SPECIAL DESPATCHES TO THE EXAMINER.

PARLIAMENT OF CANADA.

Mr. Martin Aably Advocates.

UNION WITH NEWFOUNDLAND.

Report on Kingston Penitentiary.

OTTAWA, May 18.—Mr. Martin, of Prince Edward Island, yesterday, afternoon, brought up his motion for correspondence between the Governments of Canada and Newfoundland concerning the admittance of Newfoundland into the union. He took occasion to argue that new steps towards such a union should be taken. The Liberal-Conservatives had, he said, done a great work in the consolidation of the rest of British America. The Liberals had now an opportunity to show their capacity for constructive statesmanship.

Mr. Martin made some remarks about the previous negotiations with the ancient colony and said that it would be a proper and generous thing for the Canadian Government to place all Newfoundland products on the free list, as we collect very little revenue from this source and Newfoundland was one of the best customers in the world for Canadian products.

Mr. Martin does not agree with the view that Canada should defer the admission of Newfoundland until the French shore question is settled. The union should, he maintains, be effected as soon as possible, and Canada should lend her powerful help in the settlement of the difficulty with France.

The motion for the correspondence desired was adopted.

Mr. Laurier laid on the table the report of the Commissioners appointed to investigate the affairs of the Kingston penitentiary. The commissioners reported great laxity, disorder and want of discipline. The chief officer, Mr. Metcalfe, ex-M. P., is described as worthy and faithful, but a poor disciplinarian. There is a lack of harmony among the officers. Scandals have arisen over the purchase of supplies by the officers for the purposes of the institution. Ex-warden Lavall is represented as having sold supplies that did not belong to him to the penitentiary. The present warden is credited with zeal and honesty, but not with competency. Deputy warden Sullivan is charged with negligence. Surgeon Strange is said to be too old. The prison engineer, James Devlin, is accused of taking gifts from contractors and his dismissal is recommended. The dismissal of James Wier, the steward, is also recommended for dishonesty. Patrick O'Donnell, the storekeeper, has also received presents and his dismissal is recommended. The retirement of the assistant storekeeper is also recommended. At present everything and everybody about the prison is condemned with more or less sweeping censure. It is probable that the sweeping changes will take place.

WAR NEWS.

GREEKS SUFFER A CRUSHING DEFEAT.

Domokos Occupied by Turks

AFTER A STUBBORN BATTLE.

Great Excitement at Athens.

ATHENS, May 18.—The most intense excitement prevails here. All the Cabinet Ministers have been assembled at the Ministry of Marine, where despatches from the front are being received. The gravity of the situation cannot be overestimated.

Despatches sent from Domokos at 7 p. m. yesterday say that the Greek left wing has fallen back towards the centre before thrice the number of Turks. The battle continued after sunset, but despite the yielding of the left wing the Turks were finally repulsed. General Maoromichael was wounded.

LATER.

LONDON, May 18.—The Daily Telegraph's special correspondent with the Turkish forces in Thessaly, late last night, says: "Edhem Pasha has moved on the front, point to point, and has finally occupied Domokos. The Greeks have sustained a crushing defeat."

ATHENS, May 18.—A correspondent at Domokos telegraphing at 1 o'clock this morning says the Turks having occupied Kitiki, the Greek troops are retreating towards the Orthrys range on the old range on the old frontier.

PARIS, May 18.—The Temps, referring to the peace terms demanded by Turkey says: "Europe cannot consent to cession of Thessaly. On the firmness which the powers now display depends the success of the whole scheme for the reforms and peace of Europe."

P. E. Island Fish Report.

Georgetown—Lobsters and herring fisheries reported poor.

Dairy and Creamery.

Pack your butter in tubs made of seasoned lumber. Then the staves will not be always swelling and shrinking like the troubled sea.

Do not store your empty butter tubs in a place that is too damp. If you do, mold will grow upon the outside of them and strike in, and it will be dead sure to give the butter a taste of the grave, so to speak. Did you never notice that taste upon nice looking butter?

If by any mischance mold has gathered upon your butter tubs, they must be either thoroughly steamed or else boiled in soda before being used again. Nothing short of this will destroy the mold growth. It is a tiny vegetable growth with intensely penetrative roots and a yet more penetrative flavor, which is certain to strike through into the butter.

Young calves and their mothers need for one of the first requisites plenty of sunlight and fresh, not too cold, air. By all means give them plenty of pure water too. Mothers of very young calves are more or less feverish and want to drink freely.

When a calf is 2 weeks old, it may begin to be fed on warm skim milk with a handful of bran and a little linsed jelly in it. After a calf is 6 weeks old, add an equal quantity of ground oats to the wheat bran, and this food will do till the calf learns to eat. The quickest way to heat milk for a calf is to pour a little boiling water into it. Then there is no danger of burning the milk or scalding the calf's nose.

Beware of rotten and moldy old ice boxes. They reduce many tons of otherwise good butter to soap grease.

The Canadian government is going heavily into the business of providing cold storage for keeping dairy and poultry products, fruits and meats. The railways will have cold storage cars. The government will assist with money creamery men and others who erect cold storage buildings.

It's wiser being good than bad;
It's safer being meek than fierce;
It's fitter being sane than mad,
My own hope is, a sun will pierce
The thickest cloud ever stretched;
That, after last, returns the first,
Though a wide compass round be fetched;
That what began best can't end worst,
Nor what God blessed once, prove accurst.
ROBERT BROWNING.
