THE DAILY EXAMINER

SEPTEMBER 27, 1897.

NEWS NOTES.

A German torpedo boat recently capsized and sunk off Cuxhaven, and eight of the crew were drowned.

The steamer Ika, with a crew of ten and carrying fifty Austrian passengers, was sunk in a collision on Tuesday evening as she was entering the port of Flume, and most of her passengers were drowned in full sight of thousands of people on the pier.

It is feared that no further advance will be made at present by the Anglo-Egyptian expedition up the Nile. An attack on Khartoum would require a strong backing of British troops, and owing to the Indian troubles the War Office cannot send such a force to Egypt.

The fighting at Camp Nawagai on Monday night was so fast and furious that in the attack on the British square by the followers of the Haddaj Mullah some of the tribesmen were forced within a few yards of the muzzles of the mountain guns.

General Bourbaki, who was in command of the Imperial Guards at Metz during the Franco-Prussian war, is dead.

Drouaini, the king of Benin, who has been on trial at Benin City, since August 15th, last, with a number of leading chiefs charged with being concerned in the massacre of an unguarded expedition, under British Consul Philips, has been condemned and transported to Calabar, a slave settlement of British West Africa.

The Paris Liberaire has been seized by the police for publishing an article advocating the assassination of President Faure, King Humbert and the Queen Regent of Spain.

Constitution and Guerriere.

The Constitution's guns were double-shotted with round and grape. The broadside was as one single explosion, and the destruction was terrific. The enemy's decks were flooded, and the blood ran out of the scuppers—her cockpit filled with the wounded. For a few minutes, shrouded in smoke, they fought at the distance of half pistol shot. In that short time the Englishman was literally torn to pieces in hull, spars, sails and rigging. As her mizzenmast gave way the Englishman brought up to the wind, and the Constitution slowly forged ahead, fired again, luffed short round the quarter's bows and, owing to a heavy sea, fell foul of her antagonist, with her bowsprit across her larboard quarter. While in this position Hull's cabin was set on fire by the enemy's forward battery, and part of the crew were called away from the guns to extinguish the threatening blaze. — Barnes' "Naval Actions of the War of 1812."

Gene Over to Bacon.

"I believe," said the funny boarder, "that the landlady has been won over to the anti-Shakespeare crowd." "Will you please elucidate?" asked the long armed. "Well, she gives us bacon for breakfast every morning now, you will note." — Philadelphia North American.

Fifty Years Ago.

President Polk in the White House chair, while in Lowell was Doctor Ayer; Both were busy for human weal. One to govern and one to heal. And, as a president's power of will Sometimes depends on a liver-pill, Mr. Polk took Ayer's Pills I trow For his liver, 50 years ago.

Ayer's Cathartic Pills

were designed to supply a model purgative to people who had so long injured themselves with griping medicines. Being carefully prepared and their ingredients adjusted to the exact necessities of the bowels and liver, their popularity was instantaneous. That this popularity has been maintained is well marked in the medal awarded these pills at the World's Fair 1893.

50 Years of Cure

SUPPOSE.

Suppose, my dear, that you were I. And by your side your sweetheart sat. Suppose you noticed by and by The distance 'twixt you was too great. Now tell me, dear, what would you do? I know, and so do you!

And then, so comfortably placed, Suppose you only grew aware That that dear, dainty little waist Of hers looked very lonely there. Pray tell me, sooth, what would you do? I know, and so do you!

Then, having done what I just did, With not a frown to check or chill, Suppose her red lips seemed to bid Adiance to your lordly will! Oh, tell me, sweet, what would you do? I know, and so do you!

—Pearson's Weekly.

A TOOTHBRUSH FOR KOKO.

Costly Toilet Articles Purchased by Rich Girls For Their Pet Dogs.

A score or more of dainty toilet articles, gold mounted and jeweled, were scattered over the glass counter, and the obliging clerk in the fashionable shop was vainly endeavoring to satisfy the whims of a daughter of wealth, who had every appearance of having been spoiled by overindulgence. She had a costly toothbrush in her hand and was poking the other articles with it in a dissatisfied way. "This is not small enough," she said, "and the hair is not fine enough."

"It is our very best grade of goods," suggested the clerk half apologetically. "Then you ought to get something better. Yes, really, you ought," exclaimed the willful customer. "I can't take such a clumsy toothbrush as that home to my Koko."

"Ah!" murmured the clerk, with a scarcely perceptible air of impatience. "Then you want a toothbrush for your dog."

"Yes, of course I do, and I want something very soft and very dainty," replied the young woman. And, after a pause, she added, with an affectionate purr, "There isn't anything too nice for my Koko."

"Certainly not," responded the clerk, with a cordial smile. "Here are some brushes of rare quality. I had overlooked them. Here is one with hair as soft as silk and a handle of solid gold." The girl fondled the expensive trinket for a moment, and, without asking the price, said, "That will do. Have it sent with the other things, please." When this spoiled maiden's father gets a bill from the fashionable jeweler, he will doubtless be moved to emotion by the entry, "One toothbrush for dog, \$22.50."

It is no uncommon thing for shopkeepers in New York to be called upon to supply toilet articles for dogs, monkeys, birds and other domestic pets. Some stores maintain special lines of combs and brushes for pet dogs, and as a special concession to the enthusiasm of the fair owners of these pets the prices of dog combs and brushes are kept aristocratically high.—New York Times.

The Blackguards of Malaga.

Besides my man Mohammed there were several other Arab passengers aboard, and the appearance of these, as they leaned over the bulwarks of the steamer, was the signal for a shout of derisive laughter, curses and stone throwing on the part of the crowd of ill fed and ill conditioned boys who thronged the quay. For downright blackguardism nothing can beat the type of the youth of Malaga, whose expression, like their morals, is of as debased a type as could well be imagined. Howls of filthy language greeted the appearance of the Moors, who, had they disembarked, would have run a great risk of being torn to pieces, so great is the antipathy of the Spaniards to their former conquerors. The captain of the steamer, appealed to the police, but the two representatives of this noble body were busily employed in stealing figs from the cargo and paid little or no attention to the fact that an infuriated crowd of the worst characters of Malaga—that is to say, the worst in the world—were pelting the steamer with stones and mud. Affairs, however, reached a climax when one of the Moors, who spoke Spanish, asked after the health of General Margallo, the general who had been killed before Melilla, and then the captain was obliged to order them below, though the ill conditioned crowd hooted and jeered until at sunset the steamer left.—Harris' "From Batum to Bagdad."

Millions of Frogs Rain Down. One of the most curious phenomena of nature is the precipitation of frogs, fish, crabs, angleworms, etc., with rain from the clouds. The story is told in the annals of the French academy and may be found in the August number, 1804. The narrative is by one Professor Pontus. In it he gives an account of an instance of millions of frogs which fell in a shower near Toulouse. He states that he himself saw numerous young frogs on the coats of two gentlemen who were out in the shower. Professor Pontus says that he "forthwith repaired to the spot where the storm had burst and found the roads and fields literally alive with young frogs and tadpoles." "In some places," says the professor, "they were three or four deep all over the ground, and the hoofs of the horses and the carriage wheels killed thousands of them."

Economy and Morals.

Wife—John, don't you think you better give up trying to shave yourself and go back to the barber? Husband—Why, of course not. See how much I save every month. Wife—Yes, I know that, but then Willie is always around when you shave, and he is learning so many bad words.—Ohio State Journal.

The greatest of all luxuries in central Africa is salt. To say that a man eats salt with his victuals is the same as saying that he is a rich man. Mungo Park says, "The long continued use of vegetable food creates so painful a longing for salt that the natives will travel hundreds of miles to reach a salt lick."

THE NOSE AND THE TOES.

A Physical Culturist Says Pigeon-toed People Have Crooked Noses.

A professor of physical culture announces that he has discovered an intimate connection between deformities of the nose and the position of the feet.

His name is H. L. Piner, and he communicates his observations to the New York Journal.

"You can tell a pigeon-toed person without looking at his feet or seeing him walk. The discovery was made by me in 1891 while teaching physical culture. I found a stubborn awkwardness in the movements of my pupils' feet. Looking for the cause, I found that many of them were pigeon-toed. In others one foot was correct and the other turned in.

"In teaching correct breathing I had to investigate the condition of the nasal passages. Then I found that wherever the person was pigeon-toed in the right foot the right nostril was stopped up or otherwise deformed. It was the same with the left foot or nostril. If both nostrils were defective, both feet were pigeon-toed.

At one time I examined 25 persons, and every one of them was pigeon-toed in the left foot, with a corresponding defect in the left nostril. At another time I examined over 40 with a view to testing my discovery. Some of them had well developed nostrils and were not at all pigeon-toed. Some had overwide nostrils, with overwide angles at the feet to correspond.

"Girls I found more generally and worse pigeon-toed than boys. The person who has a whining or snuffling voice is usually pigeon-toed.

"Another discovery is that with the defective nostrils were found invariably stooped shoulders and hollow chests, the stoop and hollow always bearing a direct ratio with the defect. In extreme cases there was an ugly protrusion of the abdomen, a tendency to draw back and upward the upper lip, exposing the teeth, that have also an unsightly protruding tendency.

"Tell your friend to walk from you. Watch his feet. If the left turns in, tell him that his left nostril is smaller than the right. That is, that he can take more air at any given inspiration through the right than through the left nostril alone. If the right foot turns in, tell him his right nostril is the smaller.

"Conversely, tell him to place the end of the thumb under and against the nostrils alternately, breathing through the open one each time, and ask him which nostril admits the greater amount of air. If it is the left, tell him he is pigeon-toed in the right foot and vice versa. Demonstrate by having him walk naturally.

"Remember that the proper angle is 80 degrees on either side of the median line, or 60 degrees with both feet. Do not close the nostril from the side, but gently from underneath."

Poisoned Blood Malaria

These come from poisonous miasms arising from low marshy land and from decaying vegetable matter, which, breathed into the lungs, enter and poison the blood. Keep the blood pure by taking Hood's Sarsaparilla and there will be little danger from malaria. The millions take Hood's Sarsaparilla.

The Best—in fact the One True Blood Purifier. Hood's Pills cure nausea, indigestion, biliousness. Price 25c.

Strawberry Plants.

Strawberry Plants, ready for delivery Address FRANK BOYER, Box 34, Charlottetown, P. E. I.

NOT THE WAY IT WAS.

Things Had Not Changed at All Since He Was Young.

Three young men were sitting together in the rotunda of one of the big hotels. They were discussing the progress of invention.

"It's strange," said one, "how completely old ways of doing things have been superseded. You may talk about its being hard to introduce inventions, but if a scheme is any good it'll be universally adopted nowadays in no time. Why, you'll find even middle aged men who remember when everything in use was different. There's hardly a thing now that's done the same way or by the same appliances as it was when they were young. Why, my uncle can remember the time when every kind of goods was made by hand, and he isn't very old either. It's laughable to hear him tell how they used to get along. Everything, it seems, was done about the slowest and hardest way on earth. People need to think that they were in the world to work, and it didn't make much difference what they were at. I tell you, boys, you don't appreciate what it is to live in these days."

At this juncture a man with entirely gray hair folded his paper preparatory to departing and looked at the crowd near him. One of them, observing him, ventured to ask what he thought about it.

"Pretty nearly right, I guess," he said.

"Now, I suppose," began another, "you can remember when the horse car was the only known method of metropolitan conveyance, when bicycles were a thing to come, when telephones were an experiment, when they didn't make any ice in July, when most of the steel in buildings was in the door locks, when newspapers printed two sheets and thought them heavy, when fountain pens were an undisturbed dream, when aluminum was a theory and when harvesters were beginning to be talked about."

"No," returned the person addressed. "I'd like to agree with you, but I can't do it. The facts are otherwise. When I was a young man, business men used typewriters. A good many were thinking about putting in a phonograph. People who didn't own any bicycles or feel like paying for a cab usually traveled around town in a cable or electric car. Telephones cost 10 cents a try just as they do now, unless you knew somebody you could sponge on. Airships would go up and come down pretty much as they do now. The Sunday papers were so full of ads. that it took till Monday to find anything to read. Smoke consumers were making Chicago a beautiful place to live in."

The gathering was now looking incredulous. Things seemed to need an explanation. So he concluded: "You see, I got this gray hair trying to make a soda water manufactory pay in Kansas. Then a beard will add a few years. I was 27 last March."—Chicago Times-Herald.
