Prescription For A Profit: A Guardian Want Ad - Call 8506

IN MEMORIAM

MACLEAN — ... loving memory of my dear wife, Beatrice Campbell MacLean who passed away at her home in Ottawa on October 24th, 1955.

"'Tis human fortune's happiest height to be,
A spirit melodious, lucid, poised and whole;
Second in order of felicity
To walk with such a soul."

Ever remembered by her husband.

MUTTART — In loving memory of Mrs. L. Muttart, Carleton who departed this life, October 24th, 1952.

We look back, with tender memories
On the path which once we trod,
And for the years we spent together.
We give our thanks to God.

Always remembered by her family.

CARD OF THANKS

The family of the late Mrs. Fred White wish to thank their many friends who helped in so many ways, also the people who sent cards, letters and floral tributes, which were deeply appreciated.

Says Canada Is Envy Of World

SAINT JOHN, N. B. (CP)—Alex Hill of Toronto, president of Atlantic Sugar Refineries Ltd., said here Monday that Canada's present economy and future prospects are "the envy of the world"

Mr. Hill, here to open new refinery facilities Thursday, said in an interview "the huge expansion taking place and plans already announced for the expansion of our basic resources are the envy of the world."

He predicted "economic barriers" temporarily overshadowing "the progressive development of regions where the potential is available. . . Most certainly will be dissolved in the promising days ahead."

Concerned Over Canadian Ban On Citrus Fruit Color

WASHINGTON (AP) — Florida citrus representatives said Thursday they were told the state department will "explore every possibility to try to help us" get Canada to lift its ban on the the addition of color to citrus fruit.

Meeting with state department officials for nearly two hours were J. Hardin Peterson, Lakeland lawyer representing Florida citrus organizations, and Frank Schell of Tampa. Schell invented a process for improving the color of orange peel through use of a coal tar derivative.

Peterson said the main purpose of the conference was to give the department a detailed background on conditions surrounding the ban which went into effect Oct. 1.

Military Junta Takes Over

WASHINGTON (AP)—The state department said it has been advised a military junta took over the government of Honduras Sunday.

The department said it understood a military group had received the executive power from President Julio Lozano, 71, whose two-year administration has been marked by political turmoil.

The department said there had been no report of violence.

Lozano assumed the title of chief of state in 1954 when Congress, called upon to select a president, refused to take action. None of the candidates in that election had obtained 50 per cent of the vote as required by the constitution.

LINER DAMAGED

LE HAVRE, France (AP)—The French liner Ile de France arrived from New York Saturday 12 hours behind schedule, her superstructure damaged by a violent storm.

Agents Wanted

Farm Federation Suggests Cut In Some Steel Tariff

OTTAWA (CP)—The Canadian Federation of Agriculture suggested Tuesday that Canada's steel makers, rather than needing higher tariff protection, might be able to stand lower duties on some items.

"The tremendous growth and strength of the (steel) industry leads us to believe that the industry does not need any fnturerr over-all protection," the federation said in a brief presented to the closing tariff board hearing on its assignment to revise the 50-year-old steel tariff.

"In fact," the federation added, "it is very likely that there are a number of steel tariff items in which the measure of protection could very well be lowered without any damage to the industry."

WANT INCENTIVE

D. S. Holbrook, president of Algoma Steel Corporation, reiterated the steel producers' stand that they need higher tariff protection as incentive to further expand their production facilities so that more of Canada's steel requirements can be filled by the Canadian industry.

The tariff boosts sought by the steel industry would just about double the duty on most steel items coming into Canada.

Tuesday was the final public sitting. The board began its hearings on the case about a year ago and is expected to make its report to Finance Minister Harris by the end of the year.

The United Steelworkers of America, through their assistant research director Harry Waisglass of Toronto, said that while they share their employers' long-term objective of producing more steel in Canada, they take the broader view of the consumer.

They felt any action that would restrict the present short supply of steel would certainly restrict neeeded expansion in Canada.

For some reason—perhaps because it is more profitable to do so—the Canadian steel industry consistently under - estimates the demand of the market in Canada, Mr. Waisglass said. The steel makers certainly did not require any more "incentive" to expand than they now enjoy. There was room for many more steel mills in Canada.

SAYS INDUSTRY SUCCESSFUL

Mr. Holbrook said the Canadian industry is not interested in fostering a steel shortage. With a reasonable assurance that "our legs won't be shot out from under us" the industry would look to producing items it does not at present urn out.

Dr. E. C. Hope, agriculture federation economist presenting the CFA brief, said the original intention of the steel tariff 50 years ago was "mainly to foster an infant basic iron and steel industry in Canada."

That policy had been so successful that the industry had grown to be one of Canada's major industries today.

The federation agreed with the steel industry that the tariff needs to be simplified and brought up to date. But "we suggest that n prooof has been brought forward that the industry cannot look forward to a continuation of these trends (of expansion) under present tariff protection."

Four Years For Attempted Murder

KENTVILLE, N.S. (CP)— Hugh Scholfield, 33, of nearby Highbury, was sentenced Thursday to four years in Dorchester Penitentiary for attempted murder of a New Minas, N.S., woman.

The father of seven children was also sentenced to a concurrent three year term for indecently assaulting Mrs. William Milligan, 29, the wife of his former employer.

Scholfield was convicted of entering the Milligan home near mid night Aug. 16, stirking Mrs. Milligan with a bottle and forcing her to leave her home.

Exporters Are Concerned At Unbalance Of Trade With U.S.

By FORBES RHUDE
Canadian Press Business Editor

SEIGNIORY CLUB, Que. (CP) —The Canadian Exporters' Association, if it passes a resolution now before it, will try to tie Canadian - American negotiations on hydro-electric power to negotiations on trade.

The idea is to withhold from the United States something she may want in the way of power unless she grants something that Canada wants in the way of trade. At the same time, Canada wouldn't surrender any power to which she may be entitled.

What Canada wants in the way of trade, as indiacted in the resolution, is alleviation of a situation in which she is this year buying $1,000,000,000 more in goods from the United States than the United States is buying from her.

To this end, the resolution asks free entry into the United States of Canadian natural poruducts, and possibly others, and assurance that barriers won't be raised against them.

The Canadian government would be asked to refrain from approving power works which would flood Canadian territory and which would affect future generation of power in Canada, unless:

BARS OFF FOR GOOD

(1) The United States Congress agrees to remove permanently tariff or other import obstacles to Canadian primary metals, minerals, oil, gas, lumber, pulp and paper and agricultural products, as well as other products which can be produced efficiently for use of consumption in the United States;

(2) That an equitable portion of power generated in the United States as a result of such agreements be made available to Canadians wishing to use it.

The resolution was presented Monday to the opening session of the exporters' three-day annual meeting by its 2-man policy committee.

It was not discussed and decision on it won't be made until Wednesday.

Without saying so, it took cognizance of the fact that power matters, especially in British Columbia, rank high in current and probably future Canadian-American relations.

Just possibly the resolution may have a secondary, if not a primary aim, of drawing more widespread American public attention to the unbalanced Canadian-American trade picture.

Possible Cure For Hardening Of The Arteries

MONTREAL (CP) — A team of Queen's University researchers have uncovered a clue to the cause and possible cure of hardening of the arteries, it was disclosed Thursday at the 20th annual meeting of the Canadian Physiological Society.

The results of experiments indicate that a diet high in animal fat content is associated with hardening of the arteries which in turn leads to heart, brain and kidney diseases common among the elderly.

A report on the results—prepared by Drs. J. M. R. Beveridge, W. F. Connell and G. A. Mayer, all of the university's medical faculty, will be submitted to the meeting today.

The doctors say they have isolated from butter fat a substance which may be responsible for the initial stages of atherosclerosis—hardening of the arteries—and have evidence that diets containing corn oil tend to correct the condition.

The experiments involved "the feeding of controlled diets of accurately known composition to over 200 healthy volunteers."

KILLED ON HIGHWAY

CHATHAM, N.B. (CP - Arthur Herrell, 15, of Rogersville, was killed Saturday night when hit by a car driven by Patrick Phillip Chiasson, on the Canadian navy at Halifax
