ONE MONTH	0.35

Sent post paid to any part of Canada or the United States.

ADVERTISING RATES.

For small advertisements which are ordered for only one or two weeks the charge is 5 cents per inch for the first insertion, and 2½ cents for each continuation. Rate cards are furnished on application at the office. Special contract prices at a reduced rate are quoted for advertisements four inches in size or larger, which are to run for three months or longer.

No special notices inserted unless paid for at the rate of 15 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaars, Picnics, etc. No notices will be inserted with [illegible] is paid.

THE EXAMINER is considered by Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been compelled to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents:—
R. H. Mason, Post Office, Charlottetown
J. McIntyre, Malpeque Road,

The Yost Typewriter.

THE NEW YOST

the only Perfect Writing Machine. The Ribbon, the Shift Key and other antiquated devices discarded.

NEW MACHINE,
NEW MANAGEMENT
NEW PRINCIPLES,
NEW PATENTS,
NEW MEN,
NEW LIFE,
NEW BRAINS,
NEW METHODS,
NEW CAPITAL,
The LATEST and BEST

WHAT MUST GO:—Bad alignment, illegible work, foul ink ribbons, bothersome shift keys; double scales, etc., are no longer to be tolerated or pardoned. The NEW YOST has abolished them, and no other can retain them and live.

THE NEW YOST combines the life-long experience of the inventor, G. W. N. Yost, who invented the "Remington" in 1873, the "Caligraph" in 1880, and the "Yost" in 1889; the latest and best improvements have been added during 1892, making the New Yost an ideal, perfect typewriter. The New Yost prints direct from steel type; its work is never blurred, but is clern cut and beautiful. The alignment is absolutely perfect and permanent. The paper is an ideal success, the best ever applied to a typewriter. The line spacing absolutely perfect.

"Shorter" Pastry and "Shorter" Bills.

We are talking about a "shortening" which will not cause indigestion. Those who "know a thing or two" about Cooking (Marion Harland among a host of others) are using

COTTOLENE

instead of lard. Not: but the purest, healthiest and cleanest ingredients go to make up Cottolene. Lard isn't healthy, and is not always clean. Those who use Cottolene will be healthier and wealthier than those who use lard—Healthier because they will get "shorter" bread; wealthier because they will get "shorter" grocery bills—for Cottolene costs no more than lard and goes twice as far—so is but half as expensive.

Dyspeptics delight in it!

IT'S A VERY HARD LIFE.

IS THAT OF THE NEWSPAPER REPORTER IN NEW YORK.

The Fleet Street of the United States is Found in "Park Row"—The Army of Men Connected With the New York Press.

The words "Park Row" fall with a magic sound on the ears of every youthful journalist throughout the United States. In one sense it is no wonder that the word charms the American journalistic tyro, for next to Fleet street it is the greatest literary, or, more properly, "newspaper" center of the world. But it can be stripped of a good deal of its glamor, for the mystic visions that arise in regard to it are sometimes, if not always, misleading. However, it is a wonderful place. Beneath its 12 and 15-storey newspaper homes

SOME 500 MEN,

for 365 days in each year, live by writing. Six times as many more help produce the newspapers from the composing room to the "pub." This may be a surprise to those, like a kind friend who once asked me, when he had learned that I was connected with a newspaper, "Does the editor write all the paper himself?"

Among the rush of thousands towards Brooklyn bridge, reporters can be seen in scores at any hour of the day or night. You often hear a passer-by remark, "There goes one of the men who make the newspapers." They mean, of course, reporters—the men who gather news and write. They are men of all types—good, bad and ill-looking. Young fellows with strong faces predominate, and there is often a shadow of worry or nervous tension in their faces.

A question often asked by the layman is, "Who writes all those funny things you see in the papers?" and then he bursts out laughing and alludes to some jokes expecting you, of course, to be interested in it. The general impression is that the joker must be really a funny-appearing man. Not at all. This misapprehension was knocked on the head recently by a Canadian humorist who sent a sketch, if I remember, for a Toronto comic weekly, entitled, "The man who makes the jokes, and the man who slaps you on the back and laughs at them." The joker was portrayed as a wrinkled old fellow, wearing glasses and an anxious, sad, weary-of-the-world expression on his face. Many like faces can be seen in Park row, yet withal, many of them

ARE MEN OF BRAINS

and energy, in whose minds some feature in the life of the great and restive republic is being revolved from day to day. They are men who are at the beck and call of the newspaper that employs them every hour of the 24 for 365 days a year. There is no Sabbath in the daily newspaper world. Remember that.

The New York reporter is a news gatherer pure and simple. His primary duty is to portray the life of the metropolis, or whatever phase of it he may be assigned from day to day. His ability to do this, as required in the American metropolis, means more than can be expressed in a few words. Scores of young men of superior education annually graduating from the American colleges turn to journalism as a pleasant and lucrative pursuit. It is so pleasant, they think, to be dined and wined and be received courteously at every turn. While some are successful, many soon find out their mistake, for the profession has its sours as well as its sweets. The result is that many of them soon leave it sadder and wiser.

To begin with,

THE REPORTER MUST HAVE BRAINS

and be able to walk 20 miles, if necessary, without fatigue, be a gentleman under all circumstances, a close observer, and have an undying love or fascination for narrative writing. This love must entirely submerge the idea of obtaining a fortune in a few years. Finally, he should have no ambition whatever to some day occupy the editorial chair, always bearing in mind that in New York there are, and will likely continue to be, 30 reporters to one editor. After two year's work on a newspaper, in which he has attempted in some form or other what is called "the full round of general work," including a knowledge and acquaintance with the proceedings of all the public bodies, and the duties of public officials, he must be prepared to perform these duties over again for another two, and then repeat it for two more, and then keep on repeating it with renewed freshness, vigor of intellect and perfect workmanship as years roll on, looking for no reward save the satisfaction of having done his duty and earned his livelihood.

There are many men of this calibre in New York journalism. Almost all had previous experience on the provincial press, and they are merely repeating it in the metropolis on a larger scale, with more being exacted from them than they had done before. No assignment is ever considered too trivial to give to

THE BEST MAN ON THE PAPER,

for in the heterogeneous mass of human beings that crowd Manhattan Island and the neighboring city of Brooklyn, no one can tell what mountain may in a moment rise from a mole-hill. The obscure death of a poor beggar, if properly inquired into, may reveal a more wonderful human tale than the assassination of the President punched through every "ticker" from Maine to California. The chances are that it would not, but the reporter to do his duty must always go under that assumption.—Empire.

Spool Making.

Here, for instance, are huge stacks of timber, and our ears are greeted with the hum and birr so certainly associated with a saw mill. This long range of buildings is entirely devoted to the making of spools. The machines employed are various. Here the wood is being cut into short lengths; there a hole is being punched through the small round pieces; while yonder a machine shapes the rough wood into a smooth spools in one swift stroke.

It is by means of the wood required to make these spools that we get some conception of the enormous output of this factory. Each day there is as much thread finished here as would wind round the world several times, and in order to produce spools for the thread it is calculated that an extent of forest planted with birch trees covering 550 acres has to be cut down every year, while, on an average, 12 ships of large carrying capacity are employed each season in bringing the wood across to this country from America and Canada.—Good Words.

A Railway Manager Says:

"In reply to your question do my children object to taking Scott's Emulsions, I say No! on the contrary, they are fond of it and it keeps them pictures of health." .....

HUNDREDS of ladies in ill health have been or are being restored to health and strength by the use of Hawker's Tonic it has become the great and popular family remedy. .....

USE SKODA'S DISCOVERY, the great blood and Nerve Remedy.

WHAT THE STATES YIELD

A WHOLE STRING OF AGRICULTURAL SURPRISES.

A Study of Crop Averages — Iowa Ahead in Corn and New England Yield Very High — Nevada Leads in Hay and Virginia's Cotton Average is Away Up.

The November report of the statistician of the Department of Agriculture presents facts that are probably surprising to those who are not familiar with the average yield of crops. Iowa leads on corn, averaging 35·4 bushels per acre, with Massachusetts second, closely followed by the other New England States. The great corn states of the west, though devoting a larger area to corn, do not equal New England, New York, or Pennsylvania in the average yield per acre. Idaho produces the most potatoes per acre, her average being 165 bushels, with Montana, Wyoming, Nevada, Oregon and Washington following in the order named. In the east New England leads in the average of potatoes grown. Colorado's average of sweet potatoes per acre is 125 bushels, with Florida second at 116 bushels, Virginia and North Carolina following. The average yield per acre of potatoes for the whole country is only 72.2 bushels.

TOBACCO, COTTON AND HAY.

It may not be known that Massachusetts, Connecticut and Pennsylvania produce the most tobacco per acre. In fact, Massachusetts averages about three times as much as Kentucky or Virginia, which have the reputation of being specially adapted to the culture of tobacco. Florida, which has been long considered as unfavorable to cattle and grass, comes second in average yield per acre of hay, Nevada being first, and Florida is the only State on the Atlantic side of the Mississippi which exceeds the general average. The returns by States range from half a ton per acre in Delaware to 2.66 tons in Nevada, Florida averaging exactly two tons. North Carolina and Arkansas made a tie for second place in average yield of cotton, Louisiana being first, with 175 pounds per acre. Strange to say, Virginia produced more cotton per acre than South Carolina, Georgia, Florida, Alabama, Texas, or Mississippi, which appears incredible considering the difference in her climate compared with her competitors.

SOILS AND CROPS.

The crops reported have been grown on all kinds of soils. On the seacoast the soils are light, but the average crops of the several States do not appear to be affected by the quality of the soil entirely, as may be shown by the fact that Florida's average of corn, per acre, is only 9.7 bushels, although she was second on hay and also on sweet potatoes, but was the lowest of the cotton-producing States. Buckwheat does not appear to be grown in the extreme Northwest, or in the Southern States, south of North Carolina, yet it is a quick-growing crop, delights in a warm season and is adapted to the lightest soils. Crops that appear to be adapted to certain States only are produced more abundantly per acre in States that are far away, and the influence of climate and soil remains somewhat of a problem upon which work for a solution may be performed.

OF INTEREST TO FARMERS

And Worth Reading by All Who Welcome Information.

Artichokes are grown principally for hogs. They yield largely but are difficult to harvest as a crop, the usual method being to turn the hogs on the plot and allow them to help themselves. From 300 to 600 bushels can be grown on an acre and they will grow on any kind of land that produces potatoes. Once established they seed themselves every year from the tubers left over, and are difficult to eradicate.

Forestry is made a study in the agricultural schools and colleges of Europe, but in this country it is overlooked, yet it is one of the most important subjects connected with agriculture.

It is unwise to buy a cow and then test her in order to discover her value in the dairy herd. The test should be made before purchasing. Although thousands of fresh cows are annually bought by farmers, yet it is seldom that the purchaser knows anything of the usefulness of a cow until he places her in the stable and makes an experiment with her for the purposes desired.

The horse blanket in winter saves ten times its cost in a short time, and it also saves feed and labor.

Sloppy food is not advisable as a continued diet for pigs. Give a change occasionally. The hogs are very partial to whole corn, fed dry, and will eat it from the trough, either shelled or on the cob.

Board floors for sheep are the best, provided they are swept off daily. If earth is used as a floor, cut straw or leaves should be made to do service in providing bedding and protection against draughts when the sheep are at rest.

Bees do not make honey—they simply gather it. Feeding syrup to bees will provide them with food, but the syrup will not be made into honey, as the bees have no power to make the change, honey being only obtained from blossoms.

The elasticity with which some farmers will attempt to save a small sum in purchasing seeds is surprising, considering the risk incurred by so doing. Good seed is more important than all other matters connected with growing a crop, as the failure of seed to germinate may prevent growing the intended crop for want of time to make a second attempt with better seed.

The winter is the time to build the intended silo, as it can be done with less interference in other work. Have the silo ready and complete for a crop of corn next season. A silo soon pays for itself.

While wheat and other grains have fallen in price, there is no complaint that eggs are not fully up to expectations in prices. Eggs are always "cash on sight," and those who make a specialty of supplying customers with strictly fresh eggs are affected but little by business depressions or sudden changes in value.

How to Get a Sunlight Picture.

Send 25 "Sunlight" Soap wrappers (wrappers bearing the words "Why Does a Woman Look Old Sooner Than a Man") to Lever Bros., Ltd., 43 Scott St., Toronto, and you will receive by post a pretty picture, free from advertising, and well worth framing. This is an easy way to decorate your home. The soap is the best in the market and it will only cost 1c. postage to send in the wrappers, if you leave the ends open. Write your address carefully.

Principal of the Commercial Department of Kent's Hill Seminary, says:

A well-known PHYSICIAN RECOMMENDED

Skoda's Discovery

for my wife, which she has taken with the most satisfactory results. This led me to try Skoda's German Soap, as I was troubled a great deal with a sensitive face which shaving would irritate.

Skoda's German Soap

has entirely rid me of this trouble. For softening and clearing up the skin one has only to try it to appreciate its superiority over all others.

Skoda's Discovery

makes you eat, it makes you sleep, it makes you well. Medical advice free.

CHARLOTTETOWN, P. E. ISLAND

A Letter From His Dad.

DEAR SON,—

Yours to hand yesterday, it gives me great pleasure in sending you a cheque for $100. Thanks to Prowse Bros. & Co. They have done the people of this country more good and saved them more money than any firm that ever started business in Charlottetown. I am glad you are buying your furnishings and Carpets from men you can depend on. They won't misrepresent an article to make a sale. You spoke about me recommending anyone who might want a Carpet to trade there. It would be impossible for me to tell anyone who has not already heard of Messrs. Prowse Bros. & Co. Why, your sisters, your cousins and your aunts all trade there. They say their store is like a fair on market days. Crowds of thankful buyers are found pressing their way up to the counters to have a share in the bargains which they daily offer. Good bye.

From your loving
FATHER.
