

"Probably no single drug is employed in nervous diseases with effects so markedly beneficial as those of cod-liver oil."

These are the words of an eminent medical teacher.

Another says: "The hypophosphites are generally acknowledged as valuable nerve tonics."

Both these remedies are combined in Scott's Emulsion. Therefore, take it for nervousness, neuralgia, sciatica, insomnia and brain exhaustion.

FOR THE WOMEN

PRACTICAL TALKS WITH YOUNG HOUSE WIVES

Economy in a Home.

There is a great deal of difference between economy and meanness. The former is what should be observed in every household, and the latter is, to my mind, a positive sin. It is of right economy that our talk will be about this month.

When girls are first married they very often have no idea of economy, and thus debts occur, and sooner or later trouble is sure to follow.

If you are sensible girls, insist on having a weekly allowance for the housekeeping, and it must of course be in proportion to your husband's income.

Some girls "do not like" to make a daily inspection of the larder and in this they are very much to blame.

As soon as your husband has gone to town repair to the kitchen and see what there is in the pantry. Do not allow anything to be wasted, and the scraps which perhaps you would not have served up for a meal for your husband will come in splendidly for your own and your servant's lunch.

Very often pieces of bread collect in the bread-box. Once a week have these soaked in water, and when quite soft have them made into a bread pudding. This is delicious when nicely made. If you have crusts over, put them on a baking sheet in the oven and let them get quite brown, then with a rolling pin reduce them to crumbs, and put in a stoppered bottle for use when fowl is in season.

The washing bill is always a serious item, and in a small household should be kept as low as possible. If you live in a town and have a small garden it is a good plan to have a woman in and wash once a week, and only send your husband's shirts, your own blouses, and collars to the laundry, washing all the other things at home.

Soap is another that comes expensive, and many girls make a mistake in using it as soon as it is bought. If you have no store-room you must use the top shelf of your kitchen dresser. Get two or three bars of good yellow soap at a time cut them up in squares and stand them upright, not touching one another. Do not use them for quite a month, and when you have used one bar be sure to buy another to keep up the supply.

Soda is best in a quantity. Do not buy cheap sulphur matches. It is best to buy butter in small quantities and often.

There is no economy in cheap meat, but you should go to a good butcher's. Do not, if it is avoidable, give your

orders to the butcher who calls, but go yourself to the shop and see your meat cut off, and also insist on having what you want. There are many other ways to be economical, but space prevents me from enumerating them.—McCall's Magazine.

Keep a Child Busy.

"If instead of giving the young hem-lies on vice, and thus directing their attention constantly to it, they were simply kept busy at some wholesome work or play every minute, they would be far more thoroughly helped and cleansed than would be possible in any other manner," is the opinion expressed by Kate Upson Clark in 'The Woman's Home Companion,' who claims that most "parents either do not realize the gravity of this task or are too lazy or incapable to attend to it. For young peoples work is worth all the White Ribbon' exhortations in the world, useful as they may sometimes be. The first duty of the rich is to be industrious and to inculcate habits of industry in their children. If they are only taught to keep constantly busy in some useful and ennobling employment, the chances of their evolution into honorable men and women are a million times increased. Awaken their curiosity. Study with them yourself mothers. It is the parent who is usually best fitted to form the early habits of the child, if he will only take the trouble to do it. The making of collections, and the hard study of almost any branch of natural history are likely to interest children. The making of machines, the intricacies of music, the management of a printing press may be used to busy children."

How She Got Her Name.

Mrs. Dayton of Highland Park had just engaged a new cook. The addition to the servants looked promising as she came in arrayed in all her finery and waited for "the missus" to talk with her before going to work.

"What is your name?" asked Mrs. Dayton.

"Lay-ourie, ma'am," said the culinary expert.

"Lay-ourie!" exclaimed the lady of the house. "What a peculiar name! I never heard it before in my life. Is that a nickname or was it given you when you were christened?"

"It's my real name," said "Lay-ourie." "I've gone by it all my life."

"How in the world did you come to have it?" was asked.

"My mother got it out of a novel," said "Lay-ourie."

Mrs. Dayton finally asked her to write it. After much hard work the owner of the name wrote out in a cramped hand, "L-a-u-r-a."

"Why, that's pronounced 'Laura,'" said Mrs. Dayton.

"Well, I don't know about that, ma'am," said the new cook. "My ma never heard it before, and she called it 'Lay-ourie.' I've been 'Lay-ourie' for 37 years, and I guess now it's too late to make a change."

So "Lay-ourie" she remained.—Chicago Journal.

In Quebec the estimates of the provincial expenditure for 1898-90 show that the Government contemplates an outlay next year of \$4,624,568, to be slightly added to, in the course of events, by the supplementaries. The expenditure last year was \$4,414,370, and the revenue \$4,176,139.
