THEATRE OF DWARFS

The one absolute novelty of the season. A Coterie of Famous Lilliputians Celebrities in a chaste and delightful programme, replete with startling surprises, and abounding in hilarious fun. In addition to our CONGRESS OF LILLIPUTIANS, we will introduce the aerial wonder,

ZUZORA,

presenting a thrilling performance

ROBINSON,

the Australian Corsique,

Kauwamura's Japanese Midgets
Kichi, Tarne, and Nobu.

Their first appearance on this continent. The Tallest Man That Strides the Earth.

BILLY BAKER

THE MAGICAL STATUE.

The whole forming a

Mammoth Vaudeville Company

Admission, evenings, 10c and 20c
Reserved seats, 30c.

Afternoons, 10c for everybody to all parts of the house.

Evenings at 8; afternoons at 2.30
Seats on sale Friday morning at usual places.

ADDRESSES

THE DISTINGUISHED SPECIALIST

Rev E O Taylor, M A
OF CHICAGO.

Will deliver a course of Lectures in P. E. Island, beginning at Malpeque Aug. 29th. He is to lecture in Kensington, Summer side, Alberton, Charlottetown, Souris and Victoria. His subjects are—

"Alcohol and the Later Science."

"Christian Citizenship."

"That Boy of Yours," and

"A Glass of Beer Analyzed."

Mr. Taylor is a scientific expert on the alcohol question. His lectures are of University Extension Grade, and therefore are not eulogical talks.

His tour over the Dominion is under the auspices of the W. C. T. U., and is endorsed by pastors, physicians and educators.

Mr. Taylor ranks among the leading platform speakers of this continent.—London Free Press.

The P. E. Island public will have a rare intellectual treat in hearing this brilliant orator.

For further particulars see flyers.

PLUMS and GREEN GAGES

We expect fifty 12-quart baskets. Plums and Green Gages, direct from the orchard, on Friday evening, the 3rd inst. Any one wishing any of those will please leave their order at our stores on Friday, and we will deliver them on Saturday morning. The price will be VERY LOW by the basket.

Beer & Coff

NEW PORK PACKING HOUSE.

There Are None Better Equipped Than Ours.

What Becomes of the Hog After His Arrival at the Packing House.

The new pork packing establishment that is being built for the Messrs. Rattenbury at the east end of the city, is rapidly approaching completion, and notwithstanding the broken weather experienced early in the season and the delay in obtaining material, Lowe Bros. will have their contract completed within the time specified. The building is located on the corner of Grafton and Edward streets. Mr. Lees, of Chicago, who designed the building, is well pleased with the manner in which the contractors are doing their work. "They have acted up to the specifications in every respect," remarked Mr. Lees. "The EXAMINER," indeed in some instances they did more than was called for. I have superintended the erection of many buildings, including some of the largest in the United States," added Mr. Lees, "and I never met men who gave me so little trouble as did the contractors for the erection of the pork-packing establishment in Charlottetown."

The pork packing establishment, it may be stated here, is built of brick with stone trimmings, and is from three to five stories in height. The main building is 250 feet in length by 80 feet wide, and the machinery house is 100 feet long by 56 wide. The main entrance will be on Grafton Street. The offices will be 30 feet square, and will be fitted with lavatories, coat rooms, and other conveniences.

HOW THE HOG IS TREATED.

A siding has been put down from the railway track to the west side of the building, running the full 250 feet. On this siding will be shunted all cars containing live hogs for the packing house. The hogs will be received at the west end of the building and run up a chute to the fifth story. Here they will be placed in what is called the catching pen, an enclosure capable of containing 100 granter. A boy enters this pen and catches one of the hind legs of the hog with what is called a shackling chain. This chain is attached to a friction hoist, and notwithstanding his loud protests his hogship is elevated to the sticking pen, where the butcher awaits his arrival and receives him on the point of a knife. After being silenced in this way the carcass of the hog continues the trip. He slides down a story by the aid of an iron bar, at the end of which the shackling chain is taken off and he falls into the scalding vat. After a brief sojourn in this vat the hog next strikes what is termed a cradle. This cradle throws him upon the scragging bench, where he is divested of his bristles. He is then ridden on a rail to the gutters, from which he passes through an automatic sprinkler where he is thoroughly cleaned and washed. Continuing his journey by rail he passes on to the expert marker, who marks him with a knife and removes his back-bone. After being thus halved the hog continues his trip in sections, and is assigned to quarters in the hanging room according to his weight. Here his remains are kept until they are sufficiently chilled to admit of being further dealt with in the final chilling room where any degree of frost desired may be obtained. As a rule the day after the porker is put in the last mentioned place he is ready for cutting into any shape demanded by the markets of the world. After being cut up into joints such as hams, shoulders, sides, etc., the process of evolution is continued, and the hog is sent down chutes (which are connected with the cutting table) through traps into the various chilling rooms on the second and third floors. There they are put through various processes of curing and preserving for the home and foreign markets.

DISPOSAL OF THE BY-PRODUCTS.

Having thus dealt with the treatment accorded the hog between the time of his arrival at the packing-house and his curing and preserving for the markets of the world, it is perhaps in order to say something about the disposal of the by-products. In this connection it may be pointed out that the blood from the sticking room on the fifth floor runs down a galvanized spout to the press-room on the first floor. Here it is received in a large vat and subjected to a high pressure of live steam. Then it is transferred to a hydraulic press, where the moisture is removed. This process over, the blood is taken from the press and placed in an agitator where it is thoroughly pulverised and dried to a powder. In this way it becomes a commercial article, being what is known as dried blood, which is largely used in sugar refineries and by calico printers, being, as it does, the place of whites of eggs. When the sugar refiners and calico printers have taken all the albumen out of the blood it is sold to farmers for fertilizing purposes. Some of the blood is also used for making fancy buttons for ladies' dresses and other articles such as snuff boxes, toilet sets, etc. The entrails are used for sausage casings, and the bladders are used by tobacco manufacturers for holding snuff, and by druggists for various purposes. The stomach of the hog is used in the manufacture of pepsin, an article largely consumed by dyspeptics. What is left of the by-product is converted into a fertilizer for the use of farmers.

The slaughtering capacity of the house at its opening will be about 350 hogs a

day, but it may be so arranged as to take 1000 hogs a day. The disposal of 350 hogs a day will require the services of about 100 men and boys.

MACHINERY AND OTHER FEATURES.

The machinery will be supplied by Mr. Thomas A. McLean, of Charlottetown, to whom that portion of the contract has been let. It will consist of one No. 2 Anderson cylinder dryer, one hydraulic press, four large steam digesters with a standing pressure of 120 lbs. to the square inch, and sausage machines of large capacity. There will also be 2200 feet of railway tracking for the hogs to run on which will be fitted with 600 travelers, and three friction elevators each being able to lift 2500 lbs. The machinery will be driven by a 75-horse power engine with two 100-horse power tubular boilers.

There will be two ice-making machines of the horizontal type with a capacity for expelling 140,000 cubic feet of ammonia gas each minute at a speed of 70 revolutions every sixty seconds. These machines are from the Healey Ice Machine Company's Works, Chicago, and are the most powerful of their kind obtainable. The condenser, which is also of the horizontal type, will contain 5,240 feet of extra heavy weight iron inch-and-a-quarter coils. The receiver for the storage of liquified ammonia from the condenser will stand a pressure of 300 pounds per square inch. Thirty-one thousand feet of inch-and-a-quarter pipe is required for the brine to circulate through the chill rooms.

In connection with the building there will be two smoke houses each having a capacity of 5000 pieces at the one time. There will also be a special smoke house for the various kinds of sausages, which will be fitted with three iron cars on rails.

According to Mr. Lees the packing-house in Charlottetown is, taken all in all, the largest and most complete of any building of the kind in Canada, and, excepting in size, it is the equal of the best in the United States, for there are none better equipped. It is expected that the packing house will be in operation by the 15th of November, when the owners will be most happy to show our farmer friends over the place and explain the method of operation.

The Messrs Rattenbury are to be highly commended for the energy and enterprise displayed by them in establishing such a splendidly-equipped packing-house in our midst, and it is hoped that a most substantial measure of success will crown their efforts.

It may be interesting to contractors and builders to know the quantity of material used in the construction of the building. It is therefore appended:

- 16,000 cubic feet concrete.
- 1,250,000 brick.
- 1,000,000 feet lumber.
- 240 squares roofing felt.
- 120 tons gravel.
- 1,000 barrels cement.
- 1,000 barrels lime.
- 25 tons mineral wool.
- 40 tons cast iron.
- 7 tons wrought iron.
- 5 tons galvanized sheet iron.
- 225 rolls Neponset insulating paper.
- 1,500 tons rubble stone.
- 375 tons dimension stone.
- 2,000 tons sand.
- 200 boxes glass.
- 20 miles caulking.
- Upwards of 125,000 feet iron piping.
- 2,200 feet tracking.
- 1,300 feet terra cotta coping.
- 20 tons roofing pitch.
- 10 tons railroad iron.

LOBSTER TRAPS DESTROYED.—Mr. John Davidson, fishery overseer, destroyed several hundred lobster traps off the Sand Hills at Lot 11 last week.

The two most critical times in a woman's life are the times which make the girl a woman and the woman a mother. At these times Dr. Pierce's Favorite Prescription is of incalculable value. It strengthens and invigorates the organs distinctly feminine, promotes regularity of the functions, allays inflammation, checks unnatural, exhausting drains, and puts the whole delicate organism into perfect condition. Almost all the ills of womankind are traceable to some form of what is known as "female complaint." There are not three cases in a hundred of woman's peculiar diseases that Dr. Pierce's Favorite Prescription will not cure.

AYER'S Sarsaparilla

Is the original Sarsaparilla, the standard of the world. Others have imitated the remedy. They can't imitate the record:

50 Years of Cures

TEETH

Teeth Extracted Skillfully.

No Fictional Method. No Indiscriminate use Cocaine. No Injurious After Effects.

DR. J. P. MURRAY,

145 Queen Street.

TO LET.—That brick house pleasantly situated on Poplar Terrace, E. Kent St., 16 rooms. Hot Water Heating. Roomy stable. Coach House and Gardens. Also the cottage stable, and grounds adjoining the above house. Apply at home, or at office of F. W. L. Moore, Executor estate F. W. Moore 212-1414

LOCAL AND OTHER ITEMS

LORD'S DAY ACT.—A summons charging an infraction of the Lord's Day Act has been served on Peter Hughes, Spring Park Road. It is returnable to-morrow.

MORE EXCURSIONISTS COMING.—A Raymond Excursion party, will arrive this evening in charge of Mr. George H. Cross. While in the city they will be registered at the Davies.

PIANO RECITAL.—Mr. F. E. Morris' piano recital will take place tomorrow evening in the Kindergarten Hall. The programme appears in another column. Lovers of music should not miss the opportunity of hearing Mr. Morris play.

SOURIS NOTES.—Arrivals at the Sea View Hotel: J. L. Powell, Halifax; J. B. Hegan, Ch'town; W. K. Reynolds, St. John, N. B.

Mr. Smith, the contractor for the break-water at Souris, left for home this morning.

ST. PAUL'S CHURCH.—The Rev. Mr. Benoit, ex-editor of the "French American Citizen" and now of the Sahr-voit College, Montreal will deliver an address at the service in St. Paul's Church this evening at 7.30, o'clock. All should come to hear this eloquent French-Canadian.

W. M. S.—The following ladies have been elected office bearers of the Women's Missionary Society of Grace Church: President, Miss McRae; 1st vice, Mrs. Kirby; 2nd vice, Mrs. Thomas Pickard; 3rd vice, Miss Mary A. Hiey; Recording Sec., Miss Ida Sabine; Cor. sec., Miss Mittie Pickard; Treas., Mr. W. H. Long; Auditor, Mrs. Geo. Carter.

PICNIC AT MORELL.—The ladies of St. Joseph's Parish, Morell, will hold a grand Picnic at "Stokley Farm," Mr. John Sinnott's, St. Peter's Harbor, on Tuesday, the 21st inst. Those who attend are assured a most enjoyable time. Boat sailing on the harbor will be one of the special features. Grounds 1 1/2 miles from Morell and Lot 40 stations.

POLICE COURT.—This forenoon Thomas Tyler and John Hoar were each fined \$2 or 10 days for drunkenness. Two assault cases were also on the docket, one of which was dismissed and the other adjourned.

To-morrow morning the two McAleers and young Palmer come up for trial. The two McAleers are charged with house-breaking and larceny, and Palmer is charged with larceny.

HEAR HIM.—It is not likely that our people will have the opportunity of hearing Mr. T. E. Morris on any public occasion after tomorrow evening until after the completion of his studies in Europe. Therefore there will probably be a large attendance at the recital in the Kindergarten Hall tomorrow evening. The programme comprises some gems, and they are certain to be well rendered.

ELECTION PROTESTS.—Protests against the election of Hon. D. Gordon and Cyrus Shaw were filed yesterday afternoon. The petitioner against Hon. Mr. Gordon is John Jamieson, and corrupt practices personally and by agents are charged. Malcolm McDonald is the petitioner against Mr. Shaw. He prays for a scrutiny and claims the seat for the third district of Kings. He also alleges corrupt practices by Mr. Shaw and his agents.

GREEN PIGS.—While Mr. and Mrs. Thos. Snerron, of Dorchester, were absent from home on Wednesday, some miscreants went to their pig pen and painted their 3 pigs a bright green. One of the animals has since been very sick. The Spectator says a hard drinker going into the yard during the afternoon, and seeing the green pigs, said, "Green pigs! My God, I've got 'em again." He was much relieved to find the color was not real.

RECENT FIRES.—A barn and other out-buildings belonging to Mr. James Higgins, at DeSable, were destroyed by fire a few days ago. The origin of the fire is unknown. Loss about \$1000.

John S. McDonald's stable at Montague narrowly escaped destruction by fire an evening or two ago. A horse kicked over a lantern setting fire to a litter on the floor. The fire quickly spread to the loft, but it was extinguished before any serious damage was done.

A HISTORICAL RELIC.—Mr. William Hardy, Casimpee, dug up recently on his farm, facing Fox Harbor, Lot 6, a 3lb. iron shot, which had without doubt been fired in hostility from a brass deck gun of that calibre on board a cruiser as long since the as French occupation. The missile has evidently long laid buried in the bank and is somewhat corroded on the surface, but still retains its regulation weight of three pounds. The question arises, who was this shot fired at—smugglers, or Indians, or escaping prisoners? The finder has presented it to Mr. Hunter Durvar to place among his historic relics.—Agriculturist.

A GOOD DOLLAR'S WORTH.—The ladies of Grace Church want to show you what one dollar will do during the exhibition: Call at Philip Large & Son's showrooms on Great George St., put your horse safely in the barn, then pay to get into Bazaar..... 10
Get your dinner for..... 15
Get into Provincial exhibition for..... 50
Call at Bazaar on your way home..... 15
Get your tea..... 15

and when you get home you will say, "Well, that's the best dollars worth I ever had." Plenty of room for your horse in the barn and yard.
