members of the conservative party, not being able to perceive any leader of the liberal party who would be more able to carry out the Queen's desires, but he had not omitted to invite the assistance of some of those members of the liberal party who had been instrumental in defeating the late government. Those gentlemen, however, had decided not to take office with him, although they had promised his ministry an impartial and independent support.

In giving a general statement of the views of his government, Lord Derby said that in foreign affairs he held it to be the duty of England to maintain amicable relations with all foreign countries, to avoid entanglement with foreign disputes, and to abstain from all vexatious and irritating interference or advice. With respect to the unhappy war in Central Europe, the government would maintain a perfect neutrality, but would be prepared, in conjunction with other powers, whenever a favorable opportunity presented itself, to offer its good offices for the restoration of peace. Commending the action of the United States government in relation to the Fenian inroad into Canada, Lord Derby paid a tribute to the loyalty and devotion displayed by the Canadian volunteers, adding an expression of his desire that a confederation of all the North American colonies might soon be accomplished. Referring to the question of parliamentary reform, he said, he had never been hostile to the principle of such reform, but he must hold himself and his colleagues free and unpledged upon that question. He had assisted in carrying the reform act of 1832, and in 1858, although he could not admit any pressing urgency, he had been a party to a measure which was intended to remedy existing anomalies, and to extend the franchise to classes which were qualified to exercise it. He feared, however, that those who were most clamorous for reform were those who now desired to effect still greater changes in our constitutional system, and any moderate measure would, therefore, not satisfy the demands that were made. Upon that point, he repeated, he must reserve a freedom of action, but there were several subjects to which the attention of the government would be immediately devoted, including a reform of the bankruptcy laws and an amendment of the administration of the poor laws. With regard to Ireland, an honest, impartial policy would be adopted, and, as soon as circumstances should safely allow of such a course, all exceptional laws in that Island should cease.

Lord Russell, after complimenting Lord Derby on the temperate tone of his statement, proceeded to vindicate the course he had pursued upon the question of parliamentary reform, justifying the introduction of the measures of the present session by the general demand that was made throughout the country for some such extension of the franchise. Having been defeated upon an important point, the late government felt it to be their duty to resign, and he was glad to find that they were to be succeeded not by a government on a "broad basis," which he could not distinguish from a coalition government, but by one composed of members of the great party who had mainly contributed to the present change of affairs. A government so formed was entitled to a fair consideration to time for maturing their measures, and they ought not to be called upon before next session to declare any particular course of action.

The Jamaica committee have determined to prosecute Governor Eyre for the execution of Gordon.

ALARMING PROGRESS OF THE CHOLERA.

There is no disguising the fact that cholera is raging to an alarming extent in New York. A New York despatch says:—"The facts relative to the number of cases on Hart's Island are so appalling that publicity is denied." This state of things at our own doors is alarming at any time; but, at this season of the year, it ought to startle us into action—to setting our house in order. It has been clearly demonstrated that cholera can be disarmed of most of its terrors, if proper measures are taken to meet it. We fear the fact—now so well understood in Europe—is not fully appreciated on this side of the Atlantic—that nearly all the dangers which Asiatic cholera present arise from the want of thoroughly purifying the sewerage and cesspools in towns and cities. The effects of this epidemic can always be traced in the fearful ravages it makes in the abodes of the poorer classes in large communities—among the inhabitants of cellars and backyards—of alleys and back streets. Many, far too many of such localities exist in our midst—diffusing their deadly poison into the atmosphere which thousands are obliged to breathe. What has been done to purify these districts? The arrival of the ill-fated steamship England startled us into momentary action, but the danger once passed, all efforts at cleansing the city ceased; and, alarming as the statement may be, it is none the less true, that *the city of Halifax was never riper for diffusing and fostering the cholera than at this moment*—with the extreme heat of midsummer acting on the accumulated filth of years that exists within the city, sending forth its deadly gasses to generate and feed disease.—*British Colonist, (Halifax) July 24.*

THE NEWS FROM EUROPE.

By the arrival of the *Scotia* at New York, we have European news up to the 15th inst. The *Great Eastern* had made an auspicious and very successful beginning in laying the Cable. According to the latest accounts 150 miles of it had been laid down, and everything so far had been as satisfactory as could be desired. Should no accident take place, we may hear within two or three days that telegraphic communication between Europe and America has at length become an accomplished fact. The operation is a most delicate one, and is beset with unseen dangers; but so minute have been the precautions taken, so great the experience acquired by repeated trials, that our hopes of success this time are very sanguine. Should these hopes be realised, it is just possible that the wire stretching from Valentia to Newfoundland may tell us something very decisive about the war or peace prospects in Germany, by the time of our next issue. This, perhaps, is being rather too sanguine; but at all events a few days will now decide between success or failure.

From the latest accounts the indications are that Prussia will reject the proposed armistice. Nothing appears to be certainly known as to whether France will enforce mediation, or leave events to take their course for a while longer. When we consider that Austria has in the field about 700,000 men, and that her defeat, great as it was, certainly did not take from her more than 40,000 troops at the utmost, we should suppose that her power of resistance must still be immense. But we fear the shock has paralysed her, and the generalship of Benedek has not been at all equal to his reputation. If France should hold back the worst may be feared for Austria, for one crushing defeat is almost always the precursor of many. It is seldom indeed that a beaten army achieves victory.

We are glad to observe that the British army are about to be supplied with breachloaders. The Prussian campaign has proved that no amount of devotion or bravery could stand against the effect of the needle gun. The advantage, however, will only be temporary, for should the war last three months longer, there would be no difficulty in arming the Austrian troops with the same or an equally effective weapon. The question is, will Prussia allow the time? At the present moment Austria is nearly as helpless as Great Britain would have been three years ago, had she been obliged to give battle with a wooden fleet to an enemy in possession of an iron-clad navy. In half a day the glory of a thousand years would have vanished, in spite of any amount of personal bravery. And such, at this hour, is the perilous position of the Empire of Austria.

Additional news per *Scotia*, under our telegraph heading, shows that Russia is not an indifferent spectator of what is going on.—*Halifax Evening Express, July 25.*

EXAMINATION AT THE PRINCE OF WALES COLLEGE.

The annual examination of the pupils in the Prince of Wales College, occupied the greater part of Thursday and Friday, the 12th and 13th. We were, owing to other engagements, prevented from being present, but we are glad to learn that it was a very successful, and, indeed, brilliant examination. For the list of successful competitors we are indebted to the *Bulletin*:—

His Excellency the Lieut. Governor, who has always taken a lively interest in the prosperity of Prince of Wales College, distributed the prizes among the successful competitors as follows:

After distributing the prizes His Excellency made a few remarks, expressive of the deep interest he feels in the institution,—the marked improvement visible in every department since the last Annual Examination,—and the hope that the young men who had so creditably acquitted themselves would be stimulated by the exercises in which they had just been engaged to still greater exertion. The Hon. the Chief Justice also addressed the students, reminding them of the marked distinction obtained by the students of Prince of Wales' College in several Scottish and Provincial Universities, and urging them to redouble their exertions, not simply on their own account, but in order that additional lustre might be reflected on the same noble institution. Notice of the commencement of the next Term, it was intimated, would be duly given through the Newspapers. The Term was then closed, and the young men "broke off," apparently highly delighted to be once more set at liberty to enjoy their long Summer's vacation.

ANNUAL EXAMINATION AT MISCOUCHE CONVENT.

The second Annual Examination of the classes at this school came off on Monday last, in the presence of about five hundred persons from different parts of the Island and from the neighboring Provinces. During the past year between eighty and ninety pupils have been in regular attendance; these are the children of French, Irish, Scotch and English parents—several of them belonging to New Brunswick. The various branches of study, including the English and French Languages, Geography, History, Elocution an Grammar, together with the politer accomplishments of Music and Embroidery, have been prosecuted by the majority of the *eleves* with praiseworthy effect; the correct and ready answers, which the examination of the classes in these departments elicited, showed how competent are the good ladies who superintend the Institution, to impart to the tender mind the lessons of a useful and refined education.

His Lordship the Bishop of Charlottetown, and several clergymen from New Brunswick, graced the occasion with their presence, and took a prominent part in conducting the Examination, which was quite lengthy—extending from nine o'clock in the morning till four in the afternoon. Some of the leading gentlemen from Summerside and surrounding localities were also amongst the spectators.

At the close of the Examination, the Bishop distributed the prizes, and then addressed the children, their parents and friends, congratulating them upon the success with which the second year's course has terminated, and expressing much gratification in witnessing the prosperity of the Miscouche Convent. Brief complimentary addresses were also delivered by other Rev gentlemen, including the venerable Priest of the Parish, who seemed delighted with the spectacle of youth, health and intelligence, that surrounded him. After this the *Addresse en Francais et en Anglais*, was spoken alternately by a French and Irish girl, and then *Le chant du depart* brought to a conclusion this pleasant performance.—*Summerside Progress.*

We regret to learn that Morin Lowden, Esq., of Charlottetown, who has been on a visit in Pictou, for the last few days, had one of his legs broken on Tuesday afternoon last. He was driving along the street in a wagon, when the horse becoming restive, kicked the dashboard, striking Mr. Lowden below the knee, shattering the bone considerably. Medical assistance was at hand, and the fracture has been reset. We sympathize with our friend, and hope he may soon recover.—*Pictou Eastern Chronicle, July 26.*

LATEST NEWS FROM EUROPE.

FATHER POINT, July 25th.

Hibernian, with Liverpool dates to afternoon 16th, arrived.... Liverpool 16th, noon.—The latest reports from the Great Eastern were quite favourable. Steady progress was being made. On Sunday afternoon she had paid out 283 miles, distance run, 263.... Nothing has transpired concerning the peace negotiations. Several French papers have received government warning for publishing false news. Sanguinary conflicts took place on the 14th between the Prussians and the Federals near Aschaffenburg; the former were entirely successful. The town was in flames and the Federals were retreating. The Prussians were marching on Frankfort, which town the Federal troops had evacuated and the diet removed to Augustenburg, where the foreign representatives were expected to assemble.... The head-quarters of the Prussian army under the King had been advanced to Brunn. Iglan was reported to be in possession of the Prussians. In the diplomatic circles of St. Petersburg it was declared that Russia had no present intention of abandoning its policy of neutrality, and that only in the case of the active intervention of a foreign power in the German conflict would she make declarations and take up an attitude corresponding with her interests. The Moscow Gazette expresses its entire sympathy with the Italian cause, and favors the annexation of Rome to Italy..... No markets.....Gold 149¾.

NEW YORK, July 27.

It is proposed to close all the districts in this city infected by cholera. There were no new cases on Governor's Island yesterday, and all the old ones were considered hopeful. Diarrhœa still prevailed largely among the men. The cholera on David's Island was increasing. There were 15 new cases and 3 deaths on Wednesday, in the 12th ward.

BROOKLYN, N. Y., 27th.

The disease is still on the increase—eight cases and one death being reported yesterday.

The *Herald's* Ottawa despatch says the Canadian Parliament has authorized the Canadian Government to raise an indefinite number of troops....Gold 150.

NEW YORK, July 27.

The President, yesterday, sent a message to the House, in reply to the resolution requesting him to take steps with a view to the release of Fenian prisoners. He encloses a communication from Secretary Seward, who says that the representations which have been made to the British Government have been received, and taken into consideration by the Canadian authorities in a friendly spirit. On the 11th June there was transmitted a communication to Sir Frederick Bruce, in which Secretary Seward expressed the confident expectation that no proceeding that shall be authorised, and be in conformity with the law, will be taken against the captured invaders of Canada.

STRANDING OF A STEAMSHIP ON SABLE ISLAND.—The British steamship *Ephesus*, from Norfolk, Virginia, on the 1st inst., with a cargo of cotton, rosin, tobacco, and other articles of Southern produce, bound to Liverpool, G. B., went ashore on Sable Island, during the prevalence of a fog, on the 6th inst., and at last accounts had commenced to break up. On Thursday *morning* last seven men, out of a crew of forty, embarked at the scene of disaster in an open boat for the purpose of reporting the casualty to the Board of Works, and arrived here about noon yesterday. This was a venturous voyage in so frail a craft. The men report that the boat leaked so badly that sometimes she was half full of water. The crew hailed some fishing vessels, but the latter did not heave too. It appears that soon after the open boat left the steamship, the Government schooner *Daring* made her appearance at the Island, took the majority of the remainder of the crew on board, and sailed for this port, at which she arrived yesterday afternoon. It is feared that a considerable quantity of the *Ephesus's* valuable cargo will be lost.—*Halifax Chronicle, July 25.*

The Wesleyan Sabbath School Anniversary Tea, on Wednesday last, was a most happy festive occasion. The hundreds of children present enjoyed themselves to their hearts' content, and we feel assured that many of them, in singing the praises of the Redeemer, felt it to be a foretaste of that time when they shall join in Allelujahs of those who surround the Throne.—*Pat.*

PERSONAL.—Among the passengers of the *David Cannon*, which sailed on Saturday last for Liverpool, G. B., was Mr. L. H. Davies, Barrister, who proceeds to London to complete his studies previous to being admitted as an Attorney of the Supreme Court of this Island. He carries with him our best wishes.—*Herald.*

The revenue of the United States Government for the last fiscal year was six hundred and twenty millions of dollars. Of this revenue over two hundred and fifty millions of dollars were wanted in corrupt jobs by the present Congress.

A New York despatch states that the cholera is increasing on Governor's Island. On Hart's Island the average number of cases is from twenty to thirty daily.

Two houses on Carmarthen street, St. John, owned by Messrs. James Ferguson and James Adams, were almost totally destroyed by fire on Monday morning last.

Demerara advices report the yellow fever as raging rather severely in Georgetown. Messrs. Luckie Bros., one of the most extensive business houses in Georgetown, it is reported, has failed for £80,000; and another firm of considerable importance was about to suspend payment.

BROWN'S BRONCHIAL TROCHES Clear and give strength to the voice of SINGERS, and are indispensable to PUBLIC SPEAKERS.

"*I have never changed my mind respecting them from the first, expecting to think yet better of that which I began thinking well of.*"

REV. HENRY WARD BEECHER.

HOLLOWAY'S PILLS.—Worn out sufferers may hope for relief from these purifying and strengthening Pills after physic and physicians have failed to effect a cure. In all disorders of the liver and diseases of the kidneys these Pills will be found especially useful in re-instituting order and restoring health. Holloway's Pills clear away obstructions, remove poisonous particles from the blood, secretions and system generally, give purity and regularity to the circulation, tone and power to the stomach, energy and vividness to the brain. Holloway's Pills can be confidently recommended as restoratives of constitutions shattered and broken up by excessive mental labour, intemperance, inordinate indulgence, or other hardships which make the young man old.

WORDS OF VITAL INTEREST.

Will the thousands who read columns of frivolous verbiage every day devote *five minutes* to the perusal of a few facts which concern them nearly? Our text is *Health*, and we will put our commentary into a nutshell. *Weakness* is indirectly the cause of all sickness; for if nature be strong enough to resist the morbid influences which produce illness, of course they are powerless. Seek strength therefore. Invigorate and regulate the system. When the quicksilver ranges from 80 to 96 degrees in the shade, the most athletic are enfeebled, and the weak are prostrated. It is at such a time that such an invigorator as HOSTETTER'S STOMACH BITTERS is urgently needed. What are the effects of this rare Vegetable Tonic? Would that all who have known its benefits could condense their experience into this paragraph. They would tell the healthy, to protect their health they must use this great safeguard against the debilitating influences. They would exhort the weak to discard all unmedicated and impure stimulants, and cling to the wholesale and unfailing tonic and alterative as the shipwrecked mariner would cling to a raft in a *stormy sea*. They who would of dyspeptic pangs be relieved, of appetite restored, of shattered nerves restrung, of headaches cured, of disordered functions regulated, of hypochondria dissipated, of miasmatic diseases baffled, of fever and ague cured, of liver complaints arrested, of heat, privation and toil defied, of hope reanimated, and cheerfulness restored. Such are the effects of HOSTETTER'S BITTERS.

BROWN'S BRONCHIAL TROCHES

A Slight Cold, Cough, Hoarseness or Sore Throat, which might be checked with a simple remedy, if neglected, often terminates seriously. Few are aware of the importance of stopping a Cough or Slight Cold in its first stage; that which in the beginning would yield to a mild remedy, if not attended to, soon attacks the lungs. Brown's Bronchial Troches were first introduced eleven years ago. It has been proved that they are the best article before the public for Coughs, Colds, Bronchitis, Asthma, Catarrh, the Hacking Cough in Consumption, and numerous affections of the Throat, giving immediate relief.

Public Speakers & Singers *will find them effectual for clearing and strengthening the voice.*

Sold by all Druggists and Dealers in Medicine, at 25 cents per box.
