Dairy Interest at Dundas.

On Saturday evening, 8th inst., a large and influential meeting of the farmers, presided over by Mr. L. P. Ross, was held in the courthouse at Dundas to take into consideration the establishing of a cheese factory in that section.

Mr. T. J. Dillon, Superintendent of the Experimental Dairy Station at New Perth, and Cyrus Shaw, Esq., M. P. P., were present and delivered addresses.

Mr. Dillon, in speaking of the success attending the manufacture of cheese in Ontario, stated that we were possessed of even greater facilities than the people of Ontario, and with their experience as a guide should carry the industry to a most successful issue. After informing the meeting in reference to the building of a factory, choice of locality, plan of organization, etc., he dwelt at some length on the feeding of milk cows, recommending for early feeding the growing of rye, to be sowed about the 15th Sept., or the month of October, for later on, the feeding of vetches and peas sowed at different dates, and finally the feeding of corn, which, he says, grows to perfection on the Island. After giving minute instructions concerning the cultivation of corn, and, naming the varieties best suited to the climate, he closed his very interesting and instructive lecture.

He was followed by Mr. Shaw, who, in his own peculiar and inimitible style, delivered an able and practical address on the subject, giving the meeting the benefit of his short experience in cheese-making, and admonishing them to throw away party prejudices, if any existed, and be united in this enterprise for the general welfare. He thought the cheese factory was the farmers' only salvation, and that the ravages of the obnoxious potato bug, in restricting the sale of the raw material, but a blessing in disguise.

After an animated discussion, participated in by leading farmers, a vote of thanks was tendered the lecturers, and the meeting adjourned to meet at 7 p. m. on Wednesday, 19th inst, in Narrows Creek schoolhouse.

The people of Dundas seem to be alive to this question, and it is but a matter of a little time when a cheese factory shall be in operation in their midst.

E. L. B.

Dundas, Oct. 10th.

Montague Notes.

The summer is over and the sheaves have been garnered. The farmers are now busy in the potato fields and are housing a fair crop. There is no sign of disease.

The month of September was all that could be desired to mature the tubers—dry weather with scarcely a rain fall during its 30 days, with a thermometer ranging from 65 to 70 degrees, an unusual heat for the season of the year—just what was required to give a full crop of vegetables. Although the bug has been busy and persistent very little damage has been done, and the prospect of a large export of sound merchantable stock at fair prices is assured.

October has come with its promises of rich autumnal tints. The splendor of forest foliage and of gardens radiant with the brilliant tones of chrysanthemums and dahlias when forest and roadside, hill and dale have each a glory of their own.

During the past week large crowds have visited the Kickapoo Medicine Company, the ladies especially in greater numbers and all with imaginary diseases. One of our citizens who has been complaining for some time, has, so report says, been cured of *Tarnia solium*, and is now looking as bright and cheerful as a morning in June.

Very little shipping has been done yet. Some three or four cargoes have been loaded for Halifax, Pictou and Cape Breton markets. Within the next few weeks our little harbor will be studded with a forest of masts. The new barkentine is being sparred, and as the work proceeds new lines of beauty appear.

CURED BY THREE BOTTLES!
MR. B. T. ELWELL, FORMERLY OF PATTEN, AROOSTOOK COUNTY, ME., BUT FOR THE LAST THREE YEARS LIVING AT ROCKLAND, ME., NO. 5 BUNKER ST., WRITES:
GENTS:—I am now 79 years of age. Have been troubled for twenty years with Inflammation at neck of bladder and enlargement of Prostate Gland. For six years, have been afflicted with irregular action of the bowels, alternating between Diarrhœa and extreme Constipation. For two years the Constipation has been so great, that for five or six days would have no action of the bowels at all. I have been a great sufferer from indigestion with no appetite. Within fifteen minutes after taking food into the stomach, it would become strongly acid with extreme burning sensation, and no action of the stomach whatever. Previous to taking SKODA'S DISCOVERY and SKODA'S LITTLE TABLETS, I had taken many remedies, including nearly all the sarsaparillas upon the market to-day with not the least benefit. I had been taking your Discovery but a few days before I felt a decided change. I have now taken one-half course (three bottles), and have a fine appetite; not the least distress or souring after eating, bowels regular in action every day, and food tastes as good to me as when a boy; my bladder trouble has entirely disappeared, and I have experienced so great a change that I feel it my duty to testify to the wonderful effects of your remedies.
Very truly yours, B. T. ELWELL.
