He is married to the former Rachael Collins of Sturgeon. They have one son, Gary, five years old. Mr. and Mrs. Patrick Ready leave this weekend for Moncton to visit Mr. and Mrs. Gerald Ready and son before their departure for North Bay.

Only One Driving School Graduate Was An Offender

HAMILTON (CP) — The Hamilton Police Department has graduated 159 teen-agers within three months after the establishment of its driver training school. The school marks a new approach to the problem of young drivers.

Since it started in November every Hamilton 16-year-old seeking a licence has been required to graduate from the school before applying for a driver's permit. Two night classes of 2 1/2 hours each, held in the same week, comprise the training course.

"The course is tough," Sergeant Kenneth Skerrett said. "But 159 kids of 175 who have enrolled have graduated, and their average mark on the tests has been 87 per cent. Of those who failed, a good proportion had faulty glasses or faulty eyesight and were sent home with an invitation to return when their trouble was corrected."

On Monday nights the teen-agers—boys and girls—are lectured on car construction and maintenance, and traffic bylaws. A question period follows when the youngsters may put forward a wide range of queries from details about careless driving to why police deplore "hot rods." A film, The Fundamentals of Safe Driving, takes the class on a hazardous cross-country trip.

NEWSPAPER MAN JAILED

WASHINGTON (AP) — Robert Shelton, 30, New York newspaper man, today was sentenced to six months in jail and fined \$500 for contempt of congress. The New York Times copy reader was convicted on two counts growing out of his refusal to answer certain questions when he appeared before the senate internal security sub-committee in January. One was whether he was a member of the Communist party.

GRADUATION NIGHT

Wednesday night, graduation night for most of the pupils, starts with a lecture on the highway traffic act and is followed by a film showing the operation of a police court.

Then come the tests. The reaction tester is a mock-up of a steering wheel facing a dashboard that has arrows pointing right and left and a red light. An accelerator and brake pedal complete the machine.

When an arrow flashes, the "driver" must twist the wheel in the appropriate direction; flashing of the red light calls for braking. The time he takes to react is measured. Most are successful at the second or third attempt.

The orthorator, a light box in which miniature road signs and symbols are displayed, accounts for some rejections because of defective eyesight or faulty glasses. The main hurdle is a tough

Activities Reviewed By City Health Officer

"An obvious move towards socialized medicine is gradually taking place and we are only a short step away from complete state medicine," states Dr. W. L. MacDonald, City Health Officer, in his annual report submitted to the City Council on Tuesday evening. "When we consider the fact that mental illnesses, tuberculosis, infantile paralysis, inoculation clinics and numerous other ailments are now treated free, we realize how near complete coverage is approaching."

"As to whether this is good or bad is not my position to state, but I merely state this, because of the fact that the Health Department has done a tremendous amount of work in Charlottetown in the past number of years. As you can see by the separate report that you have had

considerable difficulty in the past month and a half with water contamination. This in part was due to the low amount of chlorine put into the water at different stations but the main cause that we had down Queen Street area was finally solved by a process of elimination rather than by actually finding out what the underlying cause of the contamination was. We are still guessing as to the underlying cause of the contamination there, but all our water reports for the past four weeks have shown the water in Charlottetown as a whole and Queen Street area in particular to be negative of bacteria.

Restaurants have been inspected and a great deal of carelessness has been taking place in the handling of food in our restaurants, but we feel that by the process of education we can eliminate a great deal of the trouble that is present from this source. It will also be thoroughly inspected and it has been my feeling for some time that barber shops should be included in this, but it is going to be a very difficult problem to enforce cleanliness in barber shops.

"In all then, sir, my report on the whole is a favourable one, and the health of our citizens in Charlottetown in the past year has been exceptionally good."

AMONG THE FARMERS

Federation of Agriculture Newsletter

EDUCATION CONFERENCE

Plans are now underway for the holding of a national conference on education — likely in March 1958.

The Canadian Federation of Agriculture at its recent annual meeting decided to participate in and become one of the sponsors of the conference which will be an ambitious attempt to focus the eyes of the nation on its educational problems. Farm people are particularly concerned as the rural areas recognize that modern income and population trends bring new educational problems in their wake.

POULTRY COMMITTEE

Troubles in the egg market reflected by prices not in line with the support price indicate at least a partial breakdown in the method of supporting eggs and lead to a decision by the CFA Annual meeting at Winnipeg to appoint a special committee to work with the proper authorities in devising a more reliable plan for protecting egg producers from low prices.

The present system does not guarantee any set price to the producer unless the handler is prepared to offer them to the Price Support Board which undertakes at the end of the season to, (if there is any surplus) buy the eggs in crates, oiled and in storage on the basis of 39 cents a dozen for Grade A Large. In this province the system should return a minimum to the farmer of between 30 and 32 cents if the handler offers them to the Board. However, if the handler does not offer them to the Board he is free to pay any

GORDON COMMISSION

"Hours of work, both in agriculture and in the business sector of the economy, have been declining and we expect these trends to continue. Average hours per week per man in agriculture are predicted to fall from 55.3 in 1955 to 43.75 in 1960, and in business, to fall from 41.3 in 1955 to 34.3 in 1960.

"Output per man-hour has been increasing more rapidly in agriculture than in any other part of the economy, although it is still considerably lower than in most other sectors. An important reason for the rapid increase has been the mechanical revolution that has been taking place in Canadian farming. Since it seems that agriculture will continue to increase over the next 15 years at a high rate, although not so remarkable as has been the case during the past decade. There will be of course be other technological advances made in agriculture; and for that reason we are also assuming a substantial rise in productivity during the last ten years of the period under consideration. But in our opinion the rate of increase will be somewhat slower because the production of meat will become relatively more important towards the end of the forecast period and it is impos-

Coming Events

SR. MAJOR JOHN NELSON MRS. SR. MAJOR J. NELSON
S. A. DIV. COMMANDERS MEET

Sr. Major and Mrs. John Nelson, Divisional Commanders of The Salvation Army in New Brunswick and Prince Edward Island will pay their first visit to the Island this week-end February 2nd to 4th.

Major Nelson has been an Officer in the Salvation Army for thirty years serving ably in various capacities and at various places. Prior to World War II he was a Field Officer in Manitoba, Saskatchewan and British Columbia. During the war he served five years with the RCAF. Red Shield Auxiliary Services in Canada, England and India.

Then followed five years of missionary service with Mrs. Nelson and the family in Jamaica, B.W.I., and return to Canada and Field Work in Ontario. Before his appointment in December to the Maritimes he was attached to the British Columbia South Division in charge of Salvation Army work amongst young people. Major and Mrs. Nelson, assisted by Lieutenant Robertson, will conduct special meetings at The Salvation Army in Charlottetown during their visit.

HAMPTON

Messrs. Murchison and Harvey MacEachern returned from Halifax on Jan. 25. Harvey reports that his wife underwent a successful operation at Victoria General Hospital on Jan. 24, and is now slowly progressing on the road to recovery.

Expressions of sympathy are being conveyed to Mrs. George Heffell of Summerside, in the death of her sister Mrs. B. C. Vedder, who died of cancer of the breast on Jan. 18. Mrs. Vedder was a daughter of the late Mr. and Mrs. D. A. MacKenzie of Tryon, and well known in this district.

Springfield J. A. Presents Concert

The Junior Auxiliary of St. Elizabeth's Anglican Church, Springfield, held a very enjoyable Christmas party for their parents and friends at the home of their leader, Mrs. Herbert Proffitt.

All joined in the J.A. Christmas service which was carried out by the Juniors and gave a glimpse of their missionary endeavour, pledges and aims.

Deputy Mayor in Office Illegally

PICTOU, N.S. (CP) — This Northumberland Strait town's deputy mayor, John A. Greenough, was found guilty, Monday of holding office illegally.

Magistrate W.A. Richardson fined him \$10 plus \$3.50 police court costs, with the alternative of 10 days in jail, on a charge of retaining his town council seat after being disqualified.

Councillor Arthur L. Dalton, who laid the charge, contended the deputy mayor disqualified himself by entering into a contract with the town and accepting payment from the town treasury.

Mr. Greenough's lawyer, T. H. Frazer, said he will appeal the conviction.

Use Of Cigarets Shows Increase

ROME (CP) — More people than ever before are puffing away at cigarettes throughout the world, the Food and Agriculture Organization says in its monthly bulletin published Wednesday.

In Canada where flue-cured tobacco is the most important part of production total leaf output was up 25 per cent in 1956 compared with the previous year the bulletin said. It did not give comparative figures however.

About the only result of recent scares from medical reports that connected smoking with cancer has been an increased use of filter-type cigarettes.

Electrical Contracting

Repairing light fixtures, motor rewinding and repairs, washing machine repairs. We sell and service electrical appliances. Free pick up and delivery.
