**DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE**  
ARE NOT a Pur-gative Medi-cine. They are a BLOOD BUILDING, Tonic and RECON-structor, as they supply in a condensed form the substances actually needed to en-rich the Blood, curing all diseases coming from Poor and War-rying Blood, or from VITATED HUMORS in the BLOOD, and also invigorate and BUILD UP the Blood and SYSTEM, when broken down by overwork, mental worry, disease, excesses and indiscre-tions. They have a SPECIFIC ACTION on the SEXUAL SYSTEM of both men and women, restoring LOST VIGOR and correcting all INDEBILITATES and SUPPRESSIONS.  
**EVERY MAN** Who finds his mental fac-ies dulled or failing, or his physical powers flagging, should take these PILLS. They will restore his lost energies, both physical and mental.  
**EVERY WOMAN** should take them. They cure all sup-pressions and irregularities, which inevitably result in weakness and disease.  
**YOUNG MEN** should take these PILLS. They will cure the re-sults of youthful bad habits, and strengthen the system.  
**YOUNG WOMEN** should take them. These PILLS will make them regular.  
For sale by all druggists, or will be sent upon receipt of price (50c. per box), by addressing  
**THE DR. WILLIAMS' MED. CO.**  
Brookville, Ont.

**McGILL UNIVERSITY, MONTREAL.**  
A SPECIAL ANNOUNCEMENT of the Faculty of Applied Science has been prepared, stating the details of the new Chairs, Laboratories, Workshops, Apparatus and other improvements in its several Depart-ments of Civil, Mining, Mechanical and Elec-trical Engineering and Practical Chemistry, which will afford in the Session of 1891-2 ad-vantages not hitherto accessible to Students in this country.  
Copies may be had on application to the undersigned, who can also supply detailed announcements of the other Faculties of the University, viz., Law, Medicine, Arts (in-cluding the Domestic Course for Women), and Veterinary Science.  
J. W. BRAKENRIDGE, B. C. L.,  
Acting Secretary.

### An Experiment.

Dr. Grensides says, in the course of his report of the Experimental Farm, Ontario: Last autumn a pure-bred Ayrshire cow seven years old was purchased and brought to the farm. Towards the spring, her attendant, finding she was not doing well, requested me to examine her, which I did. I made up my mind at once that she was the victim of "tuberculosis," and had her immediately isolated for further observa-tion. As she was milking at the time, and as there was an available calf, out of a Dur-ham grade cow by a pure-bred Polled-Angus bull, it occurred to me that it would be a good opportunity to test the transmissibility of tuberculosis, through the medium of the milk.

It is a point that has by no means been satisfactorily settled by observers. Authori-ties are almost unanimous in the belief that where the tubercular deposit involves the udder, there is the utmost danger to susceptible individuals consuming the milk from that udder; but many hold the view that if the mammary glands are not in-volved in the deposit, that the danger is slight. In this case the udder is perfectly healthy, hence the opportunity for an ex-periment was very favorable.

Our patient rapidly declined, in fact from the very first she presented the symptoms of a typical case of galloping consumption. We kept her for about one month, allowing the calf to suck her during this time. As she began to get pretty weak, we resolved to destroy her and make a post mortem for the benefit of the students. Upon opening her we found very extensive deposits of tubercles, both in the chest and abdomen, in fact, almost all the organs in these cavities were seriously involved.

The calf was put away by himself and fairly well fed and housed for seven months, when we killed and opened him. During this time he appeared healthy and thrived fairly well, his appetite being good and there was no cough.

I examined him, and took his tempera-ture occasionally, but found nothing abnor-mal. Upon opening him, however, we found widespread deposits of incipient tubercles. Both pleurae were dotted all over with small clusters of tubercles, and in the ab-domen the liver was spotted externally in a like manner, and also there was a good crop on the sheet of membrane—mesentery—that envelops the bowels, and suspends them to the roof of the abdomen.

In fact it was astonishing to observe the extent of the deposits, after having wit-nessed the apparently healthy state of the young animal during life.

It was consistent, however, with my past observations, that if the tubercular de-posits are not sufficiently extensive to in-terfere with the functions of important organs, there is no appreciable evidence of ill-health resulting from their presence. In order to make this experiment as complete as it might have been made, this calf should have been kept separate to avoid the chance of infection through the medium of the air, or food of the foster-mother, of which they would both partake from the same box. Unfortunately, however, this calf could not be got to drink milk from a pail, and if he had been let into the cow's box twice a day to suck, he would have been subjected to the same danger from the breath of the cow, or from her sputum, though in a less degree.

As a matter of fact, I think we are justified in assuming, that the milk was the medium of transmission in this case.

Although recognizing that there is some foundation for the theory of infection through the medium of the air, where healthy cattle are kept with tubercular ones, and also from feeding out of the same manger, still con-cluding from my own experience, I am of the opinion that the danger is slight when com-pared with that of consuming the milk from a tubercular subject.

Both the sire and the calf are said to be healthy.

It is pretty generally recognized now that human and bovine "tuberculosis" are one and the same disease; hence the necessity for caution in using the milk from a cow, in which there is any suspicion of "tuberculosis," for it would appear that it is just as liable to be transmitted to the human being as to young bovines in this way.

### A Weak Foal.

In his report concerning the Experi-mental Farm, Ontario, Dr. Grensides re-marks:

A mare that works in the garden dropped a foal that was somewhat weak. Her sup-ply of milk was small, and it did not ap-pear to be properly constituted, as the foal took to souring profusely, which we could not arrest, until we fed the young animal on cow's milk, and withheld the mother's.

However, it did not gain in strength and could not get on its feet without being lifted, and soon became a victim to that bane of colt flesh called "Joint Ill," so that we considered it more humane to put it out of its suffering, as there seemed little chance of its ultimate recovery in the face of such discouraging complications.

The year before the mare dropped a fine, strong, healthy foal that never ailed a day—a full sister to the one that died—and nearly everyone that saw the mare prophesied that her foal would not do well, as she was so very fleshy. This year she was very decidedly lower in flesh, and, as I have ex-plained, had ill-luck with her foal.

This is some evidence that a high state of flesh is not always to be assigned as a cause of ill-success in breeding; although there is no doubt that moderate condition is more favorable in the majority of in-stances.

We are bound to keep up our record for cheap crockery. We believe that we have a piece of glass or crockeryware for every man, woman and child on P. E. Island, at the Cheapest Crockery Store.—W. P. Colwill.

**Dyspepticure**—Is not a palliative, but a cure; it first relieves, then controls, and finally entirely subdues the irritation and in-flammation of the stomach that causes indigestion and dyspepsia.

### Cheese Making

Under date of May 23rd, D. Collins, Esq., a former resident of P. E. I., but now of Clyman, Dodge Co., Wis., writing to a friend says:

"In THE EXAMINER of the 15th inst. I noticed that the subject of cheese making on P. E. I. is being discussed, and very wisely, too, I think. I have had some ex-perience in handling milk in cheese fac-tories since 1882, and perhaps my expe-rience may be of some benefit to some of my old acquaintances on the Island who may be engaged in agricultural pursuits. We generally begin cheese making about the 1st of May. In 1882 cheese sold for 7 cents a lb., and the cost of making it was 1 1/2 cents a lb. The proceeds from seven cows that year amounted to \$154.39. I still continue taking milk to the factory, in which I am now a stockholder. From ten cows last year the proceeds in cheese were \$200, or an average of \$20 a cow. It takes about 10 lbs. milk for 1 lb. of cheese. We make American cheese and brick cheese, the latter in size and shape like a brick, hence its name, and also Switzer cheese for saloons, which is more ex-pensive. The factories pay from 75 cents to \$1 for 100 lbs. milk. Cheese makers get from \$50 to \$60 per month. There are over a dozen cheese factories in this town of six miles square. Farmers bring their milk in morning and evening to the fac-tories. It takes about half an hour to ex-tract the cream from the milk. This is done by a cream extractor, which is a great improvement on the old style of doing things. Cheese making pays better than butter making, and the sooner its manu-facture is undertaken on P. E. Island the better. I would like to see some of your young men visiting us, as they could learn the art of cheese making in less than a season. In some things we could not learn them anything, but in cheese making I feel confident we could."

**In Prison 35 Years.**  
STORY OF TWO ENGLISHMEN WHO SUFFERED FOR ANOTHER MAN'S CRIME.

Two gray-haired men arrived at Chicago from New York on Tuesday night. They were very feeble, and a glance told that they were foreigners. They were George and Lloyd Beatty, twin brothers, 71 years old, from Birmingham, England. Both men have spent the last 35 years of their lives in Millbank prison. They are now on their way to a son and nephew who lives in Pueblo, Col.

The story which they told shows the un-certainty of circumstantial evidence. Ac-cording to their story, they were arrested 35 years ago last November, charged with the murder of a neighbor with whom they were known to have had trouble. Both men protested their innocence, but as they were alone and could produce no witnesses to prove an alibi, their story was not be-lieved. They were convicted and sen-tenced to imprisonment for life. Lloyd was unmarried, but George had a wife and a son 13 years of age. The wife died of a broken heart within three years after her husband's imprisonment. Albert, the son, came to America soon after his mother's death to free himself of the odium of being the son of a murderer, which clung to him as long as he remained in the neighborhood where he was known. The two brothers served in prison at hard labor, suffering not only from the loss of their freedom, but also from the knowledge of their innocence. On April 28th, last, a convict named Churchill, who was serving a 10 year term in the same prison with them, died from consumption. On his death bed he confessed having committed the murder for which the Beatty brothers were suffering a living death. The officials made the necessary investigation. The dying con-vict's story was found to be true. They were released and came to America to spend the rest of their ruined lives with the son and nephew.

**Prof. Melville E. Anderson.**  
THE MAN CHOSEN FOR ASSOCIATE PROFESSOR OF ENGLISH LITERATURE IN LELAND STANFORD UNIVERSITY.

Bloomington, Ind., May 7.—(Special.)—Prof. Melville E. Anderson, of Iowa City, Iowa, to-day wired Dr. David S. Jordan, President of Leland Stanford Junior Uni-versity, his acceptance of the chair of Associate Professor of English Literature in the Stanford University, at Palo Alto, California.  
Prof. Anderson is eminent in his specialty. He is forty years old; a native of Nova Scotia; sometime resident at Oregon; student at Cornell University of Göttingen; has held several professorships in English literature in Cornell, Yale, and Stanford Universities, and Knox College, is the author of an English trans-lation of Victor Hugo's Shakespeare, and of McClurg's series of publications on French Literature, and has held for four years the Professorship of English Literature in the University of Iowa.  
The above named Prof. Anderson is the eldest son of the late Rev. Dr. Edward C. Anderson, who was a native of this Island, having been born at North Lake, Lot 47, where a number of his relatives still reside.

FOR OVER FIFTY YEARS Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best-known remedy for diarrhea, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind.

### SHIP NEWS.

**ENTERED.**  
June 1—Asta, Gunderson, Liverpool; Lochiel, Smith, Buctouche; Minnow, Breen, do; Samuel Ober, Wade, Newcastle, N B; Rustic, Lowrie, Pictou; Grenada, McIntosh, St Peter's, C.B. Minnie R, McMillan, Pictou; Morning Light, Richards, Baddeck; Quartette, Mosher, Sydney; Harvest Home, Langill, Pictou; Charlie, Malone, Alberton. June 2—J H Hiltz, Davis, Pictou; Ocean Bride, Boudreau, do; Rising Dawn, Praught, do.

**CLEARED.**  
June 1—Lochiel, Smith, Buctouche; Minnow, Breen, do; Grenada, McIntosh, Cocagne; Minnie R, McMillan, Belle Creek; Harvest Home, Langill, Pictou; Harry Mathers, Power, Pictou. June 2—J H Hiltz, Davis, Pictou.

**SCOTT'S EMULSION**  
DOES CURE CONSUMPTION  
In its First Stages.  
Palatable as Milk.  
Be sure you get the genuine in Salmon color wrapper; sold by all Druggists, at 50c. and \$1.00.  
SCOTT & BOWNE, Belleville.

**SHERWOOD FARM FOR SALE.**  
BEAUTIFULLY situated on the Royalty Road, fronting on the Malpeque Road, and running back to Sherwood Cemetery. This Farm, containing about 60 acres, is in a high state of cultivation. Commodious and comfortable buildings, with a first-class orchard, make this a very desirable property. This Farm is only three and a half miles from Charlottetown. For particulars apply on the premises to  
SARAH STEWART,  
Administratrix.  
may29—dy law & wy 3m pd

**DYSPEPTICURE**  
OF WONDROUS REMEDY.  
THOUSANDS of bottles of DYSPEPTICURE have been sold during the past few years without any advertising whatever. It easily overcomes indigestion, and POSITIVELY CURES the worst cases of Chronic Dyspepsia; this quality of curing the disease explains its large and spreading sale without having been brought prominently before the public.  
**THE PAMPHLET**  
(Copyrighted.)  
on DYSPEPTICURE gives the results of many years study on Diet and the Diseases of Digestion. All interested in these subjects, Chronic Dyspepsia especially, should read this little book; it is wrapped about each bottle of the remedy, or will be promptly mailed free to any address.  
**DYSPEPTICURE**  
Is sold by all Druggists—Sample Size 35 cts.; Large Bottles \$1.00. Those who cannot get it easily will receive a large bottle by mail, all expenses prepaid, on sending \$1.00 by registered letter or P. O. Order to the maker, Charles K. Short, Pharmacist, St. John, N. B.  
P. S.—DYSPEPTICURE is being daily sent with safety to the remotest parts of Canada and the United States in a special mailing package.

**The Prince Edward Island Electric Co.**  
THE adjourned Annual General Meeting of this Company will be held at their Office in Charlottetown, at Twelve o'clock, noon, on WEDNESDAY, 10th day of June next, A. D. 1891.  
Dated this 23th day of May, 1891.  
JAMES WADDELL,  
Superintendent.  
may29—eod

**1891 -- MUSIC -- 1891.**  
Look! Look Here!  
Only \$60--ORGAN--Only \$60.

WE will send to any part of Canada one of our superior CABINET ORGANS, solid walnut case, containing two full sets of good powerful reeds. Organ has 8 stops and all the latest improvements.
