Bathursteners Are Bathurst-Bound

Coach Jack Proud and his band of PWC Juvenile Welshmen leave this morning for the northern New Brunswick town of Bathurst where they will meet Bathurst Juvenile Papermakers in a two-meet total-goals series for the N.B.-P.E.I. crown.

The first game goes tonight with the second set slated for Saturday night.

Coach Proud yesterday said he has a very good chance of winning the series even though they will be playing on enemy ice.

The Welshmen, who played only exhibition games during the regular season in this series with an unblemished record, and the PWC coach attributes a lot of their success to the outstanding netminding of goalie Cliff Senner.

The Island champs breezed through the quarter and semi-finals and then thumped Summerside Juveniles 5-1 and 10-3 in the two-g-a-m total-goals finals.

In Bathurst Papermakers coach E. Doucet Thursday night said he is "looking for a close one." Bathurst edged the Maritime champion Brierley Canucks 7-1 in a total go-go series for the provincial title.

Florida Derby Has 8 Entries

MIAMI, Fla. (AP)—A field of eight and possibly ten three-year-olds are expected to start in the Florida Derby on Saturday at Gulfstream Park.

The race is the first of the season and is expected to be a close one.

The PWC lineup is as follows: goal—Cliff Senner; defence—Allan MacKay, Doug R. S. Brierley, Doug MacArthur, John Davies; forwards—Dave Lawlor, John Hyndman, Gordie MacKay, Arnold MacLeod, Allan MacKinnon, John MacPhail, Bill Stanish, George MacMillan, Dave Roper.

WON ON DESIRE

"The boys took that one mainly on desire and I think they can do the same thing again," Doucet said.

He added he has only had charge of the team the last three weeks because just about the whole team attends high school or grade school and have been turning out with their respective school teams.

Talks Aimed to Halt Railway Strike Plan

OTTAWA (CP)—The Brotherhood of Locomotive Engineers and Canada's two major railroads have been bluntly told by the government that a strike tie-up of rail operations would be "utterly disastrous" in its impact on the economy.

This warning—served on all three parties by Labor Minister Star—has resulted in a new attempt by the disputants to settle their contract disputes that threaten Canada with a railway strike early next month.

The independent engineers union has called a walkout on the publicly-owned CNR for April 2, to be followed 24 hours later by a strike against the privately-owned CP.

Mr. Starr told the Commons Thursday he urged the railroads and the union to resume negotiations in a telegram sent Wednesday, and he advised that as a result the parties agreed to meet this morning.

Final when these three-way talks collapsed, the government asked Parliament to pass an emergency law outlawing any strike for six months. The dispute was settled before the law expired.

It appeared certain that the government will intervene if the Montreal talks fail to solve the dispute.

LOOT CLOTHING FACTORY

QUEBEC (CP) - Thieves broke through the four-foot wall of a clothing factory in Quebec city's lower town early Thursday and made off with some 600 women's dresses, coats and jackets. The firm, Quebec Modern Clothing, estimated its loss at \$40,000.

AWARDED BURSARIES

OTTAWA (CP) - Betty Zimmerman, public affairs producer at CPOT Ottawa and Gerald Renaud, CBC French network news service TV producer in Montreal, have been awarded bursaries by the Imperial Relations Trust for six months study in the United Kingdom this summer, it was announced Thursday.

Downes Leaves To Defend Title

SOUTHAMPTON, England (AP)—Britain's top rowing star, Peter Downes, left Thursday to defend his title at the world middleweight crown against Paul Demerit— with a record of 10 wins.

"We have a little bit of something extra," said manager Sam Burgess, but the exact nature of the bonus for the boat to New York.

"We've done some secret training and planned some secret methods which we feel are going to be successful."

Downes, once a U.S. Marine, member of Boston at Boston 7, Downes' boat was in London last summer and became recognized as a world champion in New York, Massachusetts and Europe. Eiseberg, a former member of the Canadian team, was also regarded as champion.

WATCH REPAIRS PATTERSONS'

WASHINGTON (AP) - Discovery of the remains of a strange creature - 14,000 years old and showing characteristics bearing towards those of modern man - was announced today by a famed British anthropologist.

The discovery marks the earliest yet in the chain of evolution leading to man.

The announcement was made by Dr. L. S. B. Leakey, who has been excavating two pieces of jaw and a tooth of the creature - was made in Kenya.

He told a press conference that while the creature is neither like present-day man nor apes, its discovery "fills out the missing link between the two."

The fossils are of a science still knows less about the evolution of man than it does about the evolution of "the horse, the elephant, the rhino or the pig."

B.C. Electric Assets Frozen By Court Order

VANCOUVER (CP) - The assets of the B.C. Electric Company were frozen by a court order Thursday, adding another complication to the tangled legal battle over the huge power utility.

Mr. Justice H. W. McInnes ordered the company placed under receivership until its expiration by the provincial government last August as B.C. Economics professor and former president of the company, Dr. H. L. Purdy, University of British Columbia, led. Thursday the judge and legal council were still discussing the exact terms of the receivership, but the court made it clear that Dr. Purdy will not interfere with the management of the utility.

Months—perhaps years—of litigation are ahead before the complete question is likely to be resolved.

The implications of Thursday's decision were not immediately clear, but observers feel it may have some effect on a bill now before the legislature which proposes to amalgamate the BCE and the P.U.E.C. Commission, another government agency.

MCA Flight to be Rele To Change On June 29

Eleven Island employees of Maritime Central Airways, pilots, co-pilots, engineers and stewardesses, will be transferred to Moncton when MCA's new flight plan comes into effect June 29.

D. B. Simmons, MCA operations manager, told The Guardian Patriot yesterday that these will be the only employees involved in the transfer. The accounts office will remain in Charlottetown and the staffs at both Charlottetown and Summerside airports will remain on the Island.

This will mean that MCA will have 23 employees on the Island, 22 in Charlottetown and three in Summerside.

Employees involved in the transfer are: Capt. C.H. Trainor, Capt. R. F. Murrain, Capt. P. L. Lloyd Gibson, First Officer Edmer Booman, First Officer Darrell Tanton, First Officer W. T. Bruce, engineers, Fred G. Gwyn, R.S. Macquarrie, stewardesses, Gail Hancock, Claudette Gaverie and Jeanette Daigle.

NEW AIRCRAFT

Changeover date will also see the arrival for Maritime service of two Dart - Herald twin-engine turboprop aircraft. This will mark the first time MCA has used this type of aircraft in the Maritimes. Orders now have two in operation.

MCA has announced it will be the selection of these aircraft that necessitated the change in flight. The Dart-Heralds are larger and heavier than the D-C-3 now in use and cannot be properly maintained or serviced at Charlottetown.

Major change facing Islanders is the discontinuance of a "bird" flight leaving Charlottetown at 8 a.m. This flight will be replaced by an evening flight leaving Charlottetown at 8 p.m.

The new schedule FROM CHARLOTTETOWN will be as follows:

Leave 8:30 a.m., arrive at Summerside 11:30 a.m., arrive at Moncton 1:45 a.m., arrive at Summerside 4:30 p.m., arrive at Moncton 8:20, arrive at Summerside 8:45 p.m.

NEW SCHEDULE FROM MONCTON will be as follows:

Leave 7:15 a.m., arrive at Summerside 8:45 a.m., arrive at Charlottetown at 8 a.m., arrive 12:10 p.m., arrive at Summerside 2:40 p.m., arrive at Charlottetown 12:55 p.m., arrive at Summerside 3:45 p.m., arrive at Charlottetown 6:30 p.m.

The airline states the new schedule will result in better mail service to the Island and improved flight connections from Moncton with Montreal and Toronto and from Halifax with Boston and New York.

Never Heard Of Habs, Leafs

Montreal Canadiens and Toronto Maple Leafs? Never heard of them.

The remark, which would astound even the most ardent Canadian hockey fan, was overheard as members of the touring New Zealand University All-Star rugby team watched their first hockey game.

The Kiwis, as they are called, were impressed by the speed and robust bodychecking of the Western League game between Vancouver Canucks and Spokane Comets here at the University of British Columbia.

"Stone the crows!" exclaimed one of the visitors as a Vancouver player handed off a cherted four Kiwis as Jim Baird of Vancouver scored into an open net to clinch an 8-5 victory for the Canucks.

The Kiwis began a three-game stand here Thursday against the University of British Columbia Thunderbirds. They opened a four-game B.C. tour Saturday by defeating Vancouver Comets at Victoria.

WIN ALL SIX

Quebec Kiwis are Saturday against the Vancouver Reptiles and March 27 against the B.C. Reptiles. The Kiwis recently completed a six-game tour of California, winning all six games and outscoring their opposition by a whopping 106-36 margin.

Several members of the New Zealand team were so impressed with their first look at hockey that they hope to attend another game here.

One of the visitors asked why each club has a mascot.

"Can't they play the game without them?" he asked in reference to the frequent line-up.

Mike Willmetts, fullback; Warren Koyes, hooker; and Kevin Tremblay, breakdown and captain of the Kiwis, have the rule of the game explained to them by former NHL great B.A.B. Pratt. The former Toronto and New York defenceman had a negative attitude.

Tremblay, a member of the famous New Zealand All-Blacks and one of the best players in the world, summed up the Kiwis' impression of the game.

"Gotta keep yuh' 'ead up out there," he said. "No room for dawdlers."

Other recommendations passed that one of the most important should be done as early as possible after the ground is ready.

The farmer should have a amount of seed per acre. He said that two or half bushels of fertilizer would be sufficient. He noted also the value of seed cleaning and seed treating. Seed should be

Sea Trials Continuing

HALIFAX (CP) - The new Northumberland Strait car ferry Confederation is undergoing sea trials, and a spokesman for her builders said if all goes well she likely can be turned over for operation by the middle of next week.

The Confederation, a modern, unconventional ferry for the nine-mile Cape Tormentine - Borden run, was built by Halifax Shipyard Limited for about \$3,900,000.

March 7 trials disclosed mechanical difficulties which have caused extension in the trials. The shipyard maintains such extensions are common—"that's what trials are for."

The ferry is owned by the Transport Department and will be operated by the CNR. She is reinforced for icebreaking and has two loading ends. She will operate equally well in either direction, so will not have to turn and back into dock as do the conventional ferries serving the Strait run.

Minor Hockey Tonight Slated For Saturday

Saturday is Minor Hockey Night in Charlottetown and it is expected that there will be a bumper house on hand at the arena for the four minor city hockey titles are decided and all attending have a chance for a skate to close out a most successful season.

The night gets under way at 7 o'clock with the acquisition of weight tissue which brings together PSS Tigers and Spring Park Elks. Immediately following the Paperweights the Pee-wees take over and PSS Hornets battle with WKS Wolves at this time.

In the Bantam class it will be Birchwood Tigers against Parkdale etc. Bombers and vindictive hostilities will be waged. Rangers and Canucks Trophies will be presented following the games and then everyone will be able to enjoy a skate.

Minor hockey players are presently selling tickets for a big night and it would appear the public response will be outstanding. All minor hockey tickets will be admitted free to the big show if accompanied by an adult who has purchased a ticket. Of special interest to youngsters will be a special treat of ice cream generously provided by Central Creameries. Led through the generosity of this enterprising firm, each youngster will receive a treat to see the kiddies get on to the big night. Remember! Don't send the boy to Minor Hockey Night. Bring him along. Be one of the real hockey fans for a change!
