

Dear Editor,

Here it is the second week of March. As the semester's end approaches it has become painfully obvious that some people's efforts towards their work have dwindled to the point of being a disgrace.

I speak, in particular, of some members of the Student Union executive. It is our opinion that these members think they have their money made and are no longer required to do a quality job for the students. Incidents and expressed attitudes have shown us all that these members are unofficially finished with serving the students of U.P.E.I.

The issue that provoked this letter is this. The U.P.E.I. Engineering Society had arranged for two pub dates at the Barn for fund raising purposes. The V.P. Internal put both these dates on the calendar. After a liberal amount of liquid paper and eraser, these dates were

taken away from the society and one new one was put on the books to replace it. This new time was sandwiched between two other big pub nights. The soviet, I mean the Student Union simply took the societies name off and put two others in its place. This type of behavior has occurred to other student organizations as well. Apparently the word of the Student Executive members in question really "ain't worth a pinch a coon". Thanks alot boys.

Perhaps as the 83-84 Student Union Executive begin to think about their upcoming term they might consider this reflection. If you are not sure if you can make a full commitment to the students then you should not be in the office. Let's hope we all get better representation this time around!
