THE MOST USEFUL TREE

THE COCONUT FURNISHES FOOD, A SHELTER AND EMPLOYMENT.

Hundreds of Thousands of Human Beings Find All These Blessings from Its Existence—Some of Its Chief Characteristics in Detail—Worth of Its Fruit.

The coconut grows only near the shore, where its roots, penetrating the sandy soil may drink freely from clear underground springs.

Of all trees it is regarded by Garden and Forest as the most useful, furnishing food, shelter and employment to hundreds of thousands of the human race.

In tropical countries, especially in southern India and in Malaya, the coconut supplies two whole communities with the chief necessities of life.

Every part is useful, the roots are considered a remedy against fevers, from the trunk houses, boats and furniture are made.

The leaves furnish the thatch for houses and the material from which baskets, hats, mats and innumerable other articles are made.

The network of fibres at their bases is used for sieves and is woven into cloth.

From the young flower stalks a palm wine, called toddy, is obtained, from which arrack, a fiery alcoholic drink, is distilled.

The value of the fruit is well known. From the husk, which is called orra, commercially, cordage, bedding, mats, brushes and other articles are manufactured.

In the tropics, lamps, drinking vessels and spoons are made from the hard shells.

The albumen of the nut contains large quantities of oil, used in the east for cooking and in illuminating.

In Europe and the United States it is often made into soap and used for the hair.

The seed forms the chief food of the inhabitants. The cool milk when the nut is young, is an agreeable beverage, and the albumen of the young nut, which is soft and jelly like, is nutritious and of a delicate flavor.

As might be expected in the case of a plant of such value, it is often carefully and extensively cultivated in many countries, and numerous varieties, differing in size, shape and quality, of the fruit, are now known.

The coconut is propagated by seeds; the nuts are sown in nursery beds, and at the end of six or eight months the seedlings are large enough to plant.

The plants are usually set twenty-five feet apart, and are carefully prepared.

Once established, a plantation of coconuts requires little care beyond watering.

It is necessary in the early years, to insure a rapid and vigorous growth.

In good soil the trees usually begin to flower at the end of five or six years, and may be expected to be in full bearing from eight to twelve years.

Thirty nuts from a tree is considered a fair average, although individuals have been known to produce an average of 300 nuts during a period of 10 years.

An application of manure increases the yield of the trees, although probably the value of the additional crop obtained in this way is hardly large enough to justify such expenditure.

In recent years the coconut has been cultivated on a very large scale in British Honduras, Jamaica and other parts of Central America, as well as on the northern coast of South America and the West Indies.

Coconuts bring all the way from \$10 to \$25 per 1,000, according to quality.

Whether ye wad or no, I have obeyed her and, behold, I am the only man that has a two-story house in the hole town."

ALL THREE CURED.

Neil McKechnie, with his wife and mother-in-law, cured by Dr. J. C. Epps's Kidney Pills—These Pills better Than Ordinary Cathartics.

Toronto, Feb. 19.—Neil McKechnie, a popular laborer of this city, has been a sufferer from chronic constipation for years. He used Dodd's Kidney Pills and not only obtained immediate relief, but a permanent cure. His wife and mother-in-law were similarly afflicted, and used these pills with the same good result. Ordinary cathartics give only temporary relief and leave the patient worse than before using them. While D.D.'s Kidney Pills are not cathartics, their peculiar action on the liver and kidneys is such that the causes of constipation are permanently removed. These pills are manufactured by Dr. J. C. Epps & Co., Toronto, and are sold by all dealers, or will be mailed on receipt of price fifty cents per box, or six boxes for \$2.50.
