

**SMALL FAMILY BUNGALOW**

**ARCHITECT D.F. Plunton**, of Winnipeg, had retired couples or small families in mind when he designed this simple yet efficient basement bungalow.

The house has two bedrooms arranged to one side, with the bathroom ideally located between them. The living and working area are built around a centrally located storage room and heating room. The kitchen and laundry rooms are located at the front of the house adjacent to a covered carport and added storage space. The combined living-dining room has been thoughtfully placed at the rear overlooking a restful patio away from the busier street scene. Sliding doors, instead of the more common hinge-swinging type doors, add a touch of modern living.

The floor area is 1,832 square feet and the exterior dimensions are 36 feet by 52 feet, six inches. Working drawings for the house, known as Design 140, may be obtained from Central Mortgage and Housing Corporation in Montreal at minimum cost.

**Vapour Barriers Protect Insulation And Woodwork**

Vapour barriers go hand in hand with insulation and one can hardly be discussed without reference to the other. Insulation reduces the rate at which heat escapes to the outside; vapour barriers prevent an accumulation of moisture in the insulating material.

If moisture is allowed to accumulate in walls or other enclosed spaces through lack of ventilation, its effects are especially damaging. Wood-destroying bacteria and fungi thrive in moist conditions. Such areas must either be properly ventilated, or kept dry by using vapour barriers. Vapour barriers are always installed on the warm side of the insulation, as close to the surface of the insulating material as possible. The most convenient place is directly under the interior finish, that is, under the plaster lath or other wall or ceiling covering.

**POPULAR MATERIALS**

Materials most widely used today as vapour barriers are polyethylene film, a transparent plastic material; asphalt or wax-coated paper, or thin metal foil. Sometimes the foil is bonded to paper to make it tougher.

Manufacturers have also devised a method of combining vapour barriers with insulation. A coating of asphalt or other material impervious to water is applied directly to the wrapping on the batts or between the batts of fibrous insulation.

In many cases this type of vapour barrier, though effective in itself, does not give the full protection required as it may not cover the entire surface. Double studs, window and door framing and top and bottom plates are liable to remain uncovered. Additional pieces of vapour barrier should be applied to shield the unprotected areas.

When plywood exterior sheathing is used a good vapour barrier is required on the inside of the wall. Plywood is welded together with a waterproof glue which acts as a barrier on the outside. Any trapped moisture will damage the surrounding wood.

**George Dixon Is Scoreless**

**By THE CANADIAN PRESS**

Bobby Jack Oliver moved up a notch in the Eastern Football Conference scoring race Saturday as Montreal Alouettes and Edmonton Eskimos tied 18-18 in a Canadian Football League game.

Oliver kicked two singles, a convert and a field goal to move into sixth place with 24 points. The upper regions of the scoring race were not affected by the game. George Dixon of Montreal, the leader with 48 points, was held scoreless Saturday.

The leaders:

Dixon, M	48	0	0	0	0
White, O	30	0	0	0	0
Rachin, O	21	0	0	0	0
Sutherland, H	19	0	0	0	0
Kuntz, H	18	0	0	0	0
Oliver, M	18	0	0	0	0
Stewart, O	15	0	0	0	0
Stephens, M	15	0	0	0	0
Slatto, T	14	0	0	0	0
Mitchell, T	11	0	0	0	0

Mr. Sullivan has worked with the league and its young players for several years.

**Montague Little Leaguers Honor Coach Arthur Sullivan**

**MONTAGUE** — The Montague Little Leaguers took the opportunity of the last event of the season to present Arthur Sullivan, one of their coaches, with a gift to show in a small way their appreciation of his untiring work on their behalf since the formation of the local little league baseball club. The presentation was made by little leaguers, George Iman.

The ball game on Saturday afternoon at Brudenell Park, saw the combined teams of the little league organized a team made up of their fathers. Needless to say, the score ended up in favor of the youngsters.

Following the ball game, the date presided at the stove and served hamburgs, drinks and chips to the hungry ball players. The food was donated and the members of the various teams were responsible for the presentation to Mr. Sullivan.

Cooks and senior ball players included, Wallace Jenkins, Ralph Beck, James Call, Poch MacDonald, Joey Fraser, Dr. G.S.A. Jansen, John MacPhee, At. MacDonald and Leslie Stuart. Unavoidably absent was assistant coach, Dr. M. Book.

Mr. Sullivan announced that approximately \$87 had been collected during the recent little league tag day and that this money would be used to purchase necessary equipment for the 1953 season.

**Cars Collide At Souris W.**

**SOURIS** — A two-car collision about 11:35 Saturday night resulted in both vehicles being heavily damaged, but all occupants suffered nothing more than a shaking up.

At the time of the mishap a 1960 Pontiac driven by Claude Creamer, Souris, and travelling east on the Souris West Road, collided with a 1960 Ford being driven west by Paul Ayley Galant, Souris West.

The Creamer vehicle had one passenger and the Gallant car two passengers. The Pontiac sustained damage estimated at \$100 and the Ford \$20. The incident was investigated by the Souris detachment, RCMP.

**COMPARE before you buy**

**Lantz Tweeter Red**

Your house is one of your most prized possessions. Your three main considerations when buying should be PROTECTION...COMFORT...and BEAUTY. You will want to feel safe and secure in the house you buy. There is nothing safer than a solid brick wall. You will want built-in comfort. A brick wall offers relief from the sultry summer heat and the deep freeze of winter. You will want lasting beauty for this possession. Rich, natural earth-toned colors give SHAW brick an advantage over any other building material. PROTECTION...COMFORT...BEAUTY...these three reasons why we say "Compare before you buy."
