

Sherbrooke University To Train French Executives

By DAVE BAZAY
SHERBROOKE, Que. (CP)—The University of Sherbrooke this fall starts a program of co-operative courses in engineering and business administration aimed at placing more French-Canadian executives in the executive suites of the business world.

Modelled on a system introduced in Canada by Ontario's Waterloo University in 1957, Sherbrooke's sessions will consist of alternate periods of four months at the desk in school and four months on the job in industry.

The courses in civil, mechanical and electrical engineering, leading to a bachelor of science degree, will take 56 months to complete, including eight academic sessions and six in industry.

The business course, leading to a master's degree in business administration, will require 26 months of training, including four academic sessions and three on the job.

Gilles Joncas, 34-year-old mining engineer who is assistant director of a department which will administer the work periods, said in an interview the response of industry in Quebec has been "just wonderful."

NEVER OBSTRUCTED
"We sent letters to about 40 companies and so far have visited around 30. We have yet to receive a 'no' for an answer."

Among companies taking part are General Motors, Bell Telephone, Canadian National Railways, Canadian Industries Ltd., Alcan Aluminum Ltd., Northern Electric and Canair Ltd.

He said the demand for bilingual professional workers in Quebec is far greater than the supply, especially in engineering because Quebec's education system "didn't produce too many engineers in the past."

"Another main reason is that statistics show only one of four French-Canadian engineers work in industry. The rest go into government agencies—such as the province, the city of Montreal or Hydro-Quebec."

He was confident the co-operative program would end any language barrier that might have existed.

Bilingualism will be a requisite of the business course, the first MBA program to be set up at a French-language university since at least 25 per cent of the lectures will be in English.

EMULATED WATERLOO
Sherbrooke decided on the co-operative program after investigating the system at Waterloo where enrollment in engineering increased from 72 in 1957 to 1,800 in 1965.

"Their success has been phenomenal," said Mr. Joncas. "The people at Waterloo have been a real big help. They did the missionary work. We hope eventually to exchange students between the two universities."

Apart from providing practical experience not available in conventional courses, the co-operative program has advantages for both students and the university.

"Since students will be on a job with pay every four months, they will be able to reap the benefits of a university education without incurring too great a debt. Although the program is one year longer than conventional courses, its graduates are generally higher paid because of their experience."

RAISE ENROLMENT
Mr. Joncas said the university will be able virtually to double its engineering enrolment without enlarging existing physical facilities since half the students will be away from campus. This was a significant step because "in three or four years we are going to be overflowing with students at the university level."

The university, founded in 1954, graduated its first engineering students in 1959. Students will enter the new program in their second year since the number of first-year dropouts is high.

This September, the university expects between 125 and 150 to enrol with a much larger number expected next year.

To help establish the business course, Sherbrooke recruited two professors from Columbia University, Dr. A. R. Ozensfeldt and Dr. L. R. Savies. Among its staff are three MBAs from the University of Western Ontario, London, which has one of the country's leading business schools.

Since the business course is new to Sherbrooke, the number of students during the first year will be limited to 30.

ON THE AIR

The following program listings are published free of charge as a public service and appear as presented to us by the stations concerned.

SATURDAY PROGRAMS

CFBY-TV
8:30 p.m.—Musical
8:00 p.m.—Baseball Game of the Week—Los Angeles vs. New York
8:30 p.m.—Bugs Bunny Show
6:00 p.m.—The Belmont Stakes
6:31 p.m.—Life and the Land
7:00 p.m.—CFBY TV News
7:30 p.m.—Fishes and Log

Reserves And Liquid Assets Of Chartered Banks Increase

OTTAWA (CP)—Cash reserves and liquid assets of the chartered banks totalled \$3,130,000,000 this week, showing a higher figure in relation to the Canadian dollar deposit liabilities than a month ago.

The Bank of Canada's weekly chartered bank deposits held by the general public last week amounted to \$1,476,000,000, representing an increase in the money supply of \$56,000,000 from the previous week and \$1,594,000,000 from a year ago.

Canadian government deposits in the chartered banks, however, were \$660,000,000, \$61,000,000 less than a year earlier.

The central bank's average of long term government bond yields on June 1 was 5.63 per cent, compared with 5.61 per cent on May 25 and 5.6 per cent on May 18.

Under banking regulations, chartered banks are required to hold cash reserves equal to eight per cent of their deposit liabilities. By agreement among themselves and with the Bank of Canada they promise to keep their liquid assets to at least 15 per cent of deposit liabilities.

The June 1 figures indicated some slight loosening of the current tight money situation, but the chartered banks often have more liquid assets at the beginning of a new month.

Currents in circulation and chartered bank deposits held by the general public last week amounted to \$1,476,000,000, representing an increase in the money supply of \$56,000,000 from the previous week and \$1,594,000,000 from a year ago.

OUR BOARDING HOUSE MAJOR HOOPLE

CONTRACT BRIDGE

By B. JAY BECKER

East dealer. North-South vulnerable.

West led the six of clubs and South won the jack with the queen. After playing two rounds of trumps, declarer eventually took a spade finesse. When it failed, he went down one or a loss of 100 points.

However, South could have made the slam after getting the favorable club lead. The proper play is to enter dummy with a diamond and lead a heart. When East produces the queen, declarer takes the ace, cashes the ace of clubs, ruffs a club, plays a diamond to the king and ruffs his last club. By this time the situation is:

West: ♠K84, ♠A76, ♠K, ♠A107
East: ♠Q76, ♠KQ, ♠K872, ♠J643

The bidding:

East	South	West	North
Pass	1♣	Pass	1♠
Pass	1NT	Pass	3♠
Pass	4♠	Pass	5♠

Opening Lead — two of diamonds.

This deal occurred in a Camrose Trophy match between England and Northern Ireland. When Northern Ireland had the North South cards, the bidding went as shown. East led a diamond and the Irish declarer lost a heart and a spade to get went as shown. East led a diamond and the Irish declarer lost a heart and a spade to make five for a score of 650 points.

This seemed to be a normal result, but when the English North-South pair played the hand, their bidding went:

East	South	West	North
Pass	1♣	Pass	2♠
Pass	3♠	Pass	4♠
Pass	6♠	Pass	7♠

Declarer now plays a heart, which East wins with the king. East must then lead a diamond, permitting a ruff and discard, or a spade, which gives South a tree finesse.

The suggested course of play is entirely reasonable, since declarer maintains his chance to take a spade finesse if it becomes necessary, while at the same time he creates an opportunity to make the slam without running the risk of a losing finesse.
