

### Fear 5 Drowned On Line-Cutting Job In Quebec

AMOS, Que. (CP)—Three men were drowned and two others are believed to have suffered a similar fate while working on a line-cutting project along the Harricana river in isolated bush country 600 miles northwest of Montreal.

Police said bodies of three men have been recovered and the search is continuing for two others.

The drownings were believed to have occurred last week in the river, swollen by recent torrential rainstorms.

An aircraft dropped down at a pre-arranged meeting spot Saturday to pick up the men. But they did not appear.

A search was made of the area Thursday and an overturned canoe and two bodies were recovered. A third body was recovered Friday.

The men were identified as Julien Roberge, 17, Val d'Or, Que., Jean-Paul Dicaire, 19, Val-Senneville, Que., Marc Gratton, 36, Val d'Or, Gilles Robillard, 18, Val d'Or, Gaston Bastien, 18, Val d'Or.

The men were employed by contractor Jean Alix, who was given a line-cutting contract by Mining Corporation of Canada, Ltd.

The men were to rendezvous Saturday with a plane that was to fly them out.

When pilot Georges Tardif of Rouyn, Que., put the plane down at the pre-arranged meeting place he could find no trace of the men. Nearby he found an overturned canoe.

Tardif flew here and reported to provincial police that he could find no trace of the men.

Constable Andrew Frenette returned to the scene with Tardif and Thursday they brought out two bodies—those of Roberge and Dicaire. A third body was located Friday, but not immediately identified.

The men, in the bush for two weeks, were working in an area near the juncture of the Harricana and Turgeon rivers where mining discoveries have been reported recently.

### Jap Physicists For Pugwash

TOKYO AP — Two leading Japanese nuclear physicists left by air for Pugwash, N.S., Wednesday to attend an international conference on radiation effects opening July 8.

They are Dr. Shinichiro Tomonaga, president of Tokyo University of Education, and Dr. Iwao Ogasawa, professor at Tokyo's Rikyo (St. Paul's) University.

The conference will be attended by more than 20 specialists from the United States, Britain, Austria, France, the Soviet Union and Japan.

The two Japanese scientists will be joined at the conference by Dr. Hideki Yukawa, 1949 Nobel prize winner, who will leave here next Saturday.

### Drive out ACHES JUST RUB IN MINARD'S LINE OF PAIN LINIMENT

Very first use of soothing, cooling liquid D.D. Prescription positively relieves raw red itches—caused by eczema, rashes, scalp irritation, chafing—other itchy troubles. Creams, ointments, lotions, trial bottle must satisfy or money back. Don't suffer. Ask your druggist for D.D. PRESCRIPTION.

### BEDTIME STORIES

## Chatterer Looks Things Over

"He seldom will his actions rue Who knows beforehand what to do."

Chatterer, Like many other folks Chatterer the Red Squirrel likes an egg, or perhaps two or three eggs for breakfast. How many depends on the size of the eggs and the number he can get. He not only likes them for breakfast, but likes them any time he can get them. Of course it is only in the springtime when his feathered neighbors are nesting that he can get eggs. So at that season of the year he spends much of his time looking for nests and opportunity to rob them of the eggs they may contain. So Chatterer has no friends among his feathered neighbors.

Chatterer was living in the Green Forest just a little way in from where the Old Orchard is divided from the Green Forest by a narrow old road. He spent more time in the Old Orchard looking for nests than he did in the Green Forest. He knew that more birds were nesting there. Of course that meant chances of finding eggs.

Early one morning Chatterer was sitting on the old stone wall between the Old Orchard and Farmer Brown's dooryard. He could hear Goldie the Oriole singing up in the big Elm tree that shaded Farmer Brown's house.

"I wonder if Goldie has a nest in that big tree this year," thought Chatterer as he looked over the big tree. Hanging from the tip of one of the long drooping branches was something white. Never had he seen anything like that up in that tree before. What could it be? He was curious. He grew more and more curious as he watched that white thing swinging back and forth as the Merry Little Breezes blew it. The longer he watched it the more curious he became. He decided he would run over to the big tree and climb it for a closer view.

Chatterer looked this way and looked that way to be sure that the way was clear and it would be safe for him to scamper across the ground to the foot of that tree.

Once he had his sharp little claws dug into the bark of that big tree he would fear no one. He took one more look all around. No one was watching him. He jumped down from the old wall and the way those legs of his moved was something to see. He reached the foot of the big tree and started to run up.

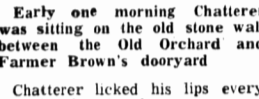

He ran to where the great branches, each as big as a tree of good size, branched out to make the great spreading top that shaded half the dooryard. He couldn't see that white thing from where he now was and he didn't know which branch it was hanging from the tip.

"I'll look about until I find out which branch that thing is on. Then I will go out on it and look things over to make sure if it is anything I want to know about," thought he. So Chatterer started to look things over.

Early one morning Chatterer was sitting on the old stone wall between the Old Orchard and Farmer Brown's dooryard. He could hear Goldie the Oriole singing up in the big Elm tree that shaded Farmer Brown's house.

Chatterer licked his lips every time he thought of eggs. They were not easy to get. Smart as he was he was having no success. He knew of several nests containing eggs. Never had he seen any of those eggs but he knew where they were by the way the ones to whom they belonged acted. The minute he went near one of those nests the owners

"I'll look about until I find out which branch that thing is on. Then I will go out on it and look things over to make sure if it is anything I want to know about," thought he. So Chatterer started to look things over.

## Rainstorms Strike Blow To Kansas Wheat Farmers

KANSAS CITY (AP) — Heavy rains have dealt what could be a stunning blow to the breadbasket of the United States. Kansas may produce 50,000,000 bushels less than last year. The same gloom situation in a lesser degree, holds true in Texas and Oklahoma.

If so, the U.S. market price for wheat will go up and Americans can expect to pay more for their bread.

There has been so much rain that Kansas fields look like rice paddies. Last week alone 15-inch totals were general over the state. Patches of wheat appear as though they had been trampled. Rain, hail, and windstorms have beaten the grain down into a twisted mass of broken stems, matted like wet fur on the back of a soaked cat. Some fields are considered complete losses.

The sun finally broke through this week in Kansas and some harvesting got under way. But it would take at least 10 days of constant sunshine to dry most fields enough to support heavy harvest machinery.

**WORST IN 17 YEARS**  
"It hasn't been this bad in 17 years," one grainman commented.

Meanwhile, deterioration, weeds and rust—a fungus—were taking their toll of the ripe grain. There may be a worrisome shortage of labor and combines which moved to other states when the Kansas harvest bogged down. Neighboring Missouri fields, too, have suffered.

Harvest operations have stopped nearly everywhere, the Kansas department of agriculture advised. What little wheat has been harvested so far—about four per cent of the expected crop—is below last year's yield in weight and protein content.

A total of 6,653,000 Kansas acres was planted in wheat last fall. As of June 1, a total of 5,084,000 acres was expected to be harvested, representing a 24-per-cent abandonment. The Santa Fe Railroad says Kansas will do well to harvest 92,500,000 bushels this year against last season's 143,282,000. The 10-year average is 202,873,000. Some estimates range as low as 79,836,000 bushels.

## Bees Help With Blueberry Crop

HALIFAX (CP) — Nova Scotia blueberry growers expect a big crop this summer. It may reach 6,000,000 to 7,000,000 pounds. A spokesman for Canada Foods Limited, Kentville, N.S. says the plant will turn out 10,000,000 to 15,000,000 cans of blueberry products this year. More than 4,000,000 pounds of the tasty berries will be required.

Large quantities of blueberries are frozen and canned to be shipped outside the province. Increased interest is being shown by growers in the use of honey bees to promote pollination, the use of chemical weed killers, insect and disease control, irrigation and other operations.

## In Very Few Cases Indeed Should The Doctor Tell

LONDON (AP) — Nine doctors considered the question: Should a doctor tell in general a doctor must keep his patient's secrets—but there are rare instances when he can't.

The new "code of ethics" for the profession was published in the medical journal Practitioner as "a guide to what every good doctor should know." It attempts to solve some of the doctor's dilemmas.

One of the editors of Practitioner, Dr. William Thomson, said: "We felt a careful examination of up-to-date medical etiquette was overdue. Things have greatly changed... This will do a lot to clear doubts in many medical men's minds."

SOME EXAMPLES  
A physician finds that a patient who is a locomotive engineer is prone to "blackouts." Should the doctor tell the man's superiors?

"No," it is answer. "He should try to persuade the man to tell his employers."

**DRUNKEN DRIVING**  
Dr. Francis Camps, home office pathologist, gives advice on dealing with drivers accused of drunken driving. If unconscious, the driver must be examined and this creates a doctor-patient relationship. In such a case, Dr. Camps says, the doctor should give no information without the patient's consent. This would seem to prevent a doctor giving evidence against the driver without the driver's permission.

Among changes recommended in the review is that British doctors be permitted to be identified when appearing on radio or television programs. The ban was imposed by the General Medical Council years ago. It declared personal publicity for practitioners "unethical."

The bidding:  
East South West North  
1 ♠ Dble. Pass 3 ♥  
Pass 4 ♠ Pass 4 ♦  
Pass 6 ♠ Pass Pass  
Dble.

Opening lead—seven of hearts.  
This classic was played in a rubber bridge game in Holland many years ago. The bidding was atrocious, but the play was nothing short of magnificent.

Declarer played a low heart from dummy and trumped East's king. He was faced with the formidable task of making twelve tricks. He began the apparently impossible assignment by playing the A-K of clubs.

When the queen fortuitously dropped, the situation still remained bleak, but South saw a glimmer of light that might lead to escape from the imminent catastrophe. He led a diamond

and snared the queen. When it held, he ruffed another heart, East's ace falling.

The picture had by now clarified considerably. Obviously, East had been dealt A-K of hearts alone, which meant West had started with six hearts. West was also known to have had four clubs. Apparently, West was void of spades, otherwise he would have led his partner's bid suit. West, therefore, must have started with precisely three diamonds.

South cashed the jack of clubs, led a diamond to the ace, and ruffed a diamond with the ten. He then led his last trump, the carefully preserved six, which West had to win with the nine.

By this time, nine tricks had been played. Declarer had his original four spades. West had four hearts. Dummy held a spade, Q-10 of hearts and six of diamonds. East had K-Q of spades and jack of diamonds.

West had to lead a heart, taken with the ten. East parted with the jack of spades.

The queen of hearts was cashed and East was squeezed. If he discarded the jack of diamonds, dummy's six would become a trick. If he discarded a spade, South would take the last two tricks with the A-7 of spades.

So the alarm was made. True, it took miraculous luck and superb play. And experience has taught me you can't argue with success. But we still think the bidding was atrocious.
