Crapaud Cheese Factory.

We learn that farmers in Crapaud, Tryon and adjoining settlements are uniting, under an act of incorporation passed some years ago, for the purpose of establishing a creamery. An application endorsed by the Western Agricultural Convention, has been made to the Dairy Commissioner, Professor Robertson, who has courteously acknowledged its receipt and promised to give the matter his careful consideration. There is a fair prospect of obtaining the milk from three to four hundred cows; and as the locality is one of the wealthiest and most progressive sections of the Province, it is one of the most suitable for the purpose of the establishment of an experimental creamery station. Many of the farmers promoting the enterprise own large herds of well-bred cattle. One of them, Mr. John Moore, has twenty milk cows, principally Jersey grades. An abundance of milk is assured. We are pleased to note this evidence that our farmers are determined to keep abreast of the times.

Scrofula often shows itself in early life and is characterized by swellings, abscesses, hip disease, etc. Consumption is scrofula of the lungs. In this class of disease Scott's Emulsion is unquestionably the most reliable medicine.

THE MONCTON TRAGEDY.—An inquest was held at Moncton on Friday, in view of the body of Geo. L. Edgett, who was killed on the railway track at that place the previous day. The train hands and those who picked the deceased up were examined, after which the jury returned a verdict that the deceased came to his death by being struck by the English mail special train, and no blame can be attached to the train hands.
