
A CHAMPION

Isabel DeKol Chieftain, winning Holstein junior heifer calf shown by C.S. Stewart and Son, Charlottetown, P.E.I., took the junior female championship at the Maritime Winter Fair, held at Amherst, N.S.

National Secretary Of AOTS Clubs Addresses U.C. Men

Fine compliments from the Board of Men of the United Church of Canada were extended to Island Church Men by Mr. Phil Spence, Executive Secretary of A.O.T.S. (As One That Serves) Clubs in Canada. Mr. Spence addressed a group of Men of the Island Presbytery Men's Council in Trinity Church, Sunday afternoon.

He said tremendous strides are being made by the Men of the Church from coast to coast but felt that the clubs of the Maritime Provinces and particularly in Prince Edward Island were making a "splendid contribution."

Mr. Spence gave some very helpful information in regard to the organization and operation of men's clubs. He said the club wants to get away from the idea of getting men because the club needs them. "Rather we should look for men that need the club", he said.

Recalling some of his experiences with men's work across Canada, Mr. Spence said he had gone to certain churches where he was told that 90 per cent of the male membership came in through the men's club.

Speaking at the evening service in Trinity Church, Mr. Spence noted that Our Lord in his preaching emphasized the point of "doing". "he didn't say, go out and talk about this matter, he said go thou and do likewise." said the speaker.

He emphasized the need for a renewal of individual effort as well as that of the group. Using the parable of "the sower and the seed", he said, "If we are not producing the fruit we should, it is time we had our soil analyzed to see what is lacking in our lives."

Claims U.S. Waited Too Long In Missile Field

WASHINGTON (AP)—Dr. Edward Teller testified Monday the United States "waited too long" with missiles and now is in real danger of falling far behind Russia in the missile field and conquest of space.

The man known as the father of the hydrogen bomb told a Senate investigating committee the United States is confronted by a danger that is perhaps greater than during the Second World War.

He said he believes Russia has an intercontinental ballistic missile capable of hitting major U.S. industrial targets. Russia, he said, also has "the technical foundations" for reaching the moon, and this would have "a great practical advantage" for both peace and war.

Teller said the U.S. missiles program can and must be stepped up. He said for heavy emphasis on the Strategic Air Command and power to retaliate.

The Senate preparedness subcommittee started hearings on what can be done to catch Soviet advances in missiles satellites and science.

The U.S. is behind, Teller said, because this country is unwilling to gamble on scientific developments unless it can see some concrete accomplishments in the offing. He said Russia will gamble.

NOT TAKING RISKS

"We are not," Teller said, "taking the kind of risks in the cold war, as well as in a hot war that we have to take, and there is plenty, of evidence the Russians are."

"There is no doubt that since the war Russia has moved much more rapidly in the application of technology to the military system. If this continues, there is no doubt the Russians will leave us behind and way behind."

It was in an atmosphere of urgency and emergency that the Hungarian-born scientist spoke. The subcommittee hearings are a direct offshoot of Russia's successful launching of two man-made satellites.

Teller replied there are a great many things that can be one now. He listed these five:

1. Look carefully into he status of the Strategic Air Command and the U.S. preparedness for striking back.

2. Explore carefully the acceleration and expansion of the missiles program and try to get planned weapons ahead of schedule.

3. Put more stress on passive defence — on shelters, radiation meters and steps to restore the country economically and physically in the event of nuclear attack.

MORE ATOM SUBS

4. Accelerate the nuclear submarine program.

5. Start immediately on improving science education in elementary and high schools and on publicizing scientists and their contributions.

"They are very high-priority items," Teller said.

As for what should be done to speed the long-range missile program, Teller suggested it seemed feasible, and "vital if it can be done," to use overtime and multiple work shifts on the project. He also said he feels there should be "a very strong hand indeed" at the controls of the program.

Teller proposed more co-operation with the allies on science, strengthening the radar warning line that protects the continent, and turning stocks of surplus foods into "a well-hidden nest egg" that "might be a life saver in the most literal sense of the word."

Sharing scientific and military secrets with friendly powers would increase the danger of leaks, Teller said. But he said the greater danger would be to refuse to exchange information.

Calling for speed rather than secrecy, Teller said the value of U.S. secrets aren't as great as they once were because the Russians can find them out on their own.

Death In B. C. Of Former P.E.I. Lady

The death of Elizabeth Dickieson, age 87 years occurred in Vancouver, B.C. on Nov. 11, 1957. Funeral was on Nov. 13 from the Chapel of Hamilton Mortuary, Fraser St. and 38th Ave., Rev. William Bonney and Rev. Hayden Stewart officiating.

Surviving relatives are three nephews, Wallace Dickieson, Victoria, John MacNeil, Saskatoon, and Wallace MacNeil, Vancouver; two nieces, Mrs. Kathleen Andrew, North Battleford, and Miss Jean MacNeill, Saskatoon; one sister-in-law, Mrs. Ruth Dickieson, Vancouver.

Miss Dickieson, who was a cousin of Miss Agnes Williams of Charlottetown, was born in New Dominion and following attendance at Prince of Wales College taught school at New Glasgow and elsewhere in the province. On the death of her mother she moved to Vancouver with her father and shortly afterwards was placed in charge of the then recently erected Walter Mowbray school.

During her years as Principal of the school, beginning with one assistant, Miss Dickieson before accepting retirement saw the staff increased to twelve teachers and a school attendance in keeping with the increase in staff.

STUDENTS STRIKE

NEW YORK (AP)—Students at the University of Caracas went on strike Friday after a clash between Venezuelan police and students Thursday in which several young men were killed. Venezuelan political exiles in New York reported. The clash occurred when students carrying anti-government posters tried to demonstrate against a plebiscite set for Dec. 15 to re-elect President Marcos Perez Jimenez, the exiles said.

Charlottetown; Mrs. Elaine Jelley and Mrs. Vivian Howatt of Central Royalty; Donald Gordon, Kensington; Miss Helen MacDonald, Parkdale; Charles Monty, Helen Harley Slemon Park; Mrs. Evelyn Wheatley, Spring Park; George Read, Borden.

Should Outlaw Discrimination

BRANTFORD (CP) — Legislation outlawing racial and religious discrimination in publicly assisted housing is long overdue in Canada, Sid Blum, director of the Jewish Labor Committee of Canada, said Saturday.

Mr. Blum, addressing a fair practices education conference of the Ontario Federation of Labor, cited various instances of discrimination in points across Canada.

Among them were these:

In the Maritimes "Negroes live in segregated ghettos in many of the cities and towns because real estate agents and property owners simply refuse to give them any chance to obtain housing outside the so-called Negro districts."

In Montreal, a Negro member of the Brotherhood of Sleeping Car Porters bought a home in a suburban development. Neighbors got together and discussed various methods of trying to get the newcomer out, including a petition, buying them out or legal methods. But the plans didn't work out because one or two other families in the district said they would oppose any such move.

AMBASSADOR ARRIVES

WASHINGTON (Reuters)—Dan Li Chapman, Ghana's first ambassador to the United States, arrived from New York Monday to take up his duties.

there are FOUR qualities that all TV sets should have:

1 *PROTECTION AGAINST INTERFERENCE*... so that your viewing pleasure is never interrupted by annoying local interference... cars starting, electric motors running, etc.

2 *A TROUBLE-FREE CHASSIS*... that performs well, and dependably for years... that seldom, if ever, needs repairing.

3 *TOP QUALITY SPEAKERS*... so that your TV sounds just as good as it looks.

4 *A BEAUTIFUL CABINET*... so that your TV complements your home, and looks well with your good furniture.

but only *Electrohome* has all of them

EASTCOURT

Powered by 22-tube Electro-Matic chassis that delivers a sharp, clear picture even in fringe areas.

Four-way interference protection includes all-important aluminum foil lined cabinet.

Solid wood Deilcraft cabinet tastefully styled, and finished in Mahogany, Autumn Leaf Mahogany, Light Oak, or Deilcraft's exclusive Swedish Walnut.

Special Features . . . A.C. convenience outlet . . . tinted and tempered removable safety glass . . . rubber feet . . . illuminated channel selector. Available with all channel U.H.F. tuner.

Size 33" High, 27¼" Wide, 17" Deep.
