

TEST THE KIDNEYS

And if they are diseased use the world's greatest kidney cure

Dr. A. W. Chase's Kidney-Liver Pills

It's a simple matter to test the kidneys. You need not consult a doctor. By asking yourself three questions you can determine whether or not your kidneys are deranged.

First: "Have you backache, or weak, lame back?"

Second: "Do you have difficulty in urinating or a too frequent desire to urinate?"

Third: "Are there deposits like brick dust in the urine after it has stood for twenty-four hours?"

In its earlier stages kidney disease is readily cured by a few boxes of Dr. Chase's Kidney-Liver Pills, a preparation which has made Dr. Chase famous throughout the world for his wonderful cures of diseases of the kidneys.

If you have kidney disease you can take Dr. Chase's Kidney-Liver Pills with perfect confidence that what has proved an absolute cure in 50 many thousands of cases will not fail you. So long as the cells of the kidneys are not completely wasted away, as in the last stages of Bright's disease, Dr. Chase's Kidney-Liver Pills will give them new vigor and strength and make them strong, healthy and active. One pill a dose, 25c. a box, at all dealers, or Edmondson, Bates & Co., Toronto.

Of Special Interest to our Farmers

Eggs to be Sold by Weight.

An act to further amend the Weights and Measures Act of Canada has been introduced in the House of Commons by Mr. John McMillan, M. P., for South Huron, which is designed to fix the weights at which eggs shall be sold. The bill reads as follows: "Unless otherwise specially agreed upon between the buyer and seller, eggs shall be sold by weight and the weight equivalent to a dozen shall be one pound and one half."

This is the weight demanded by the British market, which is equal to 15 pounds to the "long hundred," which is ten dozens. At present, eggs are usually bought by dozens as they come to hand, and only those which are up to the demand of the British market in size are sent there, which leaves the smaller eggs to be used at home or be sent to the mining or other Canadian markets. While an act of Parliament cannot be expected to enlarge a hen's egg mould, it will, if carried out, induce poultry-keepers to do away with the hens and breeds of hens that lay small eggs, and keep only those for egg production which shell out the proper sized hen fruit. The author of the bill, referring to it in a letter to the office, said: "The bill is not intended to interfere with the sale of eggs by the farmers to the egg dealers, but to regulate the sale of eggs bought at a distance, as there is often difficulty in deciding what a standard dozen of eggs means. This bill defines the standard as between local dealers and dealers at a distance in this country, but principally in the British Market."—Farmer's Advocate.

Fresh Water for Dairy Cows.

With the approach of the hot and dry summer months it becomes necessary to supply the farm animals with abundance of pure fresh water.

When the animals are required to quench their thirst in muddy stagnant pools of water, it is not only inhuman, but it is even dangerous to the animal's health, as it often causes fatal diseases among the farm animals.

And when dairy cows are forced to drink impure water their milk will also be affected to a large extent, as it contains eighty seven per cent. of water.

Consequently such milk will become a source of constant danger to all persons using it. And without doubt a large per cent. of fever and sickness in summer months among infants and children is directly due to this cause.—Farm Journal.

Our Export Butter Trade.

As the Trade Bulletin has repeatedly contended, there is no reason why our exports of butter should not far exceed those of cheese, considering that the imports of the latter into the United Kingdom amount to about \$25,000,000 of which Canada furnishes more than all the other countries put together. But when it comes to butter the position is reversed as we are away down almost at the bottom of the list in our contributions to the \$80,000,000 worth which Great Britain imports annually. For instance we only shipped a little over \$4,000,000 worth of butter to Great Britain during the past season ending April 30, 1899, while the little kingdom of Denmark exported about \$37,000,000 worth within the same period, and this in face of the fact that our pasture resources and facilities for production could be utilized to a far greater extent than those of Denmark.—Montreal Trade Bulletin.

hens while giving little in return. Pens are neglected, the stock is indifferently fed, and yet large returns are expected. That these are sometimes realized does not prove that filth promotes egg production.

It is necessary in most parts of the country to give the cows a light morning ration before they leave the stable up to the 8th or 10th of June. Until that time the grass is so soft and watery that the cow will become much run down if she is forced to live upon it entirely.

Don't compel the cows to stay out on cold, rainy days, and never on a rainy night; the chilling effects of the rain will reduce the milk yield more than most people think.—Farmer's Advocate.

We all love mother's pet And never do her harm For she is Brindle Bet The pride of Oak-hill farm She wears a silver bell, That o'er the pasture rings; At morn and eve it tells Some very pleasant things— That Bet is coming home With milk for young and old, The pail will heap with foam, The cream will rise like gold. The children's friend we all avow, Is mother's pet the Brindle cow. —Selected.

TO THE RESCUE.

When a Newfoundland dog plunges into the water and saves a drowning child, every one has a word of praise for the noble animal. There is a graver danger than that of drowning that menaces childhood. It is a danger from which every prospective mother may save her babe if she will only take the right care of the health of the delicate organs that bear the burdens of maternity, during the period anuring motherhood.

The threatening danger is that baby will be weak, puny and sickly, and come into the world with the seeds of disease and death already implanted in its little body. Health cannot be born of ill-health. The child born of a mother who is suffering from weakness and disease of the feminine organs is condemned upon the very threshold of life to suffering, disease and death. Dr. Pierce's Favorite Prescription fits a woman for motherhood and insures a healthy baby. Thousands of women who were either childless or whose children had all died in infancy, bless the "Favorite Prescription" for the fact that they are now the happy mothers of healthy children. The medicine dealer who says he has something "just as good" knows that he falsifies.

Mrs. Jno. H. Jones, of Peely, Luzerne Co., Pa., writes: "I was induced to buy two bottles of Dr. Pierce's Favorite Prescription to see if the medicine would make the coming of my baby more easy. I had seven children before and all died during birth or shortly after. I am happy to say that my eighth child (born Sunday, October 27th, 1898) is living and I suffered none at all, compared with what I had with the others."

The names, addresses and photographs of hundreds of women cured by Dr. Pierce's medicines are printed in the "People's Common Sense Medical Adviser." It's free. For a paper-covered copy send 31 one-cent stamps to cover customs and mailing only. French cloth binding 50 stamps. Address: Dr. R. V. Pierce, Buffalo, N. Y. Every woman needs a great medical book. Dr. Pierce's Common Sense Medical Adviser fills this want. It contains over 1000 pages and 300 illustrations. Several chapters are devoted to the physiology of the organs distinctly feminine.

HIS NARROW ESCAPE

Mr. John N. Babcock's Experience With Dodd's Kidney Pills

SHARRET LAKE, Ont., May 29.—No resident of this place is better known to the thousands of tourists and sportsmen who visit us annually than, is Mr. John N. Babcock.

Mr. Babcock has had many thrilling experiences, but the narrowest escape he ever had, he tells us in these words:—"After twenty years of pain, caused by gravel and other kidney complaints, I am pleased to be able to state that I have been completely cured by Dodd's Kidney Pills. During these years I have spent hundreds of dollars for doctors and remedies, but only Dodd's Kidney Pills helped me."

Floral boas are one of the novelties for summer neckwear. They are made of rose leaves of gathered gauze.

Dr. Chase Cures Catarrh after Operations Fail.

Toronto, March 16th, 1897. My boy aged fourteen, has been a sufferer from Catarrh, and lately we submitted him to an operation at the Central Hospital. Since then we have resorted to Dr. Chase's Catarrh Cure, and one box of this medicine has made a prompt and complete cure.

Artificial Teeth on Metal Plates

A dentist who knows his business, and one that has any regard for his patients will always advise them to have a metal plate.

PROF. MELVILLE B. BUCKLEY, Instructor Boston Dental College, Boston Mass

In view of the vast amount of injury done to the mouths of wearers of rubber or vulcanite plates, by the retention of undue heat, owing to the non conductivity of rubber, and as aluminum is now so cheaply produced, and making as it does a rigid, light, clean, unobjectionable plate there seems no reason why any person should wear a rubber or vulcanite plate. Not only this, but better results in fit and adhesion are obtained in difficult cases, than in the use of rubber.

L. P. HASKELL, D. D. S. Chicago Ill Dental School

The above quotations are from hundreds by eminent dentists whose close observation in many years experience in plate work has learned them the many advantages of metal over rubber.

Many persons who are compelled to wear artificial teeth on a plate find that the ordinary plate causes heating of the mouth, bad taste, sbrnkage of the gums, etc., finally causing the plate to get loose, sometimes sore lips, sore mouths and sore throats, and caused directly from the wearing of an ordinary plate.

We recommend a metal plate either of Gold, Platinum, Aluminum.

It is a conductor of heat and cold, it is non-irritating, and is thinner, lighter, and stronger than any other plate.

We have testimonials from persons for whom we have made metal plates—not one would wear an ordinary plate again. You can have your impression taken, and a metal plate made same day, fully guaranteed because we make them ourselves, and know all about the material used. Call and see specimens of our work.

Every piece of work done by us must give entire satisfaction to the patient, else we will not allow it to leave our office.

See our artificial teeth without plates.
