Winter Work Cuts Costs In Pipeline Construction

EDMONTON (CP) — Fast-moving crews have ripped through 140 miles of timberland and frozen muskeg building a pipeline officials say might have cost 50 per cent more to build in summer.

The line is the largest chunk of a two-part $15,000,000 project to gather natural gas from 950 wells in the Swan Hills, Vergenia Hills and Judy Creek fields 110 miles northwest of Edmonton.

Construction, begun Jan. 19, was competed in mid-April.

A processing plant, second part of the project, is being built from prefabricated materials hauled during the winter to the junction of the trunk lines.

The project, scheduled for completion Sept. 1, will handle 40,000,000 cubic feet of gas a day. Reserves in the fields are estimated at 700,000,000 cubic feet.

Winter construction included not only the gathering line but also parts of a line to carry liquid hydrocarbons 115 miles from the processing plant to Edmonton and a section of a $4,000,000 pipeline to bring the natural gas residue to Edmonton consumers.

Imperial Oil Ltd., as operator of the producer-owned gas conservation project, supervised construction.

COMPANIES SHARE COSTS

Imperial, along with British American Oil Co., Ltd., and Pan American Petroleum Corp., owns 95 per cent of the installation. Eleven companies share costs in proportion with the size of their operations.

Winter problems of snow, sub-zero temperatures and frozen ground were less troublesome than summer construction problems of impassable muskeg, heavy rain and poor access roads.

Well-maintained winter roads provided easy access to the remote areas for trucks hauling pipe and supplies.

Clearing work began in mid-December. Indians hired to help open a trail through heavy forests of spruce, pine and tamarack brought along their families and set up housekeeping in tents on the right-of-way.

Brush was burned out but much of the timber was acquired by small logging firms.

Ditching was done with machines after the frozen ground was ripped by a large bulldozer equipped with a huge steel tooth.

Pipeline was built, welded and tested ahead of the ditching, then lowered in 2,000-foot sections into the ditch and backfilled immediately. Pipe ranges from three to 24 inches in diameter.

HELD BY WEIGHTS

Frozen ground made construction easy through large areas of muskeg. Concrete river weights, precast in Edmonton, were installed to hold pipe in ditches dug through these areas.

Without weights, the natural buoyancy of the pipe would pop it to the surface. Weights of 2,800 pounds each had to be clamped at 10-foot intervals on 11 miles of 24-inch pipe.

The Swan Hills and Judy Creek fields, discovered six years ago, are among the top 10 producing areas in the province.

FOUND BOUNTY

The remains of the mutiny ship Bounty were found off Pitcairn Island in the Pacific in 1957.

CONTRACT BRIDGE

By B. JAY BECKER

QUIZ

You are South, both sides vulnerable. The bidding has been:

South	West	North	East
1♣	Pass	1♥	Pass
1♠	Pass	1NT	Pass
?			

What would you now bid with each of the following five hands?

1. ♠ AK82 ♥ A4 ♦ J6 ♣ Q7652
2. ♠ KQ73 ♥ Q5 ♦ A8 ♣ AQ642
3. ♠ KJ75 ♥ 7 ♦ A4 ♣ AKQ863
4. ♠ AQ762 ♥ 9 ♦ 3 ♣ KQ7652
5. ♠ KJ95 ♥ KQ6 ♦ A ♣ KJ943

1. Pass. North will usually have 8 or 9 points and a balanced hand in this sequence. Prospects of making a game are therefore poor, and the only real problem is to determine what is likely to be the best part - score contract. There is no sound basis for thinking a suit contract will work out better, and the pass is therefore likely to prove best in the long run.

2. Two notrump. On rare occasions, partner will have only 7 points for his notrump bid, and some allowance must be made for this possibility. That is why we bid only two notrump, avoiding the temptation of going directly to three. Two notrump in this sequence shows 17 or 18 points.

3. Three notrump. It is not enough to bid three clubs, which would merely urge partner to bid again, but not compel him to do so. As a matter of fact, partner will pass a rebid of three clubs nearly a third of the time. There is good reason to believe three notrump can be made, and the way to be sure of getting there is to bid it.

4. Two spades. Partner is unaware up to this point that the one spade bid was based on a five - card suit. He probably assumed a holding of four spades and eight four, five or six clubs.

The spade rebid guarantees a five - card suit, since it would be foolish to rebid an unsupported four - card suit. Furthermore, it guarantees at least five or six clubs, since it would be highly abnormal to open the bidding with a club on a four-card suit, holding five spades also. The two spade bid therefore paints an excellent picture of the distribution held. Partner then carries on in accordance with his hand.

5. Three hearts. This is also a picture bid that describes both the distribution and the high-card values at the same time. Since we have by now bid three suits, the diamond shortage becomes obvious, and since we jumped the bidding, we show considerably more than minimum high - card values for our bids.

Change the king of hearts to a small heart and the proper rebid would be two hearts. The distributional picture drawn would be the same, but the high - card content would be close to rock - bottom.

PM RECALLS CASTLE DEATH

OTTAWA (CP) — Prime Minister Pearson hopes he doesn't follow all the precedents of Canadian prime ministers when he's an overnight guest of the Queen at Windsor Castle Friday night.

"I wouldn't want this to be a precedent but I seem to recall that one Canadian prime minister died at Windsor Castle," he told reporters.

Mr. Pearson was referring to the death Dec. 12, 1894, of Sir John Thompson who died at Windsor the day he was sworn in as a member of the British Privy Council before Queen Victoria.

Sir John was prime minister from Dec. 5, 1892, until his death. He had been justice minister in two earlier Conservative governments.

Yesterday's Answer

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.
