

Craving for Drink.
When a man experiences the craving for drink, he finds it very difficult to describe it himself. It is in no sense like the craving for food, because a hungry man eats with avidity, but it is no uncommon thing for a drunkard in taking his first drink in the morning to find difficulty in keeping it upon his stomach. The sight of whisky, its odor and everything connected with it is repugnant and produces a nauseating effect. The man does not drink it, therefore, because he likes it, but because the organ that controls all the movements of his body requires alcohol for the purpose of doing its work, and there is no way it can get it except by compelling the introduction of alcohol into the stomach.—Banner of Gold.

Misunderstood.
To be misunderstood even by those whom one loves is the cross and bitterness of life. It is the secret of that sad and melancholy smile on the lips of great men which so few understand; it is the cruellest trial reserved for self-devotion; it is what must have oftenest wrung the heart of the Son of Man; and if God could suffer, it would be the wound we should be forever inflicting upon Him. He also—He above all—is the most misunderstood, the least comprehended. Alas! Never to tire, never to grow cold; to be patient, sympathetic, tender, to look for the budding flower and the opening heart; to hope always like God; to love always—this is duty.—Henry Frederick Amiel.

Indian Temperance Society.
Before the passage of the law prohibiting the sale of liquor to Indians in allotments Chief Poo of the Umatillas and others of their reservation in Oregon petitioned to be resorted to wardship under the Government to save the tribe from destruction through drink. They have since formed a temperance society for the same purpose. Chief Poo of the Umatillas, Young Chief of the Cayuses and No Shirt of the Walla Wallas are interested.—Union Signal.

Destroys Body and Mind.
Dr. F. C. Donders, a Dutch physiologist, says: "Never let a drop of whiskey moisten the lips of men. If large quantities destroy mind and body, small quantities produce physiologically exactly the same effect. The difference is quantitative, not qualitative. I do not hesitate to affirm that it from this day not another drop of spirituous liquor was drunk, the appetite for it would be quieted after a few generations, if not wholly destroyed."

The Better Fighters.
Abstinence from all alcoholic drinks does not seem to interfere at all with the ability of the Mohammedan Turks to cope in battle with the liquor drinking Greeks. A point like this may not be vital, but it would not have been missed had it pointed an argument in favor of abstemious drinking.—Voice.

Wrote With His Mouth.
John Simons, a native of Berkshire, born without arms or hands, could write with his mouth, thread a needle, tie a knot and shuffle, cut and deal a pack of cards.

The confidence of the people in Hood's Sarsaparilla is due to its unequalled record of wonderful cures.

For your summer house.—Camp stools and chairs, folding chairs, lounging chairs, camp beds, folding wire cots, cheap feather pillows and cheap mattresses, at prices that will please you.—John Newson, 161, 2w

From
EDWARD BEER FISHER

Musical Director
Toronto Conservatory of Music.

The Bell Organ & Piano Co., Ltd.

Dear Sir,—Allow me to compliment you on the qualities of the Piano ordered from you for the Toronto Conservatory of Music. The tone is remarkably pure and brilliant throughout, while the bass is deep and powerful. The mechanism is apparently perfect, the touch elastic, and in appearance the entire Piano is a work of art

Yours truly,
(Signed) EDWARD FISHER
Musical Director Toronto Conservatory of Music

Dairy and Chemistry.
For farmers in upland regions where the soil is poor either the Ayrshire or the Dexter cow is suitable, although there are as yet practically no Dexters in America. The Dexter cow is always red or black, with white upon her udder and underbody. She is a good milk-er and also makes excellent beef. This breed of cattle are in shape like the Shorthorn. In size they are about like the Ayrshires.

When starch and glucose are made from corn, the refuse left becomes what is called by dealers in cow feeds gluten meal. It consists of the seed germ of the corn grain, the hull and so much starch as has not been taken out at the factory. Gluten meal contains the most nutritious part of the corn grain and is one of the richest foods in nitrogen that is at command of the dairyman. It is one fourth protein, or nitrogenous substance, one-half sugar and digestible starch and a little more than 11 per cent digestible fats. The rest is refuse. But gluten is a highly concentrated food and must be fed with its own weight of something else. A mixture of four to five pounds of gluten meal with as much wheat bran makes, in addition to ensilage and hay, a very good ration for a dairy cow. There is no doubt that gluten meal is a profitable feed for dairymen engaged in milking. There are those, however, who declare it injures the flavor of butter. Only actual experiment can determine this. It is to be remembered, too, that the carelessness and uncleanness of workmen at the starch or glucose factory sometimes ruin the gluten and make it utterly unfit for the cows' food. In such case the cows themselves frequently understand their business well enough to refuse to eat it. Again, gluten meal is adulterated by dealers and rendered unfit for feed.

Here is a mixture that will keep off the horn fly for some time. Into a quart of fish oil stir two tablespoonfuls of crude carbolic acid and apply to the parts of the cow most infested by the fly. Remember that the flies deposit their eggs upon fresh manure heaps. Break these up or sprinkle lime upon them. In case of large herds of cows a dipping vat with the mixture of oil and carbolic upon the surface of enough water to swim the cattle through would be the best arrangement.

DOBELL LINE.

S.S. POLINO is due here from Montreal Tuesday, 26th inst. and sails for St. John's, Nfld., via Sydney and North Sydney, carrying live stock on deck and produce under deck at low rates.

For further particulars apply to
N. RATTENBURY,
Agent.

CANADA'S INTERNATIONAL EXHIBITION
ST. JOHN, N. B.
14th-24th Sept 1897
OVER \$12,000 IN PRIZES

For Live Stock, Farm & Dairy Products
Competition open to the world.

Very Cheap Excursion Rates on all Railways and Steamers. Rates and dates announced later.

Special Arrangements are made for the cheap transport of Exhibits.

A splendid new Poultry Building is in course of erection, and Amusement Hall will be enlarged and improved.

In addition to Industrial, Agricultural and Live Stock Exhibits, six nights of H.A.D. & Co's magnificent Fire Works and a four days programme of Special High Class Dramatic Entertainment, will be given in Amusement Hall, making together the best and cleanest special attraction ever brought before the people of the Maritime Provinces.

A trip to the Sea Shore, a visit to Canada's Winter Port, and a stay in the cleanest and healthiest city in Canada, can be combined with a visit to the International Exhibition, at the very low rates to be later advertised.

Arrange Now to Come to St. John.

Entry Forms will be forwarded to every one who applies personally or by letter to

CHAS. A. EVERETT,

McGill University, Montreal

SESSION 1897-98

The curriculum comprises course in ARTS, (including the DONALD SPECIAL COURSE FOR WOMEN), APPLIED SCIENCE, MEDICINE, LAW, and VETERINARY SCIENCE. Matriculation, Examination and Scholarship Examination will be held:—ARTS and MEDICINE, 15th SEPT.; APPLIED SCIENCE, 16th SEPT.; LAW, 17th SEPT. VETERINARY SCIENCE, 22nd SEPT.

Copies of the Calendar, containing full information, may be obtained on application to the Secretary.

Fulfillment Deferred.
There is an old prophecy, much cherished among the Greek people, that in the days when the Greeks again have a Constantine as their ruler and his wife bears the name of Sophia the cross will be re-erected on the Church of the Holy Wisdom, St. Sophia, in Constantinople, and that city will once more become the capital of the great Christian monarchy of the east. The Duke and Duchess of Sparta, as all Greeks remember, bear the names indicated by the prophecy, and when the war broke out there was a sanguine hope that it might be fulfilled in their persons. At present the outlook is not very hopeful.—Westminster Gazette.

The Leading Bicyclists
Use Adams' Tutti Frutti. It really thins and gives staying power. Some dealers to obtain a big profit try to palm off imitations.

TO LET.

A house on Dorchester Street, next block to the New Cathedral, at present occupied by Mrs. Leahy. Possession given last of June.

ARTHUR G. PEAKE,
Office on "Peake's" Wharf.

CREAM SELLING.

A Profitable Part of the Milk and Butter Business.

One of the most profitable features of dairying is selling cream, either to the ice cream manufacturer, who will take a large dairy's total output, or to a retail trade of one kind or another. While a good cream trade is very profitable, it is one of the most difficult to hold unless the utmost care is exercised to supply a sweet, pure article in every case and to know exactly what your particular trade demands. For an ice cream trade the cream does not need to contain more than from 15 to 23 per cent of fat; cream for dessert purposes needs from 25 to 30 per cent fat, as cream containing less than 25 per cent fat will not whip, and extra heavy cream for special purposes varies from 35 to 50 per cent fat. When the percentage of fat demanded by a particular trade is known, care must be taken to meet that demand, but it is obviously unnecessary, and the dairyman cannot afford, to sell a richer cream than he guarantees. To be sure that one is living up to his guarantee, it is necessary to test each run of cream, as there is almost always a greater or less variation in the richness of cream as it runs from the separator or as it is skimmed day by day. The most convenient manner in which to do this, perhaps, is to skim the cream rather rich, and then reduce it to the required percentage of fat by the addition of skimmed milk. The formula for this is very simple. Divide the total amount of fat (obtained by multiplying the total pounds of cream by its fat test) by the desired percentage of fat in the cream. The quotient will be the pounds of cream testing the desired percentage of fat. To ascertain the amount of skimmed milk to add, subtract from this amount the original pounds of cream.

Example.—Seventy-three pounds of cream testing 33.5 per cent fat is to be diluted to cream testing 21 per cent fat. Seventy-three times 33.5 per cent equals 24.4 pounds of fat.

Twenty-four and four-tenths pounds fat divided by 21 per cent equals 116 pounds of cream testing 21 per cent fat. One hundred and sixteen minus 73 equals 43 pounds of skimmed milk to be added to 73 pounds of cream testing 33.5 per cent fat.

It should be borne in mind that in testing cream an 18 cubic centimeter pipette should be used instead of the 17 cubic centimeter used in testing milk, otherwise the results will be too low, and not quite so much acid should be used as in testing milk.

If the fat chars or burns, it shows that the acid is too strong or that too much is used, and in this case less should be used.—H. Hayward in National Stockman.

Milkman Carried Scarlet Fever.

A case has been recently reported where an epidemic of scarlet fever was traced to a certain milk route, and an investigation showed that a son of the dairyman who supplied the milk had had an attack of this disease, and when he was recovering (the most dangerous time as far as spreading the disease is concerned) he was allowed to help milk.

Such cases as this cannot be too strongly condemned. Not only is there danger of sickness and death, but every dairy man feels to a certain extent the effects of such things, for the public is easily frightened, and a decreased demand for milk almost surely follows any epidemic that may be traced to the milk supply. While as a matter of fact we believe that there is far less danger in the milk supply than is supposed, yet we cannot be too careful in things of this kind.

Handsone Private Residence For Sale.

The subscriber is instructed to offer, by Public Auction, on

Thursday, 29th inst
AT 12 O'CLOCK, NOON,
FERRINGFORD

Residence of the late Mrs. Lowden, Dundas Esplanade.

This eligible property, commanding a fine view of the harbor, offers superior inducements as an attractive and well appointed home.

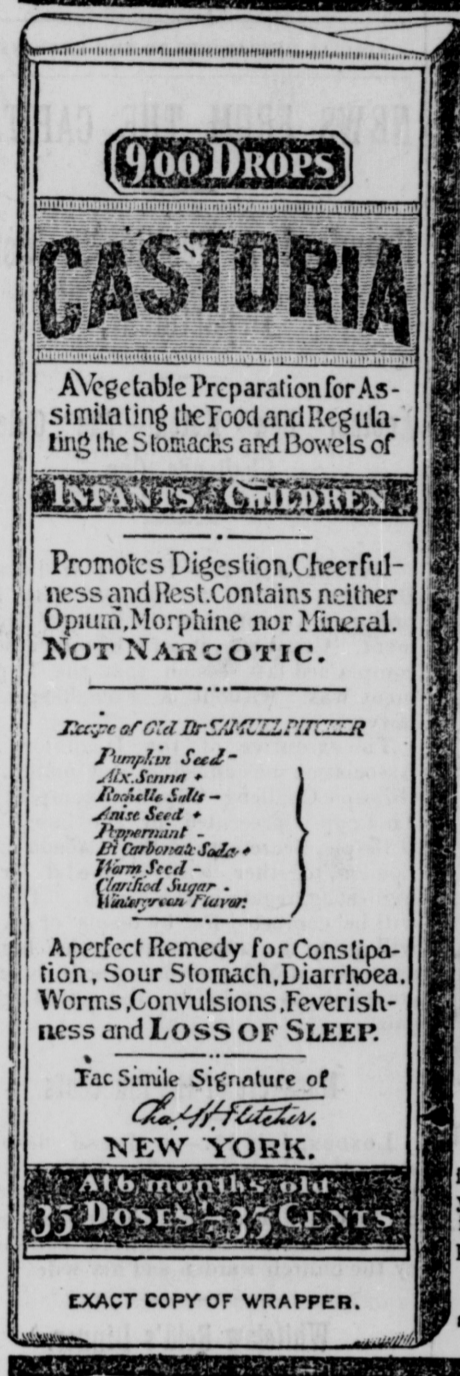

Term liberal and made known at sale.
