Plate is Dangerous.
It has been discovered that the flute is
the most dangerous instrument that is
played on—dangerous to the player. A
profund medical authority says that it
is doubtful if a healthy man playing any
instrument in a correct method ever
suffers through playing upon any reed
or brass instrument, but those who have
any weakness of the heart or circulation
may be injured by playing any wind
instrument.

As it is quite easy for a musician to
draw in his breath between the phrases
of the music, but impossible for him to
expel air without overblowing his in-
strument, it follows that the instruments
that require the least expenditure of
breath are the more injurious, for the
reason that the player must hold his
breath for long intervals.

An Accidental Discovery.
"The small size of the screw," says a
noted ship-builder, "is not due to the
necessity of any inventor of its greater
effect as compared with a larger one,
but purely to accident. When I first en-
gaged in the machinery business screws
for steamers were made as large as pos-
sible, it being the theory that the greater
the diameter the higher the speed."
