

The Printer Boy.

About the year 1725, an American boy some nineteen years old found himself in London...

"Where are you from?" inquired the foreman. "America," was the answer.

"Ah," said the foreman, "from America! a lad from America seeking employment as a printer! Well, do you really understand the art of printing? Can you set type?"

The young man stepped to one of the cases, and in a brief space set up the following passage from the first chapter of John...

A New Washington Beauty.

There is a new beauty in society this season, over whom all are raving. She comes from the land of Mrs. Langtry...

Reduction of Wages.

It is very probable that Mr. Beecher's salary will be cut down from \$20,000 to \$15,000. Many members of Plymouth Church advocate its curtailment to \$10,000.

Telephonic conversation has been held between St. Petersburg and Bologna, a distance of 2,465 miles, the Blake transmitting and the Bell receiving instruments being used.

Charlotte, Nov. 14, 1884. MORRIS & IRELAND'S

NEW IMPROVED PATENT EIGHT-FLANGE FIRE-PROOF SAFE.

THE only Eight-Flange Safe in the world, and containing more improvements than ANY SAFE made, such as:

1st. THE PATENT INSIDE BOLT WORK, which is placing the bolt work with the whole of the flange (six inches) between it and the outside, that is, as far from the fire and thief as it can be.

2nd. THE PATENT HINGED CAP—the back plate of the door being on hinges, enabling the owner, by turning a thumb-screw, to have easy access to the lock and bolt-work. He can thus easily change the lock, clean, oil, and keep the bolt-work in good order.

3rd. IRON INSIDE LINING, stronger than wood, and which retains the moisture in the flange for an indefinite time. Wood is thicker and weaker, and after a few years absorbs the moisture and "requires filling over again."

4th. FOUR WHEEL COMBINATION LOCKS, the simplest, strongest, most efficient and easiest to change of any in use.

5th. SOLID ANGLE IRON FRONTS, BACKS AND CORNERS, which prevents warping or injury to safe from falling, or falling walls or timbers.

6th. EIGHT FLANGES—the most important improvement ever made in fire-proof safes, providing eight laps, thus preventing the passage of heat, it having to pass over twelve inches, no injury arises from this source, as in other safes containing one, two or three flanges.

THESE SAFES have stood the test of years, and the greatest fires in this continent, and have the CHAMPION RECORD in the Boston, Chicago and Haverhill Fires.

We are selling these safes as low as any good safe, and are disposing of large numbers throughout the Dominion.

ELECTRIC GLOSS

FOR cleaning Solid Silver, Nickel, Brass, Copper and Plate Glass. Quick! Sure! Permanent! No dirt, no trouble, no labor being entirely free from grit and acids, it cannot injure the most highly finished surface. It is the only preparation ever produced that will polish brass or copper without the use of acid. Nothing approaches it for removing grease and finger marks from Brass, Copper, Glass, etc.; while for cleaning Nickel or Stoves it is especially useful. Retail price, 25 cents per bottle.

MICA WASH.—This wash is the only thing of the kind ever invented. A stove may be as handsome as a jewel and shine like ebony; but smoked mica lights will spoil it all. Day by day mica becomes scarier and higher in price, and an article that will clean and preserve it is valuable to all concerned. Try this wash once, and you will always use it. Retail price, 25 cents per bottle.

The above household necessities are manufactured by The Electric Gloss Co., Philadelphia U. S. A., and sold by every respectable Drug gist, Stove Dealer, Hardware Merchant and General Dealer in Canada. The Canadian trade supplied by
