REPORT OF ELDON MEETING. Epitome of Speeches by Senator Prowse, Alexander Martin, Esq., Senator Ferguson and Hon. James Clow.

The Belfast-Murray Harbor Railway Question. Readable Account of a Successful Demonstration.

The night of Wednesday, the 23th ult., a meeting of the Eldon and adjoining districts was held in the Eldon Hall, under the auspices of the East Queen's Liberal-Conservative Association, and never before had it sheltered a larger or more enthusiastic audience. Although the room was packed to suffocation—even the standard-bearer occupied a few pointed words, the speaker as he came forward was accorded an ovation, and the several speakers were listened to in rapt attention, amid a silence broken only by transient applause. The meeting was called to order by appointing John Murchison, Esq., to the chair, and T. F. West, B. A., Secretary.

The chairman, in a few pointed words, stated that the meeting was called for the purpose of discussing the public questions of the day, as well as considering those interests which are directly or indirectly vital in importance to the inhabitants of the southern portion of the riding of East Queen's. He opened the meeting by calling on Senator Prowse.

The Senator, on coming forward, remarked that, though a political meeting gave latitude for the discussion of a great number of questions, he intended to confine himself to one or two which more directly concerned the people in the southern portion of this riding. He remembered the last time he had the pleasure of addressing an Eldon audience—it was in company with our present popular Lieutenant-Governor, and upon the subject of a subway. Since then the subway has been abandoned for the more substantial tunnel, the practicability and feasibility of which was now being tested by the Government, and he could not see any reason to cause lament. He remembered well the first time he drove from Charlottetown to Murray Harbor, some 35 years ago, through a country in which the people were so poor, that while the crops in their patches of fields were planted and reaped with the most primitive implements. But to-day, pass through the same country and witness the transformation.

The Senator would be glad to see the comfortable frame house, surrounded by well-filled barns—houses in which they enjoy all the necessities and many of the luxuries of life. The matter would be a confirmed pessimist, indeed, who, in the face of such indisputable evidences of prosperity as these, still persists in waiting that the country was going to the dogs. He next dwelt at some length upon the fully of our Grit representatives continually denouncing the Government for expending large sums of money upon railways, canals and other unproductive works. It is the settled policy of the Government to go on developing the resources of this country by the construction of such public works as may be necessary, and it was his duty as a patriotic citizen to urge upon our representatives to use some of their eloquence occasionally in advocating the claims of this Province to a fair share of expenditure instead of forever striving to make political capital against the Government to the great injury of the interests of their constituents. He denounced in scathing tones that treacherous policy which had deprived the Murray Harbor Districts had been deprived of the benefits of the railway, saying that never since the branch lines were built through the Eldon District, to the water terminus at Murray Harbor South, with a cross line or section connecting this line to the trunk line at or near Perth or Carleton Stations. He ridiculed the proposition advanced by Mr. Davies in Parliament to build a branch from Cardigan to Wood Islands, showing that such a line would be of little benefit to a great majority of the people in Belfast and Murray Harbor, and would not be accepted by the people at all. He most emphatically declared that the advocacy of a railway at this time was not put up for an election dodge, nor was it a bribe offered to the people of these districts. These were the views he had always held regarding a railway for the south side of the Hillsborough, and he associated in now the present for the press strenuously for our just rights in this respect. He advocated the building of a branch railway, beginning at Southport and running through the Eldon District, to the water terminus at Murray Harbor South, with a cross line or section connecting this line to the trunk line at or near Perth or Carleton Stations. He ridiculed the proposition advanced by Mr. Davies in Parliament to build a branch from Cardigan to Wood Islands, showing that such a line would be of little benefit to a great majority of the people in Belfast and Murray Harbor, and would not be accepted by the people at all. M. COQUELIN. The Great French Comedian.

These are the features of the Prince of French Comedians, whose "Tartuffe," which he may be said to have made his own, convulses every audience which has the delight of seeing the master portray the arch hypocrite and the cunning canals. "Respecting," "Vin Mariani," he says: "Strange to say that a Vin Mariani, so exquisite a wine, should also be a remedy, and a delicious one at that, so pleasant of taste and so of beneficial to the entire system." And Coquelin merely states a truth which is attested by the most famous men and women of the age, by the foremost medical men, and the managers of all the great hospitals. "Vin Mariani" is indeed beneficial to the system. The weakest can digest it; the most debilitated are benefited by its tonic effect; it is less revivified by it; and has been often said regarding it, "It gives new life and hope." "Vin Mariani" is the great tonic-stimulant of the age, used by the great brain-workers of the world, who find that, exhausted by overwork, it refreshes, strengthens, and builds up the whole system. An album of portraits of many celebrities who have spoken highly of "Vin Mariani" will be sent to those who send their address to Lawrence A. Wilson & Co., Montreal, the Canadian Agents.

WINES FOR EVERYBODY. France produced three hundred million gallons more wine last year than it could consume or export. The Bordeaux Claret Company of 30 Hospital Street, Montreal, have purchased some of this good nourishing wine from the growers, and are now offering it for \$1.00 and \$1.50 per case of 12 large bottles, or \$1.00 extra per 24 pint bottles. Write for price list to the Bordeaux Claret Company, 30 Hospital Street, Montreal.

Gratuit—Comforting. EPP'S COCOA BREAKFAST—SUPPER. "By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Dr. J. C. Jackson, Glasgow.

Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled thus. JAMES EPPS & CO., Ltd, Homeopathic Chemists, London, England.

All accounts not settled by the 7th day of February will be sued for without respect of persons. H. R. BOSWALL, Bank of Nova Scotia Building, jan24—dy 2i wky 2i

detook this work and completed it without even exhausting the resources of Canada. His policy has been to open up and develop the resources of Canada, to increase facilities for transportation by extending her system of railroads and canals. In this work they always received uncompromising opposition from the great party, who opposed the building of public works and granting of franchises to railways. If the people of Belfast and P. E. Island expect to receive that justice in the expenditure of public money to which they are entitled, it will be by supporting a Government which has established a record to aid any project which aims to improve the country. He next presented in a very clear and concise manner a statement of facts upon the depression in the prices of agricultural products. It was true that the farmers did not receive as much for a bushel of oats or potatoes or barley as he did some twelve years ago, but he pointed out that those products which the farmer has to sell in a market of world-wide extent are not so much affected by the depression of prices as those articles which he must of necessity buy, in other words a bushel of produce or a ton of coal in exchange for a greater quantity of tea or sugar, or yards of cotton or other articles of any description than he would twelve years ago. A great many of the farmers who are now in the Canadian farmers' ranks are the result of that National Policy which our Grit friends have so ably, and which is to them a guarantee of their future, and which is referred in eloquent terms to the abilities of Hon. Senator Ferguson, and to his patriotic endeavors in the Senate to draw the attention of the Government to the claims of the people of the Province, and to their earnest efforts, in and out of Parliament, in their behalf. He spoke calmly and logically for upwards of an hour in his own beautiful style, and never once before on an Eldon platform had such a masterful criticism of the opposition policy been given. In thanking the electors for the generous support given him when he was last before them as a candidate for the Commons, he mentioned some of the unfair methods by which he was on that occasion defeated, he recollected when that very platform charged the Grit party and the Hon. Louis Davies, who was then advocating unrestricted reciprocity as a panacea for all our ills of wretched character, with suppressing the content of a letter which was written by the Hon. Edward Blake, one of the leading men in the Grit party, to the electors of West Durham, in which he said that unrestricted reciprocity was not practicable, and that it was a policy which any sane Canadian could support. To get over this Mr. Davies sent a telegram to Sir Oliver Mowat asking if the report was true. The reply was that it was not true. Mr. Davies then hung in his face at every meeting. A few days after the election Mr. Blake's letter was published containing the very sentiments he (Mr. Ferguson) had said, but which Mr. Davies so emphatically denied. If the electors had been told, that the best mind in the Grit party had repudiated that policy, and that Mr. Davies was asking the people to endorse, would it not have carried great weight? Mr. Ferguson appealed to the honest sentiment of his hearers in an election gained by such methods could be called a victory. He further remarked that there was one thing to which he must yield the palm to the Grit party, and that is the getting up of a letter which he had written, and promising youngsters who he held up four years ago for the public adoration, as the only hope of this country, had since been tipped by the untimely frost of public contentment, and its contents, which was interred with due solemnity and fitting obsequies by its sponsors, at the same time in which they had rocked in the cradle of a new-born hostility they afterwards christened the Ottawa platform. Mr. Ferguson then took up the new platform, plank by plank, making a complete exposure of its inconsistencies, remarking that its construction was a masterpiece of the same ability to deceive and fully maintained their right to the title so appropriately applied to them as the party of organized hypocrisy. He went fully into the trade question, and showed how the trade of the Dominion of the last year was exported to Great Britain in 1878, agricultural products valued at \$1,308,793, while in 1893 to the same market amounted to \$43,212,114 an increase of \$25,913,321. There was exported to the U. S. during the same period the same commodities to the value of \$8,984,925 in 1878, and \$6,020,992 in 1893, a decrease of \$2,963,933 while the total value of agricultural products exported in 1878 was \$21,644,536, it increased in 1893 to \$24,237,106 or an increase during the period of \$2,592,570. There was imported of agricultural products for home consumption in 1878 \$15,059,930 worth, while there was imported of the same in 1893 only \$2,741,833 a decrease of \$12,318,107. This if we add the increased exports of the last year gives a total of \$33,899,567, all of which goes to show the great work which has been done by the N.P. in increasing the home market and the successful efforts of Government in extending the foreign trade of the Dominion, and their laudable efforts to better the condition of the farming population by the establishing of dairies, etc., who are the farmers' friends. He next referred to a branch Railway for Belfast, saying that to advocate such a branch was no new thing to him. He advocated it on the floor of the Senate in a speech from which he had just referred to this work, and that before he was offered a seat in the Cabinet. Those were his views then, they are his views now. He was taken into the Cabinet notwithstanding that record, and if the people of these districts would strengthen his hands and enlarge his influence at the Council Board by sending men to Ottawa to support him, he certainly could do with more grace and better chances of ultimate success, press for the removal of our disabilities. He then resumed his seat amidst rounds of applause.

James Clow, Esq., stepped forward and moved the first resolution in a neat and telling speech, which was seconded by Capt. R. K. McKenzie and carried unanimously. The second and third resolutions were moved, seconded and carried without a dissenting voice, the meeting then broke up with cheers for the Railway, Ferguson and the Queen.

How Senator Ferguson, P. C., followed: He was received with unbounded enthusiasm, which testified to the appreciation which the people of the Province had for his earnest efforts, in and out of Parliament, in their behalf. He spoke calmly and logically for upwards of an hour in his own beautiful style, and never once before on an Eldon platform had such a masterful criticism of the opposition policy been given. In thanking the electors for the generous support given him when he was last before them as a candidate for the Commons, he mentioned some of the unfair methods by which he was on that occasion defeated, he recollected when that very platform charged the Grit party and the Hon. Louis Davies, who was then advocating unrestricted reciprocity as a panacea for all our ills of wretched character, with suppressing the content of a letter which was written by the Hon. Edward Blake, one of the leading men in the Grit party, to the electors of West Durham, in which he said that unrestricted reciprocity was not practicable, and that it was a policy which any sane Canadian could support.
