ENTERPRISE AT SUMMERSIDE

The launch of the fine Brig "Charles" from the shipyard of John LeFurgey, Esquire, at Summerside, a few days since, is suggestive of a comparison which we trust will not be odious to the lieges of the metropolitan city, however much they may feel the contrast between the whilom din of the mallet and the now comparatively silent scenes of labor whence, in days of yore, the creations of the skill of the naval architects of Charlottetown were sent forth as white winged messengers connecting our Island with civilization, European or American.

We must admit that, in view of the torpor which characterises shipbuilding operations in our midst, we were not prepared to receive the intelligence which has been furnished by a correspondent from Summerside, who informs us that the number of vessels in the course of construction at that place and its immediate vicinity may be counted as follows.

We merely premise that the "Charles," to which vessel special allusion has been made, was, having been built under the inspection of Lloyd's agent, classed for four years.

It cannot fail to impress the minds of the Charlottetownians and the other *esoteric* inhabitants of the Island with a sense of the growing importance of this section of the country when they shall be informed that Summerside can now show, in her shipyards, or that contracts have been entered into for the construction, at that place, of some score of vessels.

In this connection we may mention that Mr. Strong is building 1, Mr. Mallet, 1; C. Green, Esq., 1; D. Ramsay, 1; J. LeFurgey, Esq., 2; C. McLennan, Esq., M. P. P., 1; A. Grady, 1; R. Hunt, Esq., 1; Mr. Humphrey, 1; J. Campbell, Esq., 2; J. Grady, 1; Mr. Montgomery, 1; Mr. Bell, 1; Messrs. Pope and McNeill, 3. One of the latter will measure some 800 tons.

Those statistics will afford some data by which the progress of this part of the Island, relatively to other portions, may be referred, on principles analogous to those in physical science, whereby we determine our rate of locomotion, as hurried through space, we observe that except ourselves and our immediate surroundings, the rest of the world does nothing, and appears therewith content.

By the English Mail of Wednesday last, we learn that his Excellency George Dundas, Esq., our worthy Lieut. Governor, received a despatch from Mr. Secretary Cardwell, granting him three months leave of absence to proceed to England. We understand His Excellency and Mrs. Dundas will leave the Island about the middle of the month of July, and that they contemplate returning in the autumn. We wish them a pleasant voyage across the Atlantic. As his Excellency's term of office to the Government of this Island is about expired, we trust he may be re-appointed for another six years; and when we do so, we believe we express the wishes of nine-tenths of the inhabitants of this Island.

During His Excellency's temporary absence the Hon. R. Hodgson, Chief Justice, will administer the Government of the Island.—*Islander.*

PIC NIC TO BRULE.—The Students of St. Dunstan's College accompanied by the Rev. Angus McDonald, Rector and Professor, the Very Rev. Daniel McDonald, and the Rev. Mr. Doyle—in all about forty—crossed over to Brule, in the Steamer HEATHER BELLE, yesterday morning, and returned again about eight o'clock the same evening. We learn that Mr. Mockler had a good dinner prepared for the boys and the Rev. gentlemen in charge of them, and that after amusing themselves on shore, in a variety of ways, for several hours, they embarked for home, satisfied that they all had had "a good time."—*Isl.*

The ceremony of laying the corner stone of the new Catholic Chapel, now building in the town, took place on the afternoon of Thursday last. The Rev. Dr. McIntyre, Bishop of Charlottetown, performed the ceremony. His Lordship was attended by the Rev'ds Angus McDonald, Rector of St Dunstan's College; K. J. McDonald, P. P. Arisaig; A. McGilvray, P. P. Cape George; R. McGilvray, P. P., West River of Antigonish; Joseph Chisolm, P. P. Pompquette; Peter Tisset, Professor of Languages in St. Francis Xavier's; and R. McDonald, P. P., Pictou.

When the ceremony of laying the corner stone was concluded, the audience was addressed at some length by the Rev. Dr. McDonald. In the course of his remarks he alluded to the necessity for respectable houses in which professing Christians might meet for the worship of their Maker. He spoke of the blessings that were enjoyed under the British constitution, and that all professing Christians, of whatever name, could follow their conscientious convictions under the mild sway of our beloved Queen. He concluded his address by appealing to the sympathies of his hearers in aid of the Building Fund, and complimenting the inhabitants of Pictou on the Christian charity and forbearance by which they are characterised. A collection was then taken and the audience quietly dispersed.

With regard to the dimensions of the church, the *Standard* says:—

"The new Catholic Church now in course of building, will not, in point of architectural beauty and material, be inferior to anything of the kind at present in the Province. The design is certainly a very happy one. It is simple, chaste, and at the same time imposing. The style is the early English, or Gothic of the thirteenth century. The dimensions of the building are ninety-five feet by forty-five. It is to be built of the best quality faced brick, with free-stone dressings. The plans have been designed by the young and talented architect, Owen Hamill, Esq., who has already contributed not a little to the revival of the purity of Gothic architecture, both in the United States and British Provinces."—*Pictou Eastern Chronicle, June 22.*

THE BRITISH PERIODICALS.

The Fourth Estate of England, with the *Times* at its head, wielding a power behind the throne greater than the throne itself, would be less powerful were it deprived of the influence which the renowned Quarterly Reviews and Blackwood's Magazine contribute to it. They are an institution of themselves. Through their columns many an unknown essayist like Macauley and Sydney Smith, has been introduced to unrivalled publicity, and by such writers, in turn, these publications have attained to their splendid reputation. Scholarly ability, extended range of thought and research, magnificent rhetoric, brilliant discussion, are concentrated in their pages to illuminate and elucidate all that is fresh in science, religion and literature. The newest discoveries in social laws, in theological doctrine, material forces and organizations, are to be found in these Reviews, and without disparagement to the comparatively crude and vigorous publications on this side of the Atlantic, it can be said that there are no publications in the world equal to these for profundity of thought and elegance of style. Those who attempt to lead or instruct public opinion, whether in the pulpit, the school room, or professor's chair, ought to consult such authorities as can be found in these Magazines.

Sometimes Americans are inclined to chafe under their criticisms upon our affairs, but if "it is right to learn from an enemy," we may certainly receive instruction though it comes in unpalatable doses from professed friends. Even harsh and pungent examinations into our principles and conduct are more invigorating, if less agreeable, than indiscriminate praise.

The Westminster Review, liberal, theologically and politically; the Edinburgh, whig; Blackwood, intensely tory; the North British, the organ of the Free Church party, and the London Quarterly, conservative, annually contain more, in a small space, of literature, science and art, than many a well selected library. Those who wish to acquire the essence of current literature can find it in these periodicals.

The publishers, Messrs. Leonard Scott & Co., 38 Walker Street, New York, offer them at most liberal terms, viz:

	Per annum.
For any one of the Reviews	$4 00
For any two of the Reviews	7 00
For any three of the Reviews	10 00
For any four of the Reviews	12 00
For Blackwood's Magazine	4 00
For Blackwood and one Review	7 00
For Blackwood and any two of the Reviews	10 00
For Blackwood and three of the Reviews	13 00
For Blackwood and the four Reviews	15 00

Were these imported they would cost, with the premium on gold, about $75.—*Hartford Post.*

Ayer's Sarsaparilla

Is a concentrated extract of the choice root, so combined with other substances of still greater alterative power as to afford an effectual antidote for diseases Sarsaparilla is reputed to cure. Such a remedy is surely wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove, as this has, of immense service to this large class of our afflicted fellow-citizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found in the following complaints:—

Scrofula, Scrofulous Swellings and Sores, Skin Diseases, Pimples, Pustules, Blotches, Eruptions, St. Anthony's Fire, Rose or Erysipelas, Tetter or Salt Rheum, Scald Head, Ringworm, &c.

Syphilis or Venerial Disease is expelled from the system by the prolonged use of this SARSAPARILLA, and the patient is left in comparative health.

Female Diseases are caused by Scrofula in the blood, and are often soon cured by this EXTRACT OF SARSAPARILLA.

Do not discard this invaluable medicine, because you have been imposed upon by something pretending to be Sarsaparilla, while it was not. When you have used Ayer's—then, and not till then, will you know the virtues of Sarsaparilla. For minute particulars of the diseases it cures, we refer you to Ayer's American Almanac, which the agent below named will furnish gratis to all who call for it.

AYER'S CATHARTIC PILLS, for the cure of Costiveness, Jaundice, Dyspepsia, Indigestion, Dysentery, Foul Stomach, Headache, Piles, Rheumatism, Heartburn arising from Disordered Stomach, Pain, or Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Liver Complaint, Dropsy, Worms, Gout, Neuralgia, and for a Dinner Pill.

They are sugar coated, so that the most sensitive can take them pleasantly, and they are the best Aperient in the world for all the purposes of a family physic.

HOLLOWAY'S PILLS.—Bilious affections and stomach complaints, induced by atmospheric heat or too liberal diet, if not early checked, are often attended with serious consequences. When any one finds his ideas less clear than usual, his eyesight dimmed and his head dizzy, while he is indisposed for all exertion, physical or mental, he may be quite sure that he is in immediate need of some cooling and purifying medicine. Let him send at once for a box of Holloway's Pills, after a few doses of which his head will be clear again, his spirits be elevated, and all his energies be restored. Printed directions for the guidance of patients in the use of this admirable medicine are affixed to every box.

SORE THROAT, COUGH, COLD, and similar troubles, if suffered to progress, result in serious pulmonary affections, oftentimes incurable. BROWN'S BRONCHIAL TROCHES are compounded so as to reach directly the seat of the disease and give almost instant relief. They have been thoroughly tested, and maintain the good reputation they have just acquired. As there are imitations, be sure to obtain the genuine.

QUICK PASSAGE.—The beautiful clipper Bark Undine, 618 tons O.M. and 388 tons register, Capt. Lawrence Kickham, belonging to Messrs. Pope, of Prince Edward Island and this port, arrived in the Mersey on the 31st May from Prince Edward Island, in 15 days. Having taken out a general cargo of Merchandise to Charlottetown, reloaded with oats and deals, including a full deck load, and completed her return voyage in the almost incredible space of one month and 24 days, 36 hours of which she was detained by dense fog at the entrance of the Gut of Canso, and was two days becalmed on the homeward passage. Her previous voyage on the same round was performed in one month and 29 days, thus establishing her character as one of the fastest vessels ever built.—*Liverpool Telegraph*, June 2, 1865.

THE CUNARD ESTABLISHMENT.—We learn that our respected townsman Wm. Cunard Esq., Mr. Cunard and family arrived here this morning in the R. M. Steamship *Asia* from England. It is gratifying to be assured that the agency of the Cunard Company in this city will remain intact, at least for the present. Sir Edward Cunard, Bart., who has for many years resided in Jersey City, as agent for the New York line of Cunard steamers, has assumed the position of the late lamented Sir Samuel, and will be henceforth the head of the house. Sir Edward will, for the time to come, take up his residence in England. Mr. Franklyn, a grandson of the late Sir Samuel, succeeds to the agency of the New York line. As in times past so in the future there would seem to be unprecedented prosperity in store for the house of Cunard and Co.—*Halifax Reporter June 20.*

TESTIMONIALS.—REPORT OF COMMITTEE OF HOTEL PROPRIETORS, PUBLISHED IN GUYER'S PROGRESSIVE AGE, CHICAGO, ILL.—We, the undersigned, present by invitation, yesterday, to witness the operation and working of the new principle of gas used for cooking purposes, were present during a series of experiments, in our view fully calling out the utility of these Stoves. As the result of actual experiment the following was performed:—

Beefsteak was cooked in four minutes, its juices and flavor retained; and, further, the claim of the inventor abundantly sustained, by this process tough meat is rendered tender and delicious.

Quail were, in two instances, broiled in five minutes, and that to a turn.

Bread cut fresh from the new loaf was delicately browned in two minutes.

In each case these viands would be pronounced deliciously and thoroughly cooked. In the case of the meats, the exterior surfaces were coagulated and rendered firm; the substance of the whole, when cooked, retaining their juices and flavor.

In neither nor any case was there the faintest perceptible flavor or odor of gas in or about the Stoves, or in the food when cooked. We regard the process as entirely superior and successful.

SAMUEL HAWK, Richmond House.
GEO. H. FRENCH, } Briggs House.
W. F. TUCKER, }
J. W. HUMPHERY, Massosoit House.
A. M. STODDARD, Revere House.
JOHN WRIGHT, "Anderson's."

The cost of cooking by this method we append as made up from careful tests yesterday, accepted but not tried: 12½ lbs. bread cooked in 42 minutes, consuming 4 cubic feet of gas, cost 1 cent. 2 lbs. steak broiled in 5 minutes, consuming ½ of a cubic foot of gas, cost ½ of a cent. 1 quart water boiled in 9½ minutes, consuming 1 cubic foot of gas, cost ¼ of 1 cent. 24 breakfast biscuit baked in 12 minutes, consuming 1 foot of gas, cost 2½ mills.

Having frequently examined the mode of action of SHAW'S STEAK-BROILER, I have been led to the conclusion that the tissues and integuments of tough meat are ruptured and broken through the effect of highly heated, even red hot steam, of which this gas-flame is highly composed. At the first instant this steam penetrates and scalds the meat, and the subsequent browning retains a portion of the water formed, with the juices produced. The gas-flame, as obtained in the devices of Mr. Shaw, is the purest flame which art affords; and there is nothing present, as vapor of gas, which can give odor to, or any way interfere with the production of the delicious flavour of broiled meat. This apparatus secures the greatest economy of time in cooking steaks; it renders the toughest meat more tender than in any other mode of broiling it, and, with the simple noting of time, enables the cook to produce with certainty any gradation of effect.

Respectfully,
A. A. HAYES, M. D., State Assayer.
16 Boylston Street, Boston.

FROM WILLIAM M. LORING.

W. F. SHAW.—The Gas Cooking-Range and the Gas Heating-Stoves of your invention, which I have used the past four years, I can unhesitatingly say have given me perfect satisfaction; and I can confidentially recommend them, as I have found them, to be the most economical and convenient cooking and heating apparatus I have ever met with.

In the Gas Cooking Range, the quality of the food is most surprisingly improved. The juices of the roasted meat are all retained, so that they do not appear to lose any of the weight. In the course of a season, this saving amounts to quite an item in the economy of this mode of cooking, as it is a well known fact that meats lose much of their weight when cooked in the ordinary coal range oven.

Respectfully yours,
Boston. WM. M. LORING.

From D. B. COOK, 111 Lake st., Chicago.

I regard W. F. Shaw's Patent Gas Smoothing Iron" as one of the greatest inventions of the age.

It is all you claim for it,—novel, economical, and exceedingly convenient.

The much-dreaded "ironing day" is welcomed with pleasure wherever the Gas Iron is used; and no housekeeper will consent to be without it after giving it a trial.

Yours, &c. D. B. COOK.

From Mrs. W. W. Everts, Chicago.

It is with pleasure that I give my testimony to the great value of the Gas Stove you are now offering to the public. The Stove for ironing I regard as a desideratum long needed in housekeeping.

The fatigue and exhaustion occasioned by many hours spent at the ironing-table, in a room heated to the ordinary temperature, is all spared by using your stove, which heats the irons quickly, and leaves a comfortable room.

This stove is equally successful as a broiler.—Much more might be said in simple justice to this great invention were it necessary.

Yours respectfully, Mrs. W. W. EVERTS.

The Union of the British Provinces.

A brief account of the several Conferences held in the Maritime Provinces and in Canada, in September and October, 1864, on the proposed

Confederation of the Provinces,

together with a REPORT OF THE SPEECHES delivered by the Delegates from the Provinces, on important public occasions. Compiled by the Hon. Edward Whelan, M. P. P., (one of the Prince Edward Island Delegates.) Charlottetown, Prince Edward Island: Printed by G. T. Haszard, 1865.

The above little work contains 239 pages. It has just been issued from the press, and is handsomely bound in boards, cotton and roan. It contains the principal speeches delivered on the question of Confederation during the progress of the Conferences in the Maritime Provinces and in Canada, with a brief narrative interweaving the events which called forth the speeches. The speeches have been carefully revised and corrected—in most cases by the speakers themselves, and all superfluous matter relating to merely passing incidents eliminated from them.

Those who take an interest in the question of Confederation—(and their number is not on the decrease, but the reverse,)—may, it is hoped, find this Compilation useful for instructive reference.

Only a limited number is reserved for sale. They may be had at the Bookstores in the course of the present week. Prices—3s (Boards)—4s (Cotton)—4s 6d (Roan). [June 5, 1865.

WANTED, a Farmer Servant; must be a good Ploughman; liberal wages will be given. Also, a Lad about 16 years of age. Apply to the subscriber.
