

EBENEZER'S ECHO

This holiday display showing the sentiments of Ebenezer Scrooge shines in the yard of a Columbus, Ohio, home. The decoration at the H.R. Goding home was erected to chide Christmas commercialism—what Goding called "a rebuttal of the various half-done Christmas decorations around town and the buy-now atmosphere of the season." Some neighbors were puzzled by the display, but at least one threatened to a newsmen to tear it down. The "Bah, humbug" is reflected in a pool of water. (AP Wirephoto)

POLITICS NOT STODGY IN MAGDALEN ISLANDS

OTTAWA (CP) — Anyone who thinks Canadian politics are too stodgy should visit the St. Lawrence Gulf riding of Ile-de-la-Madeleine during an election campaign. "That's the way it's done in the Magdalen Islands," said Forestry Minister Sauve after outlining to reporters a campaign full of wild back-road auto chases in his riding leading up to election day Nov. 8. When one candidate goes to visit voters, "the gallop" begins, he said. This consists of supporters of other parties harassing the touring candidate by putting other cars in front and behind and gunning down the roads at speeds "up to 50 miles an hour with lights closed" at night. Besides this form of Magdalen Islands hot-rodding, Mr. Sauve told reporters the proximity of calvechades on behalf of opposed parties "sometimes can lead to clashes." He gave the insight into electoral habits at a press conference during which he denied connection with any of a series of alleged irregularities in the island riding up to voting day. The allegations ranged from getting workers laid off from construction jobs to buying votes with liquor promises.

Man. Premier Issues Blast At Air Canada Information

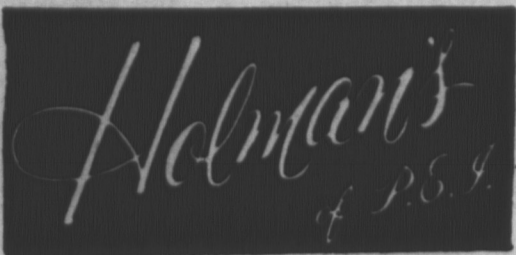

WINNIPEG (AP) — Premier Roblin has accused Air Canada of knowingly submitting outdated information to a federal inquiry commission. In a letter to Prime Minister Pearson which was made public here, Mr. Roblin said the information dealt with the future size of the Crown corporation's fleet. It was provided to the commission studying Air Canada plans to close its overhaul base here. Mr. Roblin said that fleet forecasts submitted by Air Canada last May said 34 Viscount aircraft would remain in operation until 1973. But a new forecast in October said there would be a substantial reduction in the size of the Viscount fleet with the intended purchase of four DC-8 and 10 DC-9 aircraft. The new planes would cost \$96,000,000 and be delivered in 1966 and 1967. In his letter, Mr. Roblin said one of the critical areas which the commission was directed to review was the practicability of using the Winnipeg overhaul base for maintenance of all or some of the DC-9 or other aircraft which Air Canada might acquire. "In such a review the fleet forecasts of Air Canada are an essential factor," Mr. Roblin said. Three months after Air Canada had submitted its fleet forecasts to the commission it was reported the airline had signed letters of intent for purchase of DC-8s and DC-9s. "Subsequently the commission requested that Air Canada advise whether the evidence submitted in May was still valid. "It is incredible that at the time of the final hearings in May was still valid. "It is incredible that at the time of the final hearings in

Huge Crater Discovered

NEW YORK (Reuters) — A huge meteorite crater, the third largest so far discovered, has been found in northern Chile by a Columbia University-Chilean expedition, the university announced here. The crater, in the western foothills of the Andes, has a diameter of 1,476 feet and an average depth of 100 feet. The world's largest known meteorite crater is the Barringer crater in Arizona, more than 4,000 feet in diameter and 600 feet deep. The Chubb crater in the Ungava district of northern Quebec has a diameter of more than two miles and is more than a quarter-mile deep. It is being studied to verify if it was created by a meteorite.
