MORTGAGE SALE.

Valuable Freehold Farm, consisting of 200 Acres Land on Lot 34, Queen's County, known as the Carey Farm, formerly Binstead.

To be sold by Public Auction, on WEDNESDAY, the 16th day of April, A. D. 1890, at the hour of Twelve o'clock, noon, at the Law Courts Building in Charlottetown, in Queen's County, under the authority of the Power of Sale contained in an Indenture of Mortgage, bearing date the Eighteenth day of February, A. D. 1882, and made between William Carey and Ann Carey, his wife, of the one part, and Thomas Campbell of the other part.

ALL that tract, piece or parcel of land, situate, lying and being on Lot or Township Number Thirty-four, in Queen's County, in Prince Edward Island, bounded and described as follows, that is to say: Commencing at a stake on the bank of the Hillsborough River and running north seventy-six (76) chains and ninety (90) links on the boundary line between Lot Number Thirty-four and Charlottetown Royalty, or until it joins the south side of Saint Peter's Road; thence following the said road north fifty-three (53) degrees and thirty (30) minutes east twenty-five (25) chains and seventy-seven (77) links; thence south three (3) degrees east, according to the magnetic meridian of 1761, ninety-six (96) chains, or until it joins the successful Hillsborough River; thence westerly along the various courses of said river to the place of commencement, as described on a plan annexed to a deed dated the first day of May, A. D. 1877, and made between Harry O. Binn and wife of the one part, and the said William Carey of the other part, containing two hundred acres of land, a little more or less.

For further particulars apply at the office of R. E. Fitzgerald, Solicitor, Charlottetown. Dated this 5th day of March, A. D. 1890.

THOMAS CAMPBELL,

Brick House and Furniture, BY AUCTION.

ELDON HOUSE, KENT STREET.

On Monday, March 24,
Commencing at 11 o'clock, a. m.,

We will sell the FURNITURE of the above first-class Boarding House, including Drawing Room, Dining Room and Bedroom Suites, Carpets, Window Curtains, Stoves, Grockery, Cane Beds and Bedding, and all the other belongings to this comfortable and home-like house.

Also at 12 o'clock, on SAME DAY, we will sell

THE BUILDING,

which is nearly new and built of brick, three stories high, and in good repair, having a southern front of 35 feet on Kent Street (near Prince), and running back 180 feet, with Stables in rear.

The "Eldon House" has the reputation of being second to none as a comfortable boarding house, and enjoys a splendid business as a country hotel. Its stables are well patronized, and it is situated in the very best locality in the city.

We sell the above under instructions from Joseph Wise and James Seaman, Trustees of the will of the late Richard Wise, and will be a positive sale, EAIN OR SHINE.
Title perfect. Terms Cash.

Cumulative Poison.

THE DANGER TO HEALTH ARISING FROM LEAD IN DRINKING WATER.

The salts of lead are all poisonous. Small doses of them do not cause death, but they are not readily eliminated from the system, especially if the eliminating organs are weak. That which is taken into the system remains, and a great many minute doses finally have the effect of one large dose. In other words, the salts of lead are "cumulative" poisons. Persons sometimes have all the symptoms of lead-poisoning in an aggravated form when they have not been aware that they had taken any poison at all, and yet the gradual poisoning may have been going on for years. Of course, painters and workers in white lead understand their exposure. The chief unsuspected source of danger is drinking water conveyed into the house through lead pipes. Among the symptoms of lead-poisoning are anemia—deficiency of blood—a dull hue of the skin, digestive derangements, a coated tongue, fetid breath, nausea, colic and partial paralysis. Lead-poisoning from drinking-water is a far greater danger than it is commonly supposed to be. A physician not long ago analyzed the water supplied to one of our large cities, and detected lead in the majority of instances. His attention was first directed to the matter by the case of a family, several members of which were plainly suffering from severe and frequent colic, gastric disturbance and muscular weakness.

Analysis showed a large amount of lead in the water. Under appropriate treatment and the use of pure spring water for several weeks, the colic and gastric symptoms disappeared, and the general health improved. In a family in another street a mother and daughter had other characteristic symptoms of this form of poisoning, which gradually disappeared with the use of pure water and medical treatment. In the discussion of these facts it was suggested that while a great many people are exposed to the danger of lead poisoning, the action of the kidneys is generally strong and healthy, and the poison is eliminated. Doubtless, too, some persons are less susceptible to it than others. One physician expresses the opinion that in many cases of nervous debility, which have been ascribed to overwork, insufficient nourishment, etc., the real cause may have been lead in the drinking water. Danger of lead poisoning seems to increase for persons living at the top of tenement houses. Water should never be drunk in the morning without first having been allowed to run freely.

Diphtheria's Natural Remedy.

It is said that nature has her own remedy for every ill to which flesh is heir. Some of her remedies have not yet been discovered and some have not become generally known. Medical science has sought for a sovereign remedy for the scourge of childhood, diphtheria, yet the colored people of Louisiana, and perhaps of other locations in the South, have for years known and used a cure which is remarkable in its simplicity. It is nothing more or less than the pure juice of pineapple. "The remedy is not mine," said a gentleman when interviewed by a Chicago Tribune reporter, "it has been used by negroes in the swamps down South for years. One of my children was down with diphtheria and was in a critical condition. He heard of the remedy who heard of the case asked if we had tried pineapple juice. We tried it, and the child got well. I have known it tried in hundreds of cases. I have told my friends about it whenever I heard of a case, and never knew it to fail. You get a ripe pineapple, squeeze out the juice and let the patient swallow it. The juice is of so corrosive a nature that it will cut out the diphtheritic mucus, and if you will take the fruit before it is ripe and give the juice to a person whose throat is well, it makes the mucous membrane of his throat sore. Among those who have tried the cure on my recommendation I may mention Francis J. Kennett, the board of trades man, whose children were all down with diphtheria, and were cured by this remedy. Mr. Kennett confirmed the statement.

A Strange Sight.

A Coal Creek, Queen's County, N. B., correspondent of the St. John Sun writes: On the night of the 4th and morning of the 5th March there were remarkable manifestations in connection with the moon. At 2.30 o'clock a. m. that night, the moon being well down in the western sky, there was, first, the upper half of a very bright, large circle, having its hollow side, or concavity, towards the moon, and then another bright half-circle above that one, convexly to the moon. Besides these two half-circles there was an exceedingly large, bright circle complete, surrounding not the moon but the centre of the heavens, occupying at least one-quarter of the visible heavens. The western rim of this circle passed directly over the disc of the moon. The sky at the time was remarkably clear. The large circle intersected the first half circle at the base of its arch. At each of the intersections of the large circle with the half circle there was a bright segment of a circle convexly to the moon. Then again to the east of the heavens was a bright segment of a circle intersecting the large central circle and another similar one intersecting the large circle to the north, thus making in all one large complete circle surrounding the centre of the whole heavens. Two half-circles and four segments of circles all visible at one and the same time.

Noting the longevity of our pensioners of the year of 1812, as exemplified by a recent parliamentary return, the Edinburgh Scotsman remarks that "Canadians must be vigorously constituted, and Canada a very healthy country." The observation is incontrovertible.

Dirty Poultry Houses.

If there is anything disgusting it is a poultry house reeking with filth, the floor covered to the depth of several inches with the deposits of its inmates, the walls decorated with cobwebs and dust, the very air pregnant with the fumes of ammonia and decomposition. A reform is needed in such houses. The walls and ceilings should be swept down, the floor cleaned and disinfected weekly, re-sanded, sprinkled with road dust, or even straw is preferable to nothing. Slacked lime is a good and cheap disinfectant; use it freely in dry form on the floor, and in the form of whitewash on ceiling and walls. A few drops of carbolic acid added to the wash adds to its disinfecting and lice-preventing qualities. Sweep the snow which has fallen during the night from the south side of your chicken house, and a path to the corn shed or some other sheltered spot where your fowls can enjoy a scratch and obtain a breath of fresh air each day. A busy hen is generally a profitable one, especially if she receives a nice warm breakfast composed of the table scraps, a mixture of cornmeal, bran, ship stuff and potatoes, well seasoned with salt and red pepper. She should be supplied with meat of some kind also. You must not expect her to return you something for nothing. Plenty of nice fresh winter eggs are a great luxury in any house and help largely to pay family expenses.—Orange Judd Farmer.

A Hint on Conversation.

Benjamin Franklin, in his autobiography lays down a canon of good breeding in conversation which is worth keeping in mind. He says that he formed the habit of expressing himself "in terms of modest diffidence," never using the words "certainly, undoubtedly, or any others that give an air of positiveness to an opinion," on subjects that may possibly be disputed; saying, rather, "it appears to me, or, I should think it so, or so, if I am not mistaken." This habit, he said, was of great advantage to him in persuading people to adopt his views, and also helped him to gather much valuable knowledge which otherwise would have been withheld. For, as a rule, people do not care to impart information to one who is firmly entrenched in his own opinions. Young people are very apt to have a positive dogmatic way of expressing themselves, and should be trained to a moderate, as well as graceful, use of language. The use of slang has a tendency toward the error which Franklin tried to avoid.

BIRTH.

At Emerson, Man., on the 6th ult., the wife of G. W. Hinton, of a son.

DIE.

At Charlottetown, Mass., on the 8th inst., Lucy McInnis, of Charlottetown, daughter of the late John A. McInnis and Mary Ann McInnis (now the wife of M. B. Cannon, Esq.).
At Graham's Road, Feb. 28, of inflammation of the lungs, Wm. Anderson, aged 78.
At Cavendish, on the 9th inst., Sophia, widow of Andrew Clark, Esq., aged 76 years.
At Brackley Point, on the 5th inst., Charles Gregor, in the 81st year of his age.
At Clinton, New London, on Dec. 30th, 1889, of pneumonia, John William, aged 13 months, only son of Allan and Mary B. McKay.
At Hamilton Road, on the 18th ult., Sarah Jane, the beloved wife of James A. Wood, in the 26th year of her age.
At Truro, N. S., on the 26th ult., Mrs. Scott, aged 76 years, relict of Rev. Benjamin Scott, a Baptist minister well-known in P. E. Island.
At New Acadia, on the 22nd ult., after 8 days' illness, John Parsons, aged 28 years, leaving a wife and one child to mourn their loss.
At the head of Hillsborough River, on the 16th ult., Margaret Cameron, relict of Donald Cameron, in the 67th year of her age.
At Upper Belle Creek, Lot 62, on the 22nd ult., the wife of Roderick McKenzie, in the 51st year of her age, leaving a husband, four sons and five daughters to mourn their loss.
At Rona, on the 2nd inst., Euphemia McLean, in the 63rd year of her age, widow of the late Allen Morrison, leaving four sons and three daughters to mourn their loss.
At Highbanks, Lot 64, on the 22nd ult., of heart disease, Annie McLean, dearly beloved wife of John McKay, in the 43rd year of her age.
At Los Angeles, Cal., on the 7th ult., after an illness of four days, Janet Johnston, aged 36 years, second daughter of the late William Johnston, Montague Bridge.
At Egmont Bay, on the 12th inst., of inflammation of the lungs, Johanna Agatha, in the 23rd year of her age, second daughter of Wm. Brennan, Kiokora.
At Peake's Road, on the 22nd ult., Patrick McCulloch, in the 72nd year of age, leaving a family of three sons and two daughters to mourn the loss of a kind and loving father.
At South Lake, on March 9, Ronald Joseph, beloved child of Johanna and James McDonald.
At East Lake, on the 17th inst., Roderick McDonald, in the 33rd year of his age. His remains were interred at St. Columba's Church.
At Cardigan, on the 6th inst., Charles, aged 22 years, youngest son of Charles Stewart, J. P.
At South Lake, on the 15th inst., after a few months' illness, Miss Agnes McLachlan, in the 72nd year of her age. Her remains were interred in St. Columba's Church on the 17th inst.
At Bay Fortune, on the 11th February, George Atken, at the advanced age of 81 years.
At French Fort, on 27th ult., Elizabeth Scott, aged 67 years.
At South Molyneux, New Zealand, on December 29th, 1889, Donald Henderson, in the 76th year of his age.
The meeting of the British Association this year will take place at Leeds in September. Sir F. A. Abel is to be president.
