CHEQUE LOST.
 Cheque No 117, drawn by Mr. S Cousins Secretary Treasurer, Park Corner Creamery on the MERCHANTS BANK OF P. E. ISLAND, for \$36.00 dollars. Finder will please return to drawer. The public is hereby warned against cashing above cheque.

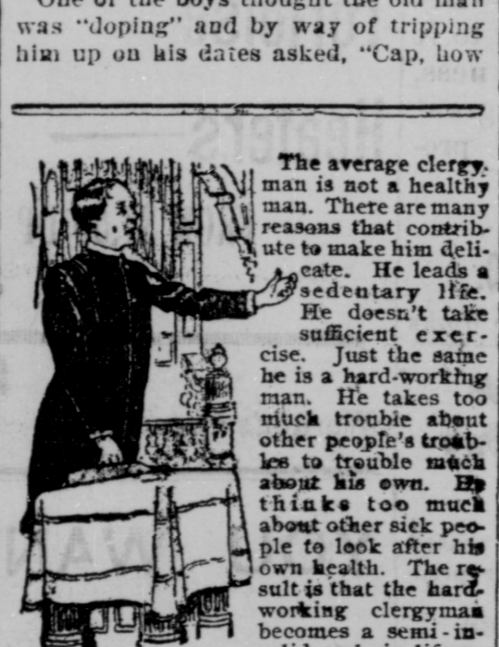

THE SUN'S JOURNEY

By means of the spectroscope we can obtain a probably more accurate determination of the sun's velocity through space. As is well known, the velocity of a star in the line of sight can be found by measuring the displacement of the lines visible in the star's spectrum. Now, the stars near the position of the solar "apex" should be approaching the earth on account of the solar motion, and those at the opposite point of the sky, called the "ant apex," should be receding.
 This method has been employed by several astronomers, especially by Vogel at the Potsdam observatory. This able astronomer has found from an examination of 40 stars that the sun's velocity through space is about 7 1/2 miles a second, but an examination of a larger number of stars would be necessary before we could consider this result as thoroughly established.

From an examination of the spectra of 14 nebulae Professor Keeler of the Lick observatory has found velocities in the line of sight, and from these the French astronomer Tisserand has deduced a velocity of about 9-13 miles for the solar motion, a result which does not differ widely from that found by Vogel. We may therefore perhaps conclude that the velocity of the sun's motion through space is between 6 and 12 miles per second.—Gentleman's Magazine.

Hard on the Burglar.
 "There is a family in my town," said a Baltimore man, "where the children are all boys. They are very rich, and each of the three sons is in receipt of a liberal allowance, but the manner in which they expend it and certain of their characteristics were as succinctly and tersely described as possible the other day by Bob, the eldest one, in telling the story of a burglary that occurred last summer at their country place. Bob is the oldest, Jack the second and Albert the youngest son. Bob, in telling the story, said:
 "He didn't get very much, as some one of the servants thought he heard something about 3 and in going to investigate probably scared him off, but when we discovered the next morning that a burglar had visited us we naturally took an account of stock. The only rooms in the house he had entered were those of my two brothers and myself, and in each of them he had gone through the clothes we had been wearing the day before. Out of my clothes he got 10 cents, from Jack he got nothing, and in going through Bert's jeans he got in debt."—New York Tribune.

An Old Timer.
 A crowd of young men were seated in one of the steamboat offices in the city the other afternoon while an old steamboat veteran regaled them with stories about old times on the Mississippi and reminiscences of old time citizens.
 "Did you know old Bill Jones?" asked one of the men, after the captain had finished relating how he ran a gantlet of Indians with his boat way back in the forties.
 "Member Bill Jones? Well, I guess I did," replied the captain. "Let's see, he died just after the war. He was a good old fellow too. I knew his father before he was married to Bill's mother."
 One of the boys thought the old man was "doping" and by way of tripping him up on his dates asked, "Cap, how

The average clergyman is not a healthy man. There are many reasons that contribute to make him delicate. He leads a sedentary life. He doesn't take sufficient exercise. Just the same he is a hard-working man. He takes too much trouble about other people's troubles to trouble much about his own. He thinks too much about other sick people to look after his own health. The result is that the hard-working clergyman becomes a semi-invalid early in life.
 There is no necessity for this. A clergyman adds nothing to his usefulness, but greatly detracts from it, by neglecting his health. If a man, be he clergyman or layman, will resort to the right remedy just as soon as he feels out of sorts, and knows that he is a little bilious, or that his liver is torpid, or his digestion is out of order, he will remain healthy and robust and add much to his usefulness and many years to his life. Dr. Pierce's Golden Medical Discovery restores the appetite, makes digestion and assimilation perfect, invigorates the liver, purifies the blood and tones the nerves. It is the greatest of all known blood-makers and flesh-builders. It cures 98 per cent. of all cases of consumption and diseases of the air passages. Thousands who were given up by the doctors and had lost all hope have testified to their complete recovery under this marvelous medicine. It is the discovery of an eminent and skillful specialist, Dr. R. V. Pierce, for thirty years chief consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y. All medicine dealers sell it.
 "Eight years ago I was taken with what my doctor called liver complaint," writes N. E. Kendrick, Esq., of Hampton, Grafton Co., New Hampshire. "I began doctoring for it, taking cathartics and other medicines. Last February I had a bilious attack, and I could not sit up long enough to eat. I began taking Dr. Pierce's medicine. I have taken one bottle of Golden Medical Discovery and one vial of Pleasant Pellets. I find no other medicine equal to yours in helping me."
 Without an equal for constipation and biliousness.—Dr. Pierce's Pleasant Pellets.

long have you been running on the river?"

"Who, me? Why, I started on the Mississippi when it was nuthin but a creek!"—Memphis Scimitar.

Chess and War.
 The origin of chess is shrouded in mystery. There is little doubt, however, that its birthplace was in India and that it is an offspring of a game called chaturanga, which is mentioned in oriental literature as in use fully 200 years before the Christian era. From India chess spread into Persia, and thence into Arabia, and ultimately the Arabs took it into Spain and the rest of western Europe.
 The game was in all probability invented for the purpose of illustrating the art of war. The Arab legend upon this point is that it was devised for the instruction of a young despot by his father, a learned Brahman, to teach him that a king, notwithstanding his power, was dependent for safety upon his subjects. The Greek historians credit the invention of the game to Palamedes, who, they claim, devised it to beguile the tedium of the siege of Troy during the Trojan war.

Where Quinine is Good.
 Dr. Crosse, in an article in the Lancet on blackwater fever, incidentally calls attention to the fact that it is not wise for those who have an idiosyncrasy against quinine or who suffer from even slight albuminuria to go to malarious climates. He believes that in the more malarious districts at least five grains of quinine should be taken a day to prevent chronic malarial poisoning. This he considers necessary in addition to ordinary precautions in regard to exposure to chills, wet and the sun and as to moderation in eating and drinking.

Confuting an Impossibility.
 "I want to see Mrs. Stuythe," said the visitor.
 "You can't," said the servant. "She has the toothache."
 "You must be mistaken," the man replied. "I'm her dentist, and I have her teeth here in this package."—Catholic Standard and Times.

Did You Ever See a Horse Cry?
 Many people believe that horses do not weep, but those who live much to do with these faithful creatures know that on several occasions they will shed tears as well as express sorrow in the most heartbreaking manner. In the west, where the hardness of the ponies causes the riders to almost overlook the necessity of providing for their needs, it is quite common when the weather is extremely cold to leave an unblanketed pony tied up for two or three hours when the temperature is nearly zero and while its owner is transacting business or getting drunk. In this case the suffering is evidenced by the cries, which are almost like sobs, and unmistakable tears freeze on to the cheeks like icicles.
 When a horse falls in the street and gets injured, the shock generally numbs the senses so much that it does not either cry or groan, but under some conditions an injured horse will solicit sympathy in the most distinct manner. I remember a favorite horse of my own which trod on a nail long enough to pierce its foot. The poor thing hobbled up to me on three legs and cried as nearly like a child in trouble as anything I can describe. The sight was a very touching one, as was also the crippled animal's gratitude when the nail was pulled out and the wound dressed.—St. Louis Globe-Democrat.

A Cure That Killed.
 Notwithstanding the spread of education in Galicia, superstition is still alive among the Polish peasantry. The wife of a well to do country man in Nieporenta, Kaspar Kafka, had a malignant ulcer and was in a very dangerous state. Her husband decided to call in a shepherd renowned for his wonderful healing powers.
 The latter, having examined his patient, proceeded to tie her left elbow to her right knee and her left knee to her right elbow, announced that she was possessed with a devil and directed them to anoint the ulcer with a mixture of soft soap and 15 chopped hairs from a horse's tail. If the patient screamed, it was the devil screaming within her, and she was to be left alone, securely bound to the bed, that she might not remove the appliance. He then took his fee and left.
 His orders were conscientiously carried out, with the result that after a night of indescribable agony the poor woman died of exhaustion.—Cracow Letter in Chicago Record.

Paraguay's Particular Plens.
 Perhaps the plague in Paraguay is merely an attack of plague, or sand flea. This insect is called nigula in the native language. In 1879 it killed a whole colony of Englishmen, consisting of 200 families, turning the colony, which was at Itapa, into a cemetery. A German colony at Aecagua was driven out. The plague causes buboes and attacks the warmest parts of the body—that is, the cavities and the groin and armpits—just the same spots as the eastern plague. It attacks Englishmen and Germans preferentially and avoids those that use but little soap. Soaps clean the body, and the plague likes clean persons to eat. It also avoids people who eat more or less poisonous

food. A man saturated with alcohol, Boca gin, nicotine and Paseo de Julio cooking is pretty well safe from the sand flea.—Buenos Ayres Herald.

Governors Island.
 There is a large expanse of rolling sward on Governors Island kept at all times in the pink of condition. This little island off Battery park is conceded to be the best kept army post on the Atlantic coast. There are two reasons for this. Fort Columbus is the headquarters of the department of the east. It must assume an appearance in keeping with its high standing in the department.
 It also has a military prison, and the convicts sent there for terms of months or years are sentenced to hard labor. Under the supervision of sentinels these men keep the walks and promenades scrupulously clean and the sward closely clipped and free from falling leaves and other litter. They also give proper attention to the various buildings and their immediate surroundings.—New York Press.

Applause and Criticism.
 It was after the piano recital, and the audience was still applauding. There were two English women, though, who did not clap their hands. But they commented in tones that were audible for some distance around thus:
 "The poor man! Will they make him play again?"
 "Isn't it awful the way the Americans applaud? It's so vulgar!"
 "Yes; it's the most vulgar thing they do."
 And the Americans took meekly their lesson in manners.—New York Commercial Advertiser.

Weak and... PUNY CHILDREN
 Become Strong and Healthy by using Dr. A. W. Chase's Nerve Food.
 Children are frequently left weak and sickly as an after result of measles, scarlet fever, etc., and in this state are easy prey to nervous disorders, rickets, spinal disease, or consumption, diseases which do not affect robust, healthy children.
 The blood is weak and watery and the nerves improperly nourished. Feed the blood and nerves with Dr. A. W. Chase's Nerve Food, and the pale, pinched faces will soon become rosy and plump, and tiredness and weakness will give way to strength and animation.
 Mr. E. W. Day, 62 Close Avenue, Toronto, writes: "My eldest daughter, aged eight, became very much run down. Her fretful, nervous, sleepless condition greatly alarmed her parents. She was taken from school, and in spite of the best nursing, the thin, weakened, bloodless face grew painfully worse. Fortunately we used Dr. Chase's Nerve Food. An improvement became apparent in a few days, it continued, and in a few weeks she returned to school built up anew, and greatly to our joy fully restored to health."
 Dr. A. W. Chase's Nerve Food, 50c. a box, at all dealers, or Edmanson, Bates & Co., Toronto.

Every one's lot appears to be preferable to our own.
A Jury of Women
 Who have tested the merits of Dr. A. W. Chase's Kidney-Liver Pills return the verdict that for backache and kidney disorders there is no preparation in any way equal to this great discovery of Dr. A. W. Chase, America's greatest physician. This great kidney cure is sold by all dealers at 25 cents a box, and has proved most effectual as a remedy for the many ills to which woman is subject.

The average salary paid to the Methodist preachers in the United States last year was \$473.35.
Minard's Liniment for sale everywhere.
 The Russian government has ordered all rivers of the empire surveyed, with a view to connecting all the important streams with canals.

C. C. Richards & Co.
 Dear Sirs,—Your MINARD'S LINIMENT is our remedy for sore throat, colds and all ordinary ailments.
 It never fails to relieve and cure promptly.
 CHARLES WHOOTTEN.
 Port Mulgrave.

It is asserted that the wine cellars of France contain alleged champagne enough to supply the world's demand for three years—nearly 150,000,000 bottles.
Minard's Liniment Cures Burns & Scalds
 Sixty-six per cent of the elementary schools in Belgium have savings banks for scholars, while in England the proportion is only 36.9, though it was 43.6 in 1894.

RHEUMATISM CURED.
 John A. McDonald, Arnprior, Ont.
 Jas. McKee, Linnwood, Ont.
 Lechin McNeil, Mabou, C.B.
 C. B. Billing, Markham, Ont.
 John Mader, Mahone Bay, N.S.
 Lewis S. Butler, Burin, Nfld.
 These well known gentlemen all assert that they were cured by MINARD'S LINIMENT.

The Medical Profession
