Elerslie Planning ARDA Discussion

ELLERSLIE — At the regular monthly meeting of the Elerslie branch, Royal Canadian Legion, unanimous approval was given for the branch to sponsor an ARDA meeting.

The date, time and place of this meeting was not decided upon, and it was stated that as plans are completed this information will be made public.

A committee was set up to make the necessary arrangements, and it is hoped that Hartwood Drive will be available as a guest speaker. Plans are to extend invitations to all other organizations and interested citizens.

The area for development which it is hoped will be covered, is that embraced by the Elerslie branch for membership.

At the meeting it was also noted that the Elerslie branch does not possess a campsite, as do most all other branches in the Island command. A committee set up some time ago to work on this project has reported progress, and it is hoped that the branch will soon own a memorial.

Hog Support Prices Stays Unchanged

OTTAWA (CP) — An unchanged hog price support program for 1963 was announced here by Agriculture Minister Hamilton.

The minister also said in a statement that no deficiency payment is being made on 1962 sales since the national average price for the year was well above the floor level.

The announcement means that the support price will continue at \$23.65 a hundredweight for Grade A pigs. Eligibility for any payments will still be limited to a maximum of 100 carcasses Grade A or B a farmer.

A deficiency payment is made when the national average price for the support price falls below the floor price. In 1962, the national average price was almost \$3 above the floor price, because of high beef, pork and other meat prices.

The bulletin, issued after doctors examined him this morning, said: "Mr. Gaitskell had a comfortable night. The improvement noted yesterday is maintained."

The 56-year-old Gaitskell was admitted to London's Middlesex Hospital suffering from a recurrence of a virus infection involving the bases of the lungs and causing pleurisy and pericarditis inflammation of the pericardium, a smooth membrane surrounding the heart.

When he was admitted, the conditions were described as "serious."
