RODERICK M'DONALD.

Morrell River, August 18, 1856. Isl Ex

Survey of the City of Charlottetown.

(*Extract from the Minutes of the City Council.*)

WHEREAS, in the opinion of the Council, it has become imperatively necessary that a correct plan of this City should be made from an actual survey thereof, by Civil Engineers or Surveyors of skill and experience: *Be it therefore Resolved*, That a plan of the City be made from actual survey, and that the Surveyor who shall make the same, be guided by the following regulations:—

A line to be run along Water-street as nearly as can be in the same place and in the same direction as the line laid down on a plan drawn by the late Surveyor General, George Wright, in the year 1834, which line is described in a field book, a copy of which may be taken at the City Clerk's Office. This line to extend from the fence enclosing Fort St. George eastwardly to the foot of Weymouth-street, and all the distances to be taken from the said line to the buildings at each corner on either hand, and a record made of the same after this line has been run; lines are then to be run up each of the streets from Water-street to Euston-street, at right angles from the line on Water-street; and all the distances taken from those lines to the buildings adjoining right and left at each cross street. The distance is then to be chained from the line on Water-street to the centre of Richmond-street, at each end, namely, at Weymouth-street and at Pownal-street. A line is then to be run along Richmond-street from end to end, and the distances taken as before described. The distance is then to be chained from the centre of Richmond-street to the centre of Kent-street, and a line run through Kent-street from end to end, and the distances taken from the centre line to the buildings on either hand. The distance will then be chained to the centre of Euston-street, and a line run from end to end of said street, and the distances laid off in the same manner as before described. The five remaining east and west streets, namely, King, Dorchester, Sydney, Grafton and Fitzroy, to have centre lines run through them, parallel with Water-street, and the several distances right and left from said lines laid off in the same way and manner, as herein before described for the other streets.

After the survey has been made, in accordance with the above directions, a plan will then have to be made of the survey on the scale of eighty feet to the inch. The said plan to be drawn in fine lines, describing all the lots, squares, &c.; and also, shewing in fine dotted lines, all the variations in the several boundaries from the regular lines. The survey will also have to include sections on the same scale as the plan of the several streets; shewing the actual surface, outline and the heights from high water mark.

The plan to be drawn on the best drawing paper and properly backed with linen, and bound on the edges with linen tape, and to be sufficiently large to allow a plan of the lots below Water-street to the edge of the channel, taking in the wharfs and stores, to be hereafter added on the same scale.

The Surveyor to supply all the labour and materials necessary to be provided in making such survey and plan, and the whole of the survey and plan shall be subject to the approval of any competent Land Surveyor or Civil Engineer, who shall be appointed by the City Council to examine and pronounce upon the accuracy of the same.

And be it further Resolved, That advertisements for Tenders for surveying the City and making a correct plan thereof, pursuant to the above instructions, be inserted in the papers published in this City.

CITY CLERK'S OFFICE,
Charlottetown, 16th Aug., 1856.

NOTICE is hereby given, that in accordance with the foregoing Resolutions, Sealed Proposals will be received at this office, until WEDNESDAY, the 10th day of September next, for the performance of the above survey and plan.

By order of City Council.

Aug. 18. W. B. WELLNER, City Clerk
