

Industrial Wage Rises Markedly

OTTAWA (CP) — Industrial employment rose markedly in June, but average weekly wages and salaries rose even faster, the bureau of statistics reported here.

It said its composite index of industrial employment, based on 1959 employment levels equaling 100, advanced to 140.6 from 136.8 in May.

The industrial composite of average weekly wages and salaries rose 33 cents in June to 190.93.

This was a 2.8 per cent increase in employment, and an advance of nearly 4.2 per cent in wages and salaries.

The bureau reported that all major industrial divisions increased their staffs during June to meet peak summer production demands. The increases, as usual, were largest in the outdoor industries, such as forestry and construction. But the advance in forestry, though amounting to nearly 30 per cent, was less than usual for that time of year.

FORESTRY SLOWS

DBS said its index of industrial employment, adjusted, ran out seasonal fluctuations, eased off to 136.8 for June from 137.3 in May. Four-fifths of the

reduction was attributed to the slower rate of gain in forestry, and to changes in transportation, storage and communication employment.

Seasonally adjusted, employment construction advanced one-fifth of one per cent. Employment in finance, insurance and real estate, though not as important in over-all totals as construction, rose by nearly one per cent.

In the manufacturing, the seasonally-adjusted employment index was unchanged because of offsetting trends in various sectors.

There was an above-average increase in employment in transportation equipment manufacturing, sending the index for durable goods sector up six-tenths of one per cent. But employment in non-durable goods fell by the same amount, mainly because of major industrial disputes in paper and rubber products.

The industrial composite of average weekly wages and salaries, at \$90.98 for June, was \$4.36 higher than the comparable figure for last year.

The DBS payroll index stood at 300.3, up 3.2 per cent from May and 10.7 per cent from June, 1964.

Producers Of Maple Sugar Profit From Export Market

QUEBEC (CP) — Quebec's Lancourt, manager of the Co-producers of maple sugar are operative Society of Quebec profiting more through means Maple Sugar producers.

ures of the federal and provincial governments in enlarging the export market to European countries.

The export outlets are increasing gradually from year to year, says Senator Cyrille Vail-

20" said Senator Vallanceur. He said the exhibitions will continue from year to year in various countries of Europe.

EXHIBITIONS USEFUL

A spokesman for the co-operative said it is through these exhibitions that Quebec maple sugar producers are able to make known abroad the excellence of their products.

Having no salesmen abroad, the Quebec producers count heavily on Canada's trade commissioners and on tenders of food buyers agents.

Although business with European countries has increased considerably, exports to the United States, in comparison, have reached colossal proportions.

In maple sugar alone the U.S. has been importing more than \$3,000,000 annually except in 1955 and 1956.

In the Benelux countries, where the market is being developed, 3,500 pounds of Quebec's maple products were taken in 1964.

The Canada Pension Plan and its benefits

Here is what the Canada Pension Plan will do for people like Thor Andersen, a farmer who works for himself and makes \$4,000 a year.

Personal Example Is Best Teacher

HALIFAX (CP) — Personal example is more effective than lectures in teaching sex to children, says Dr. Horace B. Colford, Nova Scotia's director of child and maternal health.

He told the Halifax Gyro Club that parents and teachers should live up to the firm moral standards they demand of their children and students. Then they would be able to deal with sex education on a "do-as-I-do" and not a "do-as-I-say" basis and with better results.

Dr. Colford said school textbooks on health ignore the human reproductive system as if it did not exist. Adult books on sex matters were impractical for use in school.

Teachers, with few exceptions, were incapable of dealing with sex education. Teacher training schools did not touch it.

Sex education in schools should be integrated with the general health program in all grades. It should be taught in terms easily understood by children.

Sex instruction should not be given undue emphasis and should not be forced on an uninterested child but should be adapted to his maturity level at each stage of growth.

Dr. Colford said proper sex information and education are neglected in society today. Distorted attitudes and beliefs about sex were important sources of mental health problems and marital maladjustments.

Conflicting social attitudes, uninformed and confused public opinion blocked progress toward rational laws on such matters as family planning and censorship. Educationists, clergymen and the public generally were in need of proper information.

"I rather feel," he said, "that if we face the facts and work together in an honest attempt to deal with them we will end up in a new and better age than the world has ever seen before."

Montreal Bomb Squad Gets Robot Dismantler

BY CLAUDE HENAULT

MONTREAL (CP) — A robot for handling bombs has been developed at the Montreal police crime laboratory.

Det. Lt. Leo Plouffe, the department's bomb expert, has announced the construction of the device during a speech at the fifth international criminological congress here.

Det. Plouffe, who has been dismantling bombs placed by Quebec separatists for the last several years, said:

Bomb disposal squads were forced to work with commercially available equipment which was "rudimentary."

In the present day the bomb disposal expert's kit is an armored suit and various tools ranging from a stethoscope to a can opener.

DESIGN ROBOT

The Montreal bomb expert said "in examining this problem seriously, a very simple and inexpensive mechanical robot" was conceived to do the dangerous work of transporting the bomb to a safe area.

Police here developed a caterpillar-tread vehicle which looks like a miniature tank and

equipped it with adjustable telescoping arms, a microphone, and a camera. The device can be guided by remote control radio or cable control.

At present the bomb department has only a functioning scale model, but the detective said the full-size robot "would be big enough to pick up a full-size mail box but small enough to go into any building."

The robot, which can be equipped to grasp and lift an object or to open suspicious packages, is able to function out of sight of the operator.

Anglicans Urge Involvement In Indian Affairs

VANCOUVER (CP) — A report presented here to the Anglican Church of Canada's general synod called for national involvement of the church in Indian and Eskimo affairs.

The report said this is the only way the church can meet the spiritual needs of the two peoples and prepare them to take their role in society.

The report, which was approved, recommended pilot projects to focus on leadership development, help the Indians and Eskimos to live creatively anywhere in the world, and develop experimental programs in Christian education on reserves.

It said 25 per cent of Canada's 200,000 Indians and 85 per cent of the 12,000 Eskimos belong to the Anglican church.

SOMETHING To Think About . . .

If your furnace is over 10 years old, you may be money ahead to give it a good, close look!

HERE'S WHY:

The usual "life expectancy" of ordinary furnaces is about 10 years.

BUT EVEN MORE IMPORTANT

There have been so many wonderful improvements in the last 10 years you have a right to be discontented if you don't have a modern LENNOX heating system! If you do not have a LENNOX heating system call us TODAY.

Palmer Electric
Dial 894-8543 - Ch'town

The Andersens are both aged 45 and have no family. If Thor's earnings continue at \$4,000 a year until he reaches age 65, he can look forward to a retirement pension of \$83.33 a month from the Plan. This, plus

the \$75 each Mr. and Mrs. Andersen will receive from Old Age Security, will give them a total of \$233.33 a month—equal to 70% of Thor's previous average earnings.

If Thor becomes disabled anytime after 1970, having contributed until his disability began, he will get a disability pension of \$87.50 a month. This will continue until he becomes 65 when he will receive his retirement and Old Age Security pensions.

Should Thor die anytime after 1967, having contributed until his death, his wife will receive a widow's pension of \$56.25 a month until she becomes 65. From then on she will get \$125 a month—\$50 from the Plan and \$75 from Old Age Security. At the time of Thor's death Mrs. Andersen will be entitled to a lump sum payment of \$500.

All benefits under the Plan will maintain their value. The actual benefits payable will probably be higher than those given here since benefits will be adjusted to meet changes in living costs and in wage levels before they are paid and changes in living costs after they become payable.

What will the Plan cost you?

If you, like Thor, in a particular year, have self-employed earnings of \$4,000 you will pay \$122.40 in instalments, in the same way you pay income tax.

This advertisement is one of a series which relates some of the important benefits of the Canada Pension Plan to individual circumstances.

Issued by authority of the Minister of National Health and Welfare, Canada, The Honourable Judy LaMarsh.
