Largely Attended Funeral Yesterday

Relatives, friends and acquaintances of the late James N. Tawell crowded St. Peter's Cathedral yesterday afternoon to the young man who had died suddenly on June 14.

In his thirtieth year, the deceased had been married but two months when he succumbed to a cerebral hemorrhage early Thursday morning. A fitting tribute to his genial personality and kindly nature was shown in the huge crowd who waited outside the Church during the funeral service. Said to be one of the largest funerals held in this City for some time, it was attended by friends and relatives of the deceased from as far as Quebec, and almost seventy telegrams were received by his family expressing regrets from those too far away to be present.

Rev. Canon Malone officiated at services at the Church and grave, and members of the Canadian Legion attended in a body. Major A. H. Peake assisted in the service at the grave where Bugler Frank Smith sounded the "Last Post".

More than eighty floral wreaths were placed around the grave in the St. Peter's Cemetery, after the procession of approximately one hundred automobiles had proceeded there for the final service.

Pall bearers were Messrs. Paul and Joe Kays, William Shama, Albert Westerbe, Joseph Zakem and Frank Michael.

Teachers Study Group Held At Clyde River

Fifteen teachers assembled in Clyde River School recently for their study group, headed by Miss Anna Riley, Supervisor, assisted by Mr. Bryer Jones.

The president of the meeting was Miss Rita MacNeill, while the secretary was Miss Joyce Nicholson.

Discussion No. 1—Grading and Promotion of Pupils: The Grade VIII Composite Tests were discussed first. Tests were considered a guide to the teacher in grading their pupils. The majority of the teachers thought that they were a fine aid and it was suggested that they would also be helpful in Grade VI, if such were possible. Besides being an aid in grading it was suggested that they showed a pass in the work of the elementary grades.

There are three factors by which a teacher may evaluate his or her pupils' ability for promotion, namely: courses of studies, Grade VIII Composite Tests and the age of the pupil. The teachers were informed that there was more uniformity of standards attained in the matter of grading since the Composite Tests have been introduced.

One teacher expressed the opinion that the new arithmetic books were not suitable, lacking drill work. The supervisor replied that the part where the children were lax, was in reasoning.

Discussion No. 2—Continuity of Teaching Service in the District: It was the opinion of the teachers that there are many causes of teachers moving, from one school to another, of which the most important are: Boarding houses, supplement, equipment in school, co-operation of parents and the atmosphere of working.

The reason for staying in a school for a longer period than one year are that the teacher cannot know the pupils and their home-life in one year and therefore cannot do his or her best work. It was thought advisable to remain in a school as long as favorable progress can be made.

Discussion No. 4—Improving School Property—It was decided that the teachers should become more active in advising School Boards in the matter of property improvement, as they are the ones who realize to the greatest extent, the requirements.

Discussion No. 5—Curricular Changes—The teachers were encouraged to use the topic method of teaching, rather than the memorization of facts, particularly in history.

In the discussion on guide-books, the teachers were urged to follow them completely, and if all the guide-books were not

Suggests Use Of Atom Bomb If Sure Of Attack

NEW YORK, June 15—(AP)—A noted Roman Catholic educator and authority on international affairs, Rev. Edmund A. Walsh, says the United States would be justified in taking any defensive measure—even use of the atomic bomb—if it were morally certain that a Russian Pearl Harbor was imminent.

In a new book, "Total Empire—The Roots and Progress of World Communism," published today by Bruce Publishing Co., Milwaukee) Father Walsh examines the rise of Russian power and world Communism's stated aims. With this in mind, he discusses "atom bombs and the Christian conscience."

"If the Government of the United States has sound reason to believe (that is, has moral certitude) that a similar attack (to Pearl Harbor) is being mounted and ready to be launched against this country from any source, then it would appear that President Truman would be morally justified to take defensive measures proportionate to the danger," he says.

"That could mean use of the atomic bomb, as no power would launch a surprise attack on the United States without an adequate supply of atomic bombs. Should large numbers of civilians be harmed by American necessity to use the bomb in self defence, that regrettable effect, not in-

obtainable, the first three grades were considered the most important.

The teachers were informed that a geography text was still being contemplated.

Following these advantageous discussions Mrs. Neil Campbell moved that the meeting be adjourned, seconded by Mrs. Clow.

tended as such, would be attributable to what moralists describe as the indirect voluntary."

Father Walsh, vice-president of Georgetown University, was made director-general of the Vatican's relief commission to Russia in 1922.

The author says that if time permitted, a warning or an ultimatum to an enemy known to be preparing to attack should be issued before the A-bomb was used.

The regular monthly meeting of the Tignish Catholic Women's League was held recently in the assembly room of Our Lady of the Angels Convent. Twelve members were present and the meeting was conducted by the president, Mrs. J. F. Skerry. Roll call and minutes of the previous meeting were read by the recording secretary, Mrs. C. F.
