jackets and Pipe Coverings for your heating system. At the same time it will pay to have him install J-M Anti-Sweat Insulation for cold water pipes. It prevents sweating—eliminates dripping—helps keep your basement dry. For free folders, write Johns-Manville, Sun Life Bldg., Montreal.

Luxurious and lovely—but still very low in price. - - - The DOR-SAY SLIPS in the 5 and 10 Department are just 1.98 each. Beautifully made of English Rayon, lavishly trimmed with lace on the bodice and hemline, with the triangular back inset that assures perfect hang and fit. These Dor-Say Slips are in colors white, blue, maize and pink—sizes 32 to 40. You'll need several of these Slips to wear with your Summer dresses—Shop for them today in the 5 and 10 Department.

For Golf, for Fishing, for Sailing—indeed for every occasion - - - The "PARCOAT" JACKET of fine quality, water repellent Gabsardine is just what you men will want to wear. Cut on utilitarian lines, the "Parcoat", made by Fairway, is available in sizes 36 to 44—price \$35. It is in a serviceable fawn shade, closes with a "Lightning" slide fastener, has two generous patch pockets, adjustable cuffs, elastic inserts at the waist and is unlined. The "Parcoat" is to be found in the Men's Wear Department of the Summerside Store.

"Fair and Warmer"—we hope, we hope, we hope! Well, let's get ready for the "Fair and Warmer" weather. The smart, new Outdoor Shop has a collection of Beach Accessories you'll want for picnics and days in the sun. Waterproof, quilted FLAUNTY BEACH BAGS with a nautical rope drawstring are in red, green, blue and yellow colors, priced 1.29 each. Large, cool straw SUN HATS in different natural shades are 49 and 69 cents. Huge, fluffy, striped Terry Cloth BEACH TOWELS to use as a wrap, to sit upon, etc., are priced 2.95 each. You can get all these and many, many other Sun Accessories right here in the Outdoor Shop

Reviews Plans For Marshland Rehabilitation

The response from property owners to date has been excellent and considerable progress is being made in the programme of marshland rehabilitation in the Maritimes, reported Mr. J. S. Parker in addressing the Agricultural Engineering Section of the Agricultural Institute here yesterday. Mr. Parker is in charge of the administration of the project at Amherst, N. S.

At present steps are underway to construct, on the part of the Federal Department of Agriculture, the necessary protective works—dykes, abattoirs and breakwaters—while at the same time the Provinces are initiating their drainage program and are establishing an agricultural policy for their use.

Mr. Parker estimated the marshlands of the Maritime Provinces at approximately 90,000 acres, made up of fertile soil deposited by tidal waters. When protected from the sea and properly drained and cultivated, they will constitute some of the most valuable and productive soils in Canada.

Although strawberries are his principal crop, Mr. MacIntyre has 40 acres of hay, 28 acres of grain, and ten acres of potatoes on his large farm which comprises 240 acres. Throughout the season many tourists from various parts, particularly Ontario, visit the berry fields, and many in the past have remarked the excellent quality and large production such as is seldom seen.

Mr. MacIntyre and his sons also run a large farm, but he winters his time for curling. He is president of the P. E. I. Curling Association, and was president of the Montague Curling Club in 1948. One may see Mr. MacIntyre at practically any MacArthur, Gaboury, British Consols, or any other trophy competition, either playing or cheering his home team on to victory.

OTTAWA, June 27—(CP)—Rising lumber prices, resulting from heavy exports to the buoyant United States market, are "likely" to reduce private home construction this year, Reconstruction Minister Winters told the Commons tonight.

The cost of houses "will increase," he said as the Chamber considered a \$75,
