For instance, did you know that the KOH-I-NOOR, which remains among the Crown Jewels in the Tower of London, has a value of over \$700,000.00 for this one famous diamond. It is now reduced in size to 108 carats, that means that if 200 friends permitted you to borrow the diamonds in their rings, you would probably require a few more to equal the weight of this one famous diamond, as worn in the Crown of the Queen of England.

... we sure need NICKEL!

Hundreds of everyday uses for Nickel have been developed by the Nickel industry through a planned program of research. Today a large share of Canada's Nickel production is being diverted from peacetime uses into channels for preparedness. So the Nickel mine facilities, greatly expanded over the past decade, are again being operated at peak capacity. There is actually more Nickel now being delivered by Canada to the free world than in any peacetime year.

CANADIAN NICKEL

"The Romance of Nickel" a 60-page book fully illustrated, will be sent free on request to anyone interested.

Nickel alloy steels contribute to the ruggedness of tractors, bulldozers, and other equipment.

Steam shovels and other earth-moving and construction equipment contain many parts made of strong, tough, durable nickel steels and nickel cast irons.
