### SPECTACLES.

Over twenty-five years I have been in the Spectacle business and during that time have fitted hundreds and hundreds of persons. Some had put off getting glasses so long that they could not see a large 4 inch letter A without going within 2 or 3 feet of it, and might have gone blind if they had put off getting glasses much longer. Others have been fitted or rather misfitted, with wrong glasses by travellers, and charged a great deal more than they ought to have been. This year our traveller, Mr. C. H. White, intends calling on parties at their homes in the country, to test eyes and show samples of our goods. Should he call on you I bespeak for him your favorable consideration, and any order you may give him will be filled as soon as possible and guaranteed by me. Glasses can also be exchanged at the store, CAMERON BLOCK, City, if after a trial they do not prove as satisfactory as you wish.

A comparison of the average height of men in various trades and professions in different countries brings out the fact that the English, as a nation, are the tallest men in the world, says the Pittsburg Dispatch. It has been found that the English professional classes, who are the tallest adult males, average 5 feet 9 1/4 inches. Next on the list come the males of all classes of the United States. Most European nations average for the adult male 5 feet 5 inches, but the Austrians, Spaniards and Portuguese fall a trifle short of this standard.

We wish we could make everybody believe that promptness is prevention; that there should be no delay when you are losing flesh and when you are pale, especially if a cough be present. The continued use of Scott's Emulsion in the early stages of lung affections does prevent the development of Consumption. Your doctor will tell you this is true and we state it without wishing to make any false claims or false promises. Free book tells more on the subject.

These two cases led me to prescribe Tutti-Frutti Gum chewing in a number of cases of Atonic Dyspepsia that came under my care. I have not kept notes of these cases, but in nearly all a cure was effected, and in the few that did not progress to a complete recovery the benefit from the procedure was marked.
