Poetry.

SONG.

"One story's good till another is told."

BY CHARLES SWAIN.

There's a maxim that all should be willing to mind,
'Tis an old one—a kind one—and true as 'tis kind;
'Tis worthy of notice wherever you roam,
And no worse for the heart, if remembered at home!
If scandal or censure be raised against a friend,
Be the last to believe it—the first to defend!
Say, to-morrow will come—and then time will unfold
That *"one story's good till another is told."*

A friend's like a ship, when with music and song
The tide of good fortune still speeds him along,
But see him, when tempest hath left him a wreck,
And any mean billow can batter his deck;
But give me the heart that sympathy shows,
And clings to a messmate, whatever wind blows;
And say—when aspiration, unanswered, grows cold—
Wait—*"one story's good till another is told."*

SING TO ME, LOVE.

Sing to me, love! I'm sad to-night,
A weight of grief is on my breast,
And thy sweet voice alone can charm
My spirit to its wonted rest.
There's music in the song of birds,
Oft times they make rich melody,
But music from thy lips, my love,
Is sweeter than all else to me.

Sing to me, love, and let thy voice
Kiss sweetly in some favourite strain,
For music has a holy power
To charm my spirit from its pain.
And when the stars begin to glow,
How sweet the quiet hymn of eve!
It whispers of some far off land,
Where we at last shall cease to grieve.

Varieties.

A MISER'S LEGACY TO QUEEN VICTORIA.—A Mr. Neild, recently deceased, has bequeathed to Queen Victoria nearly the whole of his property. It consists chiefly of land, scattered in various counties, and is valued at half a million sterling. Neild was a barrister at law, and died in Chelsea, aged seventy-two years. He was possessed of an immense fortune, but was of very eccentric and penurious habits. At the death of his father, thirty years since, he came into possession of about $1,250,000, which had not been touched up to the period of his death. The deceased was never known to wear a great coat. He usually dressed in a blue coat, with metal buttons, which he prohibited being brushed, as it would take off the nap and deteriorate its value. A few days before his death, the deceased told one of his executors that he had made a most singular will; but as his money was his own, he had done as he pleased with it. The executors, are the Keeper of the Privy Purse for the time being (Colonel Phipps), and Mr. J. Stevens, of Willesborough. After bequeathing a few trifling legacies, the deceased has left the whole of his immense fortune to "Her Most Gracious Majesty Queen Victoria, begging Her Majesty's most gracious acceptance of the same, for her sole use and benefit, and of her heirs," &c. The property is estimated at upwards of $2,500,000. For some years before his death, Mr. Neild scarcely allowed himself the common necessaries of life; and has left a poor old housekeeper, who was with him for more than forty-six years, without the smallest provision or acknowledgment for her protracted and far from agreeable or remunerative services.

DREAMS.—Dreams usually take place in a single instant, notwithstanding the length of time they seem to occupy. They are, in fact, slight mental sensations, being less or more intense, painful or agreeable, according to certain physical conditions. On this subject the following observations, occur in Dr. Winslow's Psychological Journal:—"We have in dreams a true perception of the lapse of time—a strange property of mind! for if such be also its property, when entered into the eternal disembodied state, time will appear to us eternity. The relations of space, as well as of time, are also annihilated; so that while almost an eternity is compressed into a moment, infinite space is traversed more swiftly than by real thought. There are numerous illustrations of this principle on record. A gentleman dreamed that he had enlisted as a soldier, joined his regiment, deserted, was apprehended, carried back, tried, condemned to the usual preparations, a gun was fired; he awoke with the report, and found that a noise in the adjoining room had, at the same moment, produced the dream, and awakened him. A friend of Dr. Abercrombie dreamed that he had crossed the Atlantic, and spent a fortnight in America. In embarking on his return, he fell into the sea, and awaking in the fright found that he had not been asleep ten minutes."

PRACTISING FOR A VOYAGE TO AUSTRALIA.—The other day, some gentlemen cruising on a part of the Irish coast, observing that about the same hour every day a boat, containing two men and a woman, landed its passengers on the shore, and after a short time returned with them, inquired the reason for this daily excursion. "My man," said one, "what is it makes you come here every day? Is it that you like it?" "Oh, your honors, not at all, at all," was the reply; "but faix, your honors, the wife and me 's going out soon to Australy, and we were just practising the say sickness, that we may be used to it when we start." "Well, and do you find yourselves improving?" "Ah, shure, your honors, the wife's sick every day; but she's getting on purtily, anyhow." So the worthy couple were left to qualify themselves for emigration, by practising to *say* sickness."

DON'T GET INTO A HURRY.—A gentleman was separated the other day from his wife, in a most awkward manner, by simply being in too great a hurry. The gentleman alluded to, together with his wife, evidently had intended taking the steam boat for Albany, but arrived at the wharf, just as the boat was taking her departure. The simple-minded man, losing all judgment and self-command in his hurry to get on board, gave a tremendous bound, and gained the deck, leaving his better half behind, and didn't discover his mistake until, in scanning the space over which he had leaped, he discovered his wife standing on the dock.

TO PREVENT A COW FAILING IN HER MILK.—Wash the cow's udder and teats with pure cold water before milking, and then milk her morning and evening as dry as possible; negligence in this latter precaution is one of the causes of cows failing in their milk. The cow should, if possible, be always milked by the same person; and while the process is going on, a small quantity of hay should be placed before the animal. This furnishes employment for the jaws, and draws her attention from what is going on, and the milk is, in consequence, yielded freely.—*Am. Vet. Jour.*

SHORT AND USEFUL RULE.—*Solid feet multiplied by* 45, *and divided by* 56, *gives bushels of* 2150·2·5 *inches each.*

Example.—How many bushels in a wagon-bed, box, or granary, eight feet long, four feet wide, and two feet deep?

Solution.—Eight, four, and two, multiplied together, make sixty-four solid feet, which, multiplied by forty-five, and the product divided by fifty-six, gives 51 3-7 bushels.

THE IRON AGE.—When we are drawn by iron horses, on iron roads, construct iron towns, build iron ships, sleep on iron beds, sit in iron chairs, drink from iron fountains, and those of us who have any money keep it locked up in iron safes, and those who haveth not are locked up in iron jails, may we not with propriety call this the "age of iron?"

When the Hindoo priest is about to baptize an infant, he utters the following beautiful sentiment:—"Little babe, thou enterest the world weeping, while all around thee smile; contrive so to live, that you may depart in smiles, while all around you weep."

CONUNDRUMS.—Why is a philosopher like a cow? Because he is a ruminating animal.

Why is a chemist like a wit? Because he is furnished with good retorts.

Army Contract.

SEALED TENDERS will be received at this Office, on SATURDAY, the 6th November, 1852, until noon, for the undermentioned Supplies, viz:—

FRESH BEEF.

Such quantities of Ox or Heifer Beef, of the best marketable quality, as may be required for Her Majesty's forces in Prince Edward Island, for the term of one year, commencing 1st of April, 1853 The Meat to consist of fore and hind quarters, and to be subject to the inspection and approval of the Commissariat Officer.

The Tenders (printed Forms of which may be had at this Office), to state the price per 100lbs., in Sterling, in words at length, to be accompanied with a guarantee from two persons of known responsibility, in the penal sum of £300 Sterling, for the due performance of the Contract. Payment will be made monthly in Dollars, or British Specie.

BAKING BREAD.

For one year, from the 1st April next, for the Troops and Departments, in such quantities as may be required; the Tenders to state the number of pounds of Bread that will be delivered for every 100 pounds of Flour provided by the Commissariat—the Flour to be taken from the Commissariat Magazines, and the Bread to be delivered at the respective Quarters of Officers and Troops, &c., in the Garrison, at the Contractor's expense, he being allowed the empty barrels. Two approved securities will be required in the penal sum of £100 Sterling each, for the due performance of the Contract.

FIREWOOD.

For one year, from the 1st April next, in such quantities as may be required, (say 200 cords.) It is to be distinctly understood that the Firewood is to consist of Beech, Black and Yellow Birch, Ash, and Rock Maple; and that no crooked or rotten Wood will be received, and a sufficient supply to be kept at all times in the Fuel Yard, from such Contractor's name. Two responsible persons will be required to give security for the due performance of this Contract.

The Firewood to be piled six feet high.

Payment will be made after the 1st April.

The Contractor will be allowed to deliver the Wood into the Fuel Yard, during the present winter.

FORAGE.

For one year, from the 1st April, 1853, for three Horses.—The Tenders to state the rate *per* ration, consisting of

10 lbs. Oats
14 " Hay } Of the best quality.
6 " Straw

to be subject to the usual commutation of Bran for Oats for sick Horses.

To be delivered two days in each week, at the residences or Parties entitled to receive the same.

TRUCKAGE.

For one year, from the First of April next, for such quantities of Firewood as may be delivered from the Fuel Yard for Troops and Departments, at per cord.

Firewood to the 2 Garrison Guards, } at per load or trip
whenever required

The Truckage to both Guards to be considered one Load or Trip.

For conveyance of Troops, Baggage, Ordnance and Commissariat Stores, &c. to and from the different Wharfs to the Barracks, or elsewhere, in the Town, at the load of not less than 6 cwt., Flour, &c., a fair average load.

All Tenders to state the price or rate in Sterling.

Persons desirous of entering into any of the above Contracts are requested to call at this Office, and make themselves fully acquainted with the precise nature of the duties they will have to perform, in the event of their Tenders being accepted.

The printed Forms of Tender can be had at the Office. Written Tenders will not be received.

ROBERT BOOTH,
Dep. Asst. Com. Genl.

The whole Estate may be had in one, or the Mill by itself, and the Land in tracts of any size to suit Leaseholders or Purchasers.—For particulars, apply to

WILLIAM CURTIS,
on the premises.

Curtisdale, Aug. 23, 1852.

PATENT ARTIFICIAL SLATE,

And Unchangeable Metallic Paints:

PROOF AGAINST FIRE & WATER!

Manufactured by the Patentee, in Colchester, Nova Scotia.

THE ARTIFICIAL SLATE is the product of a mixture of mineral substances known to be the best non-conductors of heat as well as the most indestructible; the Chemical affinity of which combverts the whole into a permanent stone, which is called *Patent Slate—Proof* against FIRE and WATER. Thus the laws of nature are made to accomplish results as surprising as they are useful, by rendering Wood, Fabrics as durable as brick or Stone, and less pervious to moisture, and consequently preventing decay and destruction from corroding influences hitherto supposed unattainable.

The principal ingredients are Alumina, Silica and the Oxides of Iron. The adhesive quality of the latter not only binds and attracts the particles together, but the substance covered also. The longer exposed to the weather the more powerful the attraction, and consequently the harder the *Slate*. As various shades of colour are obtained, Brick buildings may be made impervious to moisture, and the fashionable colours of either *Free Stone* or *Granite*. The oil must be evaporated by the action of the weather before it is *Fire proof*, which will take from nine to twelve months.

The METALLIC PAINTS, *Purple* and *Red*, are offered as *Weather and Water Proof solely*. Their base being Iron, secures them from Galvanic action so fatal to lead and other Paints on *Iron* work—and their chemical combination makes it impossible, that any change should take place from atmospheric influence or the action of Sea and Inland Waters, rendering them the best coats of this Ports and Tidal Harbours. They surpass all Paints yet discovered in *Cheapness and Durability*, which render them, pre-eminently adapted to the covering of all kinds of Work, such as *Shipping, Mills, Bridges, Steam Machinery, Railway Cars, and Iron Railing*. The METALLIC PAINTS have been analysed by Professor Hays of Boston. The following is an extract from his Certificate:—"A permanent pigment, the mineral must rank with the most *indestructible and unchangeable* bases. For covering Metallic Ware, its composition shows that it is eminently fitted.

(Signed) AUGT. A. HAYS, *State Assayer.*"

Directions.—Artificial Slate. Mix the powder with pure Boiled Linseed Oil and a little Spirits Turpentine to the consistency of very thick Paint, and apply with a common Brush, being careful to keep the mixture well stirred while putting it on. One pound will cover ten square feet with two Coats.

If Shingles have been on for years, it will be necessary to sweep off the moss and lint with a stiff broom; two or three coats of this material will make a perfect Slate Roof, proof against Fire and Water.

FREDERICTON, N. B., Nov. 13, 1850.

MR. J. W. IRISH.

DEAR SIR,—Please send us two more barrels of your Artificial Slate. We have seen some of the good effects of it at the last fire. Some of the Roofs covered with it did not catch at all, and where the walls were burnt some of the roofs came down in one piece, and others were the means of saving the building, especially one roof alongside of the Bank B. N. A., which also was one means of saving the Bank.

Please see that it is on board of the first boat, as it might be neglected and stored.

Your obedient Servants.
STEWART & NEILL.

ST. JOHN, N. B., July 20, 1850.

JOHN ROSS, Esq., *Patentee of the Purple Metallic Iron Paints.*

SIR,—I have just painted a new Ship with your Metallic Iron Paint, and I have much pleasure in stating that I never painted a Ship with so small a quantity of Paint and Oil, and look so well. From its adhesive qualities and the manner it covers the wood, I have no doubt but it will be more durable and much cheaper than any other paint used for such purposes, and would recommend it to the public generally.

Yours, &c.
ROBERT G. MORAN.

ROSS' METALLIC PAINTS.—We have already called public attention to the high estimation in which the Metallic Paints, manufactured by John Ross, Esq., Truro, are held by those who have had occasion to use them. Certificates of a highly satisfactory character in proof of these articles of Provincial manufacture appear elsewhere, in this issue, and from information afforded by parties who have similarly applied them, we can safely endorse the opinions therein contained.—*Halifax Sun.*

2☞ The METALLIC PAINTS are mixed and put on like an ordinary paint.

JOHN ROSS, Patentee.

THE ROAD TO HEALTH!

HOLLOWAY'S PILLS.

CURE OF A DISORDERED LIVER AND BAD DIGESTION

Copy of a Letter from Mr. R. W. Kirkus, Chemist, 7 Preco Street, Liverpool, dated 6th June, 1851.

To Professor HOLLOWAY.

SIR,—Your Pills and Ointment have stood the highest on our sale list of Proprietary Medicines for some years. A customer, to whom I can refer for any inquiries, desires me to let you know the particulars of her case. She had been troubled for years with a disordered liver, and bad digestion. On the last occasion, however, the virulence of the attack was so alarming, and the inflammation set in so severely, that doubts were entertained of her not being able to bear up under it; fortunately she was induced to try your Pills, and she informs me that after the first, and each succeeding dose, she had great relief. She continued to take them, and although she used only three Boxes, she is now in the enjoyment of perfect health. I could have sent you many more cases, but the above, from the severity of the attack, and the speedy cure, I think, speaks much in favor of your astonishing Pills.

(Signed) R. W. KIRKUS.

AN EXTRAORDINARY CURE OF RHEUMATIC FEVER, IN THE VAN DIEMEN'S LAND.

Copy of a Letter inserted in the Hobart Town Courier, of the of the 1st March, 1851, *by Major J. Welch.*

Margaret M'Conigan, fourteen years of age, residing at New Town, has been suffering from a violent rheumatic fever for upwards of two months, which had entirely deprived her of the use of her limbs; during this period, she was under the care of the most eminent medical men in Hobart Town, and by them her case was considered hopeless. A friend prevailed upon her to try Holloway's celebrated Pills, which she consented to do, and in an incredibly short space of time they effected a perfect cure.

CURE OF A PAIN AND TIGHTNESS IN THE CHEST AND STOMACH OF A PERSON 84 YEARS OF AGE.

From Messrs. Thos. Son, Proprietors of the Lynn Advertiser, who can vouch for the following statement.—August 2, 1851.

To Professor HOLLOWAY.

SIR,—I desire to bear testimony to the good effects of Holloway's Pills. For some years I suffered severely from a pain and tightness in the stomach, which was also accompanied by a shortness of breath, that prevented me from walking about. I am 84 years of age, and notwithstanding my advanced state of life, these Pills have so relieved me, that I am desirous that others should be made acquainted with their virtues. I am now rendered, by their instrumentality active, and can take exercise without inconvenience or pain, which I could not do before.

(Signed) HENRY COE,
North Street, Lynn, Norfolk.

AN EXTRAORDINARY CURE OF THE GRAVEL, AND A MOST DANGEROUS LIVER COMPLAINT.

Copy of a Letter addressed to J. K. Hopkins, Esq., Sidney, New South Wales, dated February 25, 1851.

SIR,—A Mr. Thomas Clark, a settler at Lake George, was for a considerable time severely afflicted with a complaint in the Liver, together with the Gravel. His medical attendants, after trying all their skill, candidly told him that his case was hopeless, and any further effort useless. In this situation he commenced taking your Pills, and would terminate his existence, a friend recommended him to try Holloway's Pills, and as further hope he did so, the first dose gave him considerable relief, he therefore persevered in taking them according to the directions, and is now restored to perfect health. He will feel great pleasure in confirming this statement, or even make an affidavit to the same effect, should it be required.

(Signed) Wm. JONES, Proprietor of Goulburn Herald, New South Wales

WONDERFUL EFFICACY OF HOLLOWAY'S PILLS IN CASES OF DROPSY.

Persons suffering from Dropsy, either about the turn of life, or at other times, should immediately have recourse to these Pills, as hundreds of persons are annually cured, by their use, of this direful complaint in its different stages, when all other means had failed.
