are accomplished and Sebastopol in our power. The military and political results of this event open a new chapter in the history of these transactions, to which we shall shortly take occasion to revert, but, be they what they may, the grand fact now before us justifies the confidence we have never ceased to feel and rewards our hopes, for within 12 months from the commencement of this enterprise Sebastopol has fallen, and the power of Russia in the waters of the Euxine is at an end.—*London Times.*

THE BALTIC FLEET: PROJECTED DESTRUCTION OF REVEL.

The *Times*-correspondent, dating off the Island of Seskar, August 24 to September 2, writes as follows:—

The demolition of the arsenal of Sweaborg and its numerous stores of the munitions of war will, according to information which has reached me from a source entitled to belief, be speedily followed by an attack on another of the enemy's strongholds in the Gulf of Finland. A supply of rockets, furnished by the French Government, has recently arrived at Nargen. These destructive engines of warfare are reported to be constructed on a novel principle, having a range of 7,000 yards, and and loaded with a shell 30lbs. in weight. If on trial they are found to possess the qualities assigned them, they will be distributed to the steam gunboats and rocket boats, and by them be thrown into the town of Revel, for the purpose of reducing it to ashes, whereby another decisive blow will be struck this year in the Baltic by the allied squadrons.

Sweaborg, from the fact of its batteries of granite not being injured during the recent bombardment, is still a fortress of considerable magnitude. Any further attack upon it is postponed until the campaign of 1856, by which time it is believed, ample means of insuring its downfall will be furnished. Operations on a minor scale, tending still further to decrease the power of Russia in these seas, are being actively carried on in the Gulf of Bothnia, by Rear-Admiral Baynes, who has under his orders several small steamers, with a due proportion of gunboats, whose draught of water admits of their penetrating the narrow creeks and channels of that locality. The ships of the fleet are distributed in sufficient numbers along the coasts of both gulfs to preserve a most effective blockade of all the ports, the effects of which are being daily more severely felt by all classes under the dominion of the Czar.

Four of the larger class of screw-liners are reported as likely to be detached for service in the Black Sea, to relieve the sailing ships Albion, Rodney, London, and Queen, the former of which has been upwards of five years in commission. As no urgent necessity exists for the presence, in the Baltic, of such a powerful fleet, its strength will be gradually diminished, but a sufficient force will be retained until absolutely compelled to depart to avoid being frozen in. Many of the ships, consequently, will not be in England until towards the close of the year.

The correspondent of the *Daily News* writes, on the 3d instant, from Revel Roads:—

From various accounts derived from the islanders in and around Helsingfors, we have had confirmation of the accounts previously transmitted of the effects of the conflagration consequent upon the bombardment of Sweaborg, and, in addition, learn that the three-decker, La Russie, of 112 guns, which moored head and stem across the passage betweenBak Holmen and Gunyard, was so crippled by the gunboats' shot, that the day after we left, she sank in deep water, and is lost to the imperial navy. One 13-inch shell passed through three of her decks and killed 11 men, wounding others; and this the Government papers even admit. The islanders also report the destruction of two large steam-frigates building, supposed to have been ready for launching this autumn, besides 18 small craft and Government vessels.

VIENNA, Thursday, Sept. 13, 3 p. m.—We learn from an official source that the Emperor Alexander will be at Warsaw on the 22d or 24th inst.

THE DANUBIAN PRINCIPALITIES.—BUCHAREST, August 13.—Within the last week large bodies of Russian troops have arrived and taken up a position on the swampy and unhealthy islands between the principal arms of the Danube, and the shore batteries have been inspected and put in a good state of defence. Another fact is, that the passable fords of the river are attentively watched and strongly guarded. Perhaps the object of these movements is defensive rather than offensive. " Fresh disputes have arisen between the Ispospodar and Mr. Colquhoun, the British consul general, respecting the Wallachian contingent of troops (35,000 men) to be furnished to the allied armies by order of the Porte, and which has hitherto been left undone under some plausible pretext or other. The Austrian consul general, it must be confessed, does everything in his power to supply the prince with good excuses for the delay, and openly supports him in his opposition to the will of the Sultan.

ROYAL AGRICULTURAL SOCIETY'S EXHIBITION.

QUEEN'S SQUARE presented on Wednesday last a lively and animated scene. We do not remember ever to have seen so great a concourse of people in Charlottetown, and what pleased us more, it consisted of persons well dressed, good looking, and apparently well to do. There were no signs of poverty to be met with, and beggary, that is,squalid and importunate mendicancy, is happily a stranger to our population. The Exhibition itself was tolerably fair, not in many respects equal to what we have previously witnessed, with the exception of the article of Sheep. The Island is acquiring, and deservedly too, a reputation for superior excellence in the breed of this useful and profitable animal. Our farmers have become fully alive to the importance of not only keeping the breed pure, but of improving it as much as possible, by judicious alterations with new importations from the mother land. Wool and Skins are getting to be a considerable item in our list of exports, and we trust they will continue to increase,until the day comes when both will be needed for our domestic manufactories. The skins would, we believe, find a ready sale in the domestic market, but as the separation of the wool from the pelt is deteriorating to both, in a commercial view, they must for a while, be sent away together. We have been pleased to hear, from various quarters, of the estimation in which the Island Sheep are held in the neighbouring countries, and we trust, that it will be kept up to the time, when the Island shall be connected with the Main by the means of floating bridges in the shape of daily steam-boats, and thus a lively traffic for the animals themselves, for the purposes of stock, will be certain to take place. Among the horn-cattle we had pointed out to us, a two and a-half year old heifer, raised by G. W. DeBlois, Esq., a short-horned Durham, and certainly a fine, well-shaped, well-conditioned animal, remarkably large for her age. Those well qualified to pronounce on the merits of such animals, did not hesitate to declare, that the one in question would have commanded admiration at any Cattle Show in Britain. There was a greater number of horses than there has been for some time exhibited, but we were not aware of anything very superior being on the ground. The species of swine was not so good as we think it might have been, but we do not attach much importance to this circumstance. When very large, they are proportionably unwieldy, and not being disciples of the naive obedience and non-resistance doctrine, are equally troublesome, and consequently difficult to be brought from any distance. The carcases of most of them will be submitted to public inspection about Christmas, when we shall be better able to judge of their respective claims to preference. We shall be glad, however, when some more fitting site on which to hold the Exhibition shall be provided. A public square in the centre of the City, should be a space for the admission of pure air, and should be enclosed and planted with trees, that it might afford others as a place of recreation, where the very young and old, and females might take exercise and enjoyment, free from the apprehension of danger. There was no reason to doubt, but that the notice given by the Mayor respecting the sale of Spirituous or Intoxicating Liquors, had its due effect in lessening the number of drunken and disorderly persons. The day passed over with less disturbance than we at one time apprehended, from the miscellaneous assemblage that presented itself to our view. The only disturbance that took place was promptly put down by the timely interference of the new Police.

The following persons were the Judges of Cattle, &c., they were inadvertently omitted in our list of the prizes:

JUDGES OF HORSES.—Captain Rice, Charles Haszard, Wm. Swabey, junr.

DITTO CATTLE.—Alexander Laird, John Thorne, George Smith.

Died,

At Princetown Royalty, on Monday, 1st Oct., after an illness of nearly two years, Lauchlin McKendric, aged 78 years.

At Cascumpec, on the 24th Sept., Mr. James Wells, in the 60th year of his age. He was a native of Dumfries, Scotland, and emigrated to this country in the year 1820. As a man, he was esteemed by all who knew him, and as a christian, he always endeavored to maintain a deportment becoming his profession. His illness, though lingering and protracted, was borne with much meekness and resignation to the Divine Will.
