GENERAL INTELLIGENCE

AMERICAN SERVICE TO RUSSIAN BELLIGERENTS.—It will be recollected, that the schooner Caroline E. Foote, from Honolulu, bound for Hakadodi by the way of Simoda, changed her route on arriving at the latter place for the purpose of conveying to Petropaulowski a Russian Admiral and sailors who had been wrecked on the coast of Japan, near Simoda.

The Captain who was also the owner, got a bonus of $1,000 for the voyage, and offered his seamen $6 a month increase in their wages, but they refused to work for that; and required also, as the vessel took arms and ammunition as well as men, that the capt. should give them a written instrument holding them harmless in case of capture. This being denied, they refused to work the ship, when they were put on bread and water and the vessel manned by the sailors of the Russian admiral. On their arrival at Petropaulowski, they were taken into custody by Russian soldiers at the instigation of their own captain, and confined in a damp and unhealthy prison, without bedding. for the space of four or five days. The alternative was finally presented them of being sent into the interior or going to duty on the vessel. They accepted the latter alternative, returned with the vessel to Japan, and thence to San Francisco.

Upon their arrival at the latter port, they brought an action without delay in the United States' Court against the schooner for increase of wages: and the court decided in their favor, giving them $100 per month from the time of deviation in the voyage.

The Barbadoes *Liberal* supplies the following particulars relative to the late heavy gale which lately swept over that Island:—

From a little after 5, p. m. the wind set in from the North-west, blowing steadily from that point, and increasing very gradually, as the night advanced, until a little after midnight, when the storm was at its height. The wind subsequently shifted round to the south, where it has continued fresh the whole of the day.

The damage on shore, beyond the lodging perhaps of some of the more forward canes, is probably very trivial, but we regret to state, that three of the vessels in the Bay have been stranded with the loss of some lives. The Brig New City of Cork, of Liverpool, went ashore on the Pier and is a complete wreck—the Captain (Haynes) and Boatswain were drowned; the Barque William Large, also of Liverpool, went ashore near the Pier, bilged; the Schooner *Koh-i-noor*, of Dominica, 59 tons, parted her anchor at 2 a. m., and went ashore opposite Shurland's alley—one of her crew, Alexander Martin, a native of this place, was washed overboard and drowned. Among the casualties is Captain Kirby, of the Schooner Peri, of Dominica, in the Careenage, who lost his footing whilst assisting to secure his vessel and was drowned.

The bodies of Captain Baynes and Alexander Martin have been picked up during the day—the others not yet found.

INDUSTRY AND SUCCESS.—Richard Burke, being found in a reverie shortly after an extraordinary display of powers in a Parliament by his brother Edmund Burke, was questioned by a friend as to the cause, and replied—"I have been wondering how Ned has contrived to monopolize all the talents of the family; but then again I remember, when we were at play he was always at work." The force of this anecdote is increased by the fact that Richard Burke, was considered not inferior in natural talents to his brother. yet one rose to greatness, while the other died comparativyel obscure. Don't trust to genius, young man, if you rise; but work! work!

COLD FEET.—If any one who is troubled with cold and chilled feet—and who we know there are many—will take the trouble to plunge them in cold water and wipe them dry just before going to bed, he find the chilliness replaced by a warm delicious glow, amply satisfactory for the trouble. It will also prove a preventive against taking cold by having wet feet while walking.

JERUSALEM.—The Paris *Universe* describes the rejoicings manifested at Jerusalem and in the Holy Land on the arrival of the intelligence of the fall of Sebastopol. The Greek and Armenian population alone displayed an ill feeling on that occasion. Their patriarchs, however, offered up thanks for that act of grace in the Church of the Holy Sepulchre, more in obedience to the request of the Governor of Palestine, Kiamil, Pasha, who assisted at the ceremony, than from sincerity of feeling. The rejoicings at Jerusalem continued for three days.

MAURITIUS.

Advices from the Mauritius mention that the sugar estates are in a higher state of cultivation, and will produce 10,000 tons more than last crop. The *Commercial Gazettee* observes—"There is a worm in the cane which is doing some destruction, and on a few particular estates there will be a reduction of 10, 15, and even 20 per cent. on the estimation. Notwithstanding we see no reason to look with any despondency on the future."

We learn from St. Petersburg that the Emperor has dismissed Admiral Berck from the command in-chief of the fleets and ports in the Black Sea, and from his functions as Military Governor of Nicolaieff and Sebastopl. He is succeeded by Admiral Metlin.

The latest accounts received at Vienna from the Crimea state that the Russian army, after being reinforced by 22,000 fresh troops, from Perekop, under General Pianutin, was about to assume the offensive, and was making preparations for a vigorous attack on Eupatoria.

BERMUDA.—Among the many calamities that it has been our sad duty as public journalists to record, few have been more melancholy than the following, by which a young and doating wife was cut off in the flower of youth, "just when her sun was brightest." From enquiry, we learn the facts of the case to be these:—Mrs. Laura Tatem, of Paget's Parish, on Thursday evening last, attempted to lamp with gas whilst the wick was burning. The vapor arising from the gas ignited the fluid in the lamp which exploded, and the burning liquid caught her dress. She ran into the yard enveloped in flames, after some difficulty the fire was extinguished, but not till she was so severely burnt, that no hopes were entertained of recovery from the effects, and on the following day death put an end to her sufferings. She calmly and resigendly passed from this vale of sorrow to her home above. Mrs. Tatem was only sixteen years of age and leaves an affectionate husband, to whom she had been married but three months, and many relatives and friends, by whom she was believed for her many amiable qualities.—*Royal Gazette, Nov.* 6.

It is not our object, at this time, to go into a detailed explanation of Professor Holloway's theory of disease, but simply to inform the American people that one of the most remarkable men of this or any former age is among them, and that his medicines have a celebrity unprecedented in the annals of the world. There is no charlatanry in his pretensions. Unless all the civilized world are deceived, the Holloway's Pills and Ointment will drive disease from the human system, under the most unfavorable circumstances, and in all climes. Other men have sprung into an ephemeral notoriety by advertising their worthless nostrums. Like butterflies of the day they have buzzed for a while and then expired; both their names and their medicines have sunk into an obscurity from which they never emerged. Others have met with a limited success, perhaps as much as they deserved. No man, though he may have the wealth of Cœsus, can long deceive an intelligent people with a worthless remedy for disease. If health follows the administration of a remedy for diseases, almost without an exception, though it is prescribed in a million of instances, and in all forms of cases, and if millions on the globe could not make the people believe that it was not a good remedy, or that the inventor was not a public benefactor, and no empiric or charlatan. Professor Holloway's remedies occupy this position before the citizens of the world. The inventor is a man of enlarged powers of mind, who has seen disease in all its forms, and in all the climates of the world. His establishment in London was daily thronged with patients to such an extent, that a police force was necessary to be stationed at his door. But an office practice afforded too narrow a field for the exercise of his expansive intellect, and he determined to be the world's physician. All countries have had their celebrated physicians; England has had an Abernethy, France a Magendie, and America a Rush; but these men's ambition only extended to a practice confined to a narrow circle of friends and admirers, or the superintendency of a medical hospital. Professor Holloway has chosen the globe as a theatre for his practice and though now a resident of Republican America, he is prescribing daily for hundreds of thousands on the four quarters of the globe. His medicines are expressly designed to act on the organs whose functions are so essential to health. They operate on the stomach, liver, kidneys, lungs, and skin, restore their deranged functions or uses, and thus purify and cleanse the blood, the very fountains of life.—*New York Sunday Times.*

PROSPECTUS
OF THE
SCIENTIFIC AMERICAN
ELEVENTH YEAR.

The Proprietors of the Scientific American respectfully give notice, that the Eleventh Annual Volume of their Journal will commence on the 16th of September next.

THIS work differs materially from other publications, being an *Illustrated Periodical*, devoted chiefly to the promulgation of information relating to the various Mechanic and Chemic Arts, Industrial Manufactures, Agriculture, Patents, Inventions, Engineering, Millwork, and all interests which the light of Practical science is calculated to advance.

The Scientific American is printed once a week, in convenient quarto form for binding, and presents an elegant typographical appearance. Every number contains eight pages of reading, abundantly illustrated with original engravings. All the most valuable patented discoveries are delineated and described in its issues, so that, as respects inventions, it may be justly regarded as an Illustrated Repertory, where the inventor may learn, what has been done before him in the same field which he is exploring, and where he may bring to the world a knowledge of his own achievements.

Reports of U. S. Patents granted are also published every week, including Official Copies of the Patent Claims; these Claims are published in the Scientific American *in advance of all other papers.*

The Contributors to the *Scientific American* are among the most eminent, scientific, and practical men of the times. The Editorial Department is universally acknowledged to be conducted with great ability and to be distinguished, not only for the excellence and truthfulness of its discussions, but for the fearlessness with which error is combated and false theories are exploded.

Mechanics, Inventors, Engineers, Chemists, Manufacturers, Agriculturists, and people of every profession in life, will find the *Scientific American* to be a great value in their respective callings. Its counsels and suggestions will save them hundreds of dollars annually, besides affording them a continual source of knowledge, the experience of which is beyond pecuniary estimate.

Terms of Subscription, $2.00 a year, $1.00 for six months.

HASZARD & OWEN, Agents for P. E. Island.

Wanted

A T the Tannery of Mr. John Vickerson, a good Journeyman Currier; Also, two or three good Boot and Shoemakers. Call at this establishment, St. Peter's Road, 6½ miles from Charlottetown.

L. VICKERSON.

Charlottetown, July 27, 1855.

JUST RECEIVED, per Schr. 'SUPERB,' from Halifax, and for Sale at DODD'S BRICK STORE, a splendid

LOT OF TEA, SUGAR AND MOLASSES.

which will be Sold Wholesale and Retail.

THOMAS W. DODD.

Oct. 5.

TO LET with immediate possession, the southeast end of the House recently built on the corner of Great George and Kent Streets, and next to that occupied by Messrs. Gahan & Co.

The cellar is 24 feet by 30, has a substantial wall, is over 7 feet deep and is perfectly dry. There is on the first floor a shop 20 feet in front and 30 feet in depth; also a front Entrance, a Hall in rear of the shop and two other apartments. There are on the second floor one room 24 feet by 15, one 20 feet by 15 and two about 11 feet by 12, and the third floor nearly corresponds with the second. There are three rooms on the fourth flaor and a fine view of the Harbour, the Rivers and the Country round. There is also attached to the premises a new Warehouse and it is one of the best stands in this City for Mercantile or any other business. Further information may be obtained by applying to

THOMAS DAWSON.

July 14th, 1855.

FREEHOLD LAND

WM. E. CLARK.

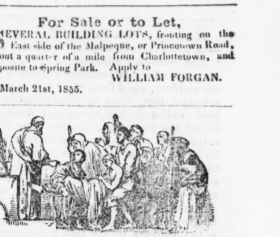
Charlottetown, 12th September, 1855. WIX

For Sale or to Let,

SEVERAL BUILDING LOTS, fronting on the East side of the Malpeque, or Princetown Road, about a quarter of a mile from Charlottetown, and opposite to Spring Park. Apply to

WILLIAM FORGAN.

March 21st, 1855.



Friend of the Prince Edward Islander.
HOLLOWAY'S OINTMENT.

EXTRAORDINARY CURE OF ASTHMA!!
OF AN OLD LADY SEVENTY FIVE YEARS OF AGE.

Copy of a Letter from Mr. Thomas Weston, (Book Store,) Toronto, dated the 9th October, 1854.

To Professor Holloway,

Sir,—Gratitude compels me to make known to you the extraordinary benefit an aged parent has derived from the use of your Pills. My mother was afflicted for upwards of four and twenty years with asthma and spitting of blood; it was quite agony to see her suffer and hear her cough; I have often declared, that I would give all I possessed to have her cured; but although I paid a large sum for medicine and advice, it was all to no purpose. About three months ago, I thought perhaps your Pills might benefit her; at all events I resolved to give them a trial, which I did; the result was marvellous: by slow degrees, my mother became better, and after persevering with your remedies for nine weeks, she was perfectly cured, and now enjoys the best of health, although seventy-five years old. I remain, Sir,

Your obliged,
(Signed) THOMAS WESTON.

REMARKABLE CURE OF DROPSY.
AFTER BEING TAPPED THREE TIMES.

Copy of a Letter form Anthony Smith, Esq Halifax, Nova Scotia, dated the 25th August, 185

To Professor Holloway,

Sir,—I desire to add my testimony to the value of your Pills, in cases of dropsy. For nine months I suffered the greatest torture with this distressing complaint; was tapped three times, and finally given up by the doctors; having become in appearance a mere skeleton, and with no more strength in me than a child just born. It was then, that I thought of trying your Pills, and immediately sent for a quantity, and commenced using them. The result I can scarcely credit myself, although true it is. After using them for four weeks, I felt much better, and by persevering with them, at the expiration of two months, I was completely cured. I have since enjoyed the best of health. I am, Sir,

Yours sincerely
(Signed) ANTHONY SMITH.

ASTONISHING CURE OF GENERAL DEBILITY AND LIVER COMPLAINT!!

Copy of a Letter from William Reeves, of Charlottetown, Prince Edward Island, dated 17th Nov. 1854.

To Professor Holloway,

Sir,—I am happy to say, that your Pills have restored me to health after suffering for nine years from the most intense general debility and languor, my liver and bowels were also much deranged for the whole of that time. I tried many medicines, but they were of no good to me, until I had recourse to your Pills, by taking which, and following the printed directions for seven weeks I was cured, after every other means failed to the astonishment of my neighbours, acquaintances, and friends. I shall ever feel grateful to you for this astonishing restoration to health, and will recommend your Pills to all sufferers, feeling it my duty so do.

I remain, Sir, your humble servant,
(Signed) WILLIAM REEVES.

These celebrated Pills are wonderfully efficacious in the following complaints.

Ague	Dropsy	Inflammation
Asthma	Dysentery	Jaundice
Bilious Complaints	Erysipelas	Liver Complaints
Blotches on the skin	Female Irregularities	Lumbago
