Federation of Agriculture Newsletter

WEATHER PROBS On June 15 the Public Weather Office at Halifax started issuing, with the regular morning forecasts for the day, an outlook for the next day. This innovation was made at the request of the Federation of Agriculture and is presently up for review as to whether it will be continued or terminated after September 30th. The continuation of this service will quite likely depend upon the amount of interest displayed by the rural people. If they have found it of value and wish it continued they should express their opinion in writing to: The Dominion Public Weather Office, P. O. Box 653, Halifax, N. S. or P. E. I. Federation of Agriculture, P. O. Box 99, Charlottetown, P. E. I.

GOOD ORGANIZATION It is not likely that there ever was or ever will be a perfect farm organization. People learn and progress through trial and error. Progress, while it may be slow, is usually steady and the experience of each group of organizers is usually passed on in part to their successors. Sometime ago, Dr. Hannam took part in a panel discussion before the annual meeting of the Interprovincial Farmers' Union in Edmonton and in his remarks outlined a number of points which he felt to be necessary in a good national farm organization. 1. There should be one unified voice for the farmers of Canada. 2. There should be a place for all farm people; and opportunity should be provided for all to participate directly within the provinces and through delegates at the national level. 3. At all stages, elections for officers and delegates should be thoroughly democratic. 4. A farm organization needs to be adequately financed. The amount of finances will depend upon the service undertaken and the objectives the members have in mind to attain through organizations. 5. For annual meetings of the national organization, provision should be made for the largest number of official delegates which it is possible to have from all provinces consistent with functioning on an equitable basis. 6. It should be politically non-partisan. 7. In Canada where distances are great and cost of travelling relatively high a national farm organization must necessarily function largely as a Federation. MARKETING AND PRICE SUPPORTS The development of a national policy for agriculture only started in Canada about 1935 and even in the period of twenty years little more than the initial stages have been covered. Of major importance as a start have been marketing legislation and the price support act. Marketing legislation was inspired by the difficulties of the Thirties when depressed prices forced farmers to consider whether there might not be some better method of bringing their produce to the consumer than through the well-established channels then existing. In some cases farmers sent produce to the market and after various charges were applied received bills rather than remittances. It was, therefore, understandable that thinking farm people would come to the conclusion that it must be possible to improve upon such a system. When the second World War came in 1939, agriculture was still slowly fighting its way out of the depression. War time necessities forced the application of price ceilings and the farmers of Canada found themselves in the unenviable position of operating under increasing costs with their returns frozen at semi-depression levels. Without the hope of some relief from this condition of affairs it was reasonable to expect that some prospect of better things to come must be held out to rural people. Canada's undertaking to

YORK

Mr. Eric Sproule, of the R. C. A. F. in Regina spent a few days in York recently. Mrs. Elby Hardy, York, is the guest of Mr. and Mrs. George Shaw, Brackley Point. Mrs. Edgar Easter, North Wiltshire paid a short visit to York recently at the home of Mr. and Mrs. Elmer Brown.

Announce New Way To Shrink Painful Piles Science Finds Healing Substance That Does Both—Relieves Pain—Shrinks Hemorrhoids

Toronto, Ont. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain. Thousands have been relieved—without resort to surgery. In one hemorrhoid case after another, "very striking improvement" was reported and verified by doctors' observations. Pain was relieved promptly. And, while gently relieving pain, actual reduction or retraction (shrinking) took place. And most amazing of all—this improvement was maintained in cases where doctors' observations were continued over a period of many months! In fact, results were so thorough that sufferers were able to make such astonishing statements as "Piles have ceased to be a problem!" And among these sufferers were a very wide variety of hemorrhoid conditions, some of 10 to 20 years standing. All this, without the use of narcotics, anesthetics or astringents of any kind. The secret is a new healing substance (Bio-Dyne)—the discovery of a famous scientific institute. Already, Bio-Dyne is in wide use for healing injured tissue on all parts of the body. This new healing substance is offered in suppository or ointment form called Preparation H\*. Ask for individually sealed convenient Preparation H suppositories or Preparation H ointment with special applicator. Preparation H is sold at all drug stores. Satisfaction guaranteed or money refunded.

marketing of the western grain crop is the Wheat Board. For some years there has been an advisory committee to this Board, a committee which was composed of grain trade, milling, and producer representatives. A change has been made in this committee of six and it is now composed entirely of wheat producer representatives. Three of the new members are presidents of the Western Wheat Pools; one is President of a Federation of Agriculture, another of the United Grain Growers and yet another of the Farmers' Union. This week has seen an over-

WHEAT BOARD ADVISORS HAY AND HARVEST

Of major importance in the This week has seen an over-

lapping of two important operations—vlg and harvesting. To the late haymaking... we extend best wishes for an early termination and to the early harvesters we extend compliments on a timely start on their activity. While farmers are being constantly advised that early hay is much superior to late variety, nevertheless, recent rains have promoted the growth of a green material which does help to balance the woody nature of the which would much better have been harvested six weeks ago.

CONCOR

It's packed with features galore, and never before has CONCOR offered so much for so little. The quality is high the price is LOW! And, you are assured of a lifetime of trouble-free washing. Each and every Connor "Red Seal" Washer is backed by 80 years of quality washer manufacturing experience.

Crockett & Storey Ltd. CHARLOTTETOWN SOURIS

Perhaps we better take it a little easy this year in it 'pe the' old No. 3 will not expire on the field of battle. BUTTE SUPPLIES For June, July and August to date the butter production in this Province has exceeded that of the same period a year ago. However, from January 1st to the present time we are still behind in this Province about 4 per cent as compared with last year. Whether or not the difference can be made up during the balance of the Season will depend to a large extent on pasture conditions.
