FISH FOR UPPER PROVINCES.

MR. MARTIN brought up in Parliament, a few days ago, a matter of great importance to the fishermen of the Maritime Provinces. He asked the Minister of Marine—

"Has the Government under consideration or decided on any scheme for the transport of fresh fish in cold storage from the maritime provinces to the inland consuming centres of Quebec, Ontario and the North-west? What arrangement is proposed, and is it intended to include the export of fish from Prince Edward Island? Is it proposed to have the arrangement carried out for next season's fishing? If not, when?"

Hitherto the people of the cities of Ontario and other inland parts of Canada have been supplied for the most part with fish from the States. This is evidently wrong; and we are glad to note that the products of our fishermen are likely to be given a chance in the competition. Sir Louis Davies said in reply to Mr. Martin that the subject has been discussed by a number of members from the Maritime Provinces and that the Minister has it under consideration. The reply is somewhat vague and non-committal. But it is, in a general way, favorable. We hope that the movement will result in practical measures to so divert the trade in fresh fish that our fishermen will be benefited. Our fishermen are taxed for the protection of the manufacturing populations of the inland cities; and it is but fair that they be provided with means of sharing in the trade resulting from the demand of the people of those cities for fresh fish.

INSTRUCTION IN SPRAYING, ETC.

REFERENCE has already been made in THE EXAMINER's columns to Mr. Martin's questions concerning the experimental spraying of fruit trees. The question, as set forth in Hansard this morning was as follows:

"Does the Government propose to initiate, as advocated by Professor Robertson, any scheme for experimental spraying of fruit trees?"

"If so, to what extent is it proposed to extend it this coming summer?"

"What sections are to be chosen for these experiments?"

"Is it proposed to extend them to all the provinces?"

"Is it intended that these experiments are to be made without any charge to orchardists?"

"If not, what charge is to be made?"

The reply of the Minister of Agriculture was not by any means definite. He said:

"Professor Robertson has not advocated any scheme for spraying fruit trees; but it is proposed to co-operate with the provincial government of Prince Edward Island and the Prince Edward Island Fruit Growers' Association in preparing for some trial shipments of fruit by the spraying of fruit trees, and in the packing and shipping of apples in the season of 1899."

We presume that the details of the movement will be worked out by the local politicians.

THE DRUMMOND JOB.

In preparation for another move in the Drummond railway job, the Liberals are spreading a report that the extension of the Intercolonial to Montreal has resulted favorably. This report is not borne out by the official statement that while the earnings of the road last year, were increased by \$251,641, the operating expenses were also increased by \$331,679. Last year was an exceptionally favorable year for railways. Succeeding years may not be so good. But the operating expenses of a railway cannot be reduced. The Government will have to find some excuse, other than the additional paying capacity of the Intercolonial, for the consummation of the Drummond job.

NOTES AND COMMENTS.

—It is now reported that the "government will defer the proposed redistribution bill until next session." We suggest that they defer it until after the taking of the next census, when it will properly come up; for a redistribution of seats will then be necessary.

—Our attention has been directed to the fact that the statement of an anonymous correspondent, to the effect that the amendments recently suggested by a committee of the City Council included a proposed application to the legislature to get power to deal with corner loafers, is erroneous. No such proposal was made by the committee, and the inference drawn by our correspondent respecting Councilor Crabbe and those who voted against the adoption of committee's report is ridiculous. It is, of course, well understood that the editor of a newspaper does not guarantee the absolute truthfulness of every correspondent's statements.

Montreal Gazette: It looks somewhat as if the Georgia nigger burning might be an important factor in curtailing the lawless proclivities of the lynchers. It has raised a storm of protest from the press generally that if outside opinion can have any effect should waken the rulers of the south to a sense of their responsibility, which is to secure the legal punishment of offenders, white as well as black, and when the crime is committed by a multitude as when it is the work of individuals.

If you had been taking Abbey's Effervescent Salt every day there would be no need of Spring medicine. The daily use of Abbey's Effervescent Salt will keep you in good health. Its use purifies the blood and cleanses the system at all seasons. This is an ideal time to commence using it. Abbey's Effervescent Salt is not only a Spring medicine, but it is the best remedy you could take for the ill of Spring. All druggists sell this standard English preparation at 60 cents a large bottle; trial size, 25 cents. Abbey's Effervescent Salt is endorsed and prescribed by the leading physicians of Great Britain, Europe and Canada. It is delicious to the taste and wonderful in its effects. The Canada Lancet says: "This preparation deserves every good word which is being said of it."

There was caught off Yarmouth a few days ago a lobster measuring three feet in length, and with a width from tip to tip of spread claws of nearly seven feet. It weighed twenty-five pounds. The legs were larger round than a grown man's thumb. It is believed to be the largest lobster that has been caught.

WEAK AND PUNY CHILDREN

Become Strong and Healthy by using Dr. A. W. Chase's Nerve Food.

Children are frequently left weak and sickly as an after result of measles, scarlet fever, etc., and in this state are easy prey to nervous disorders, rickets, spinal disease, or consumption, diseases which do not affect robust, healthy children.

The blood is weak and watery and the nerves improperly nourished. Feed the blood and nerves with Dr. A. W. Chase's Nerve Food, and the pale, pinched faces will soon become rosy and plump, and tiredness and weakness will give way to strength and animation.

Mr. E. W. Ward, 62 Close Avenue, Toronto, writes: "My eldest daughter, aged eight, became very much run down. Her fretful, nervous, sleepless condition greatly alarmed her parents. She was taken from school, and in spite of the best nursing, the thin, weakened, bloodless face grew painfully worse. Fortunately we used Dr. Chase's Nerve Food. An improvement became apparent in a few days, it continued, and in a few weeks she returned to school built up anew, and greatly to our joy fully restored to health."

Will The Chainless Wheel Last?

is the question asked to day by the cycling public. We submit the following letter written to Mr. E. E. Brown, the Crescent agent at Boston, Mass.

Boston, March 23, 1899

MY DEAR MR. BROWN:

I want to tell you what a success the Crescent Chainless you sold me last season has proved. I rode it 5,000 miles, and a large part of the distance was to riding through rough country, over the worst kind of roads. The wheel seems just as good to day as it was when I bought it. I have not had a particle of trouble with it throughout the season, something I cannot say of any of the chain wheels I have ridden during the past dozen or more years. You can use my name in recommending the Crescent Chainless and send anyone to me you please for an endorsement of its first class qualities in every direction. I have found it a good hill climber, easier to kick up grade than any chain wheel I have ridden, and you know I always have the best mounts on the market. I shall continue to ride the Chainless and shall never go back to the chain gear again. It seems that the chain has got to go as soon as the prejudice against the Chainless has past.
