WE HAVE SOLD

NEARLY ALL OUR

Stem-Winding Rockford Watches,

which are giving good satisfaction, and as the Company, in the interest of the public, say they will not send any watches by mail, we shall defer getting a full supply until we can safely do so by express.

In the meantime we have several Key-Winding Rockford Watches on hand, accurately timed, and purchasers of any of these can have the privilege of exchanging for a Stem-Winder, when they arrive.

In stock, a nice assortment of Waltham & Elgin Watches, in heavy silver or gold-filled cases.

NOTICE.

ALL persons indebted to the late firm of A. GEO. DAVIES & CO. are requested to make immediate payment to the undersigned.

HARRIS & STEWART.

March 3, 1886.

Dunstaffnage Notes.

Union Lodge, I. O. G. T., is progressing favorably. There are now about one hundred members, most of whom are doing their best to promote the temperance cause.

The farmers have been engaged for the last month in hauling mussel mud to add to the productiveness of their already fertile farms.

The trotters of this neighborhood are still improving, and we hear that one of them left a crack flyer of the city in the rear a few days ago. Good again!

Our enterprising and very obliging merchant is doing a fairly good business. He is now giving extra good bargains as he wishes to clear out his winter stock to make room for a new supply. He is also an active worker in the Temperance cause.

The school is doing well under the management of our industrious and competent teacher, Miss McLeod, who has conducted the school for the last four or five years to the satisfaction of the people generally.

We are happy to learn that one of our respected residents has come to the conclusion that "it is not good that man should be alone." He has taken to himself one of the fair daughters of French Fort to share with him his fortunes. We heartily wish them long life and prosperity; and while we congratulate him on his success, we sympathize with the people of French Fort in the loss they have sustained.

March 31, 1886.

Victoria Temperance Concert.

A grand entertainment under the auspices of Onward Division was given by the Victoria Dramatic Club, in Brien's Hall, Victoria, on St. Patrick's evening. A lengthy programme of music, readings, recitations and dialogues was prepared for the entertainment. After a large audience had assembled, Mr. P. H. Palmer was chosen Chairman. Some appropriate remarks were made, in which great credit was given to the good people of Victoria and vicinity for their attention and good conduct during the last concert. The people then had the pleasure of listening to one of the best Concerts ever held in this place. The performers deserve marked distinction for the able manner in which they acquitted themselves. The Methodist Choir, who kindly furnished the music for the occasion, received a well-merited vote of thanks from the Division at its next meeting. I must not forget to mention the attention and good order maintained throughout the Concert, which reflects credit on the people of Victoria and vicinity.

SPECTATOR.

Three Rivers Dairyman's Association.

A meeting of the above Association was held in the Schoolhouse, at New Perth, on Tuesday, the 16th inst., when an interesting and instructive paper on "The Best Stock to Breed" was read by F. G. Boyver, Esq., Georgetown Royalty. The view advocated in the paper caused a lively discussion, in which Messrs. John Hamilton, Robert Dewar, John McLean, Daniel F. McDonald, George F. Owen, Cyrus Shaw, James McNeill, William Kaneen, Alexander Hamilton and others took part.

Mr. Boyver considered that Clydesdale horses, Shorthorn cattle for beef, and Ayrshire cows for milk, were the most profitable for this Island. Messrs. Daniel F. McDonald, Alexander Hamilton and others favored the Percherons as calculated to give a smart lively class of horses, fit for farm or carriage work and saleable as express horses.

A vote of thanks was tendered Mr. Boyver by the President, who referred to the success that was attending farmers' meetings in different parts of the country—Associations being formed at Whim Road, Summersville, Rollo Bay and other places, all calculated to advance the interests of the agriculturist.

The next meeting will be held at New Perth Schoolhouse, on Tuesday the 6th April inst., when Rev. Mr. Gillis will deliver a lecture on "Life in the Highlands."

GEORGE F. OWEN,
Secretary.

Cardigan, March 19th, 1886.

The Sackville Shooting Affair.

The examination of Daniel J. Gillis, charged with shooting Constable Bulmer at Sackville, took place at Dorchester on the 27th ult. It was proved that Gillis fired from a shot gun loaded with duck shot at Bulmer, shot lodging in the face and arm. McCulloch, the prisoner Bulmer was arrested at the time, was also wounded in the leg, and Gibson, the complainant in the McCulloch arrest, in the face by the same discharge. The prisoner was committed for trial at the June sitting of the county court. Bulmer has had arrested, for assault committed at the time of the shooting, Jerome Gillis, father of the prisoner.

Fire in a Toronto Prison.

A destructive fire occurred at Toronto, in the central prison, on the 28th, completely destroying the chapel and all its contents, as also Warden Massell's household effects. Owing to the lack of water, the fire burned fiercely for about three hours. The convicts were greatly excited, but were quieted somewhat by the assurance that if there was any danger they would be immediately released. The fire originated in the cupola, directly above the chapel, but its origin is a mystery. The loss will be about \$10,000, covered by insurance.

Horsford's Acid Phosphate,

IN NERVOUS DISEASES.

Dr. Henry, New York, says: "In nervous diseases, I know of no preparation to equal it."

An Extraordinary Record.

A few days ago, says a Port Mulgrave correspondent of the Halifax Herald, I noticed a paragraph in the Herald about three ships commanded by three brothers (Dexters) which left New York together and arrived at Liverpool together, which was considered very remarkable. I now send you a similar voyage, if not better. The schooners Pierona, Wm. Smith, master, and G. A. Smith, G. A. Smith, master, left Lunenburg on the 10th of August, 1885 for Labrador at the same hour, called at a port in the Strait of Canso together, left that port again the same time, arrived at Chateau, on Labrador coast, at same time, loaded together, left for home together and arrived at Canso together, left Canso and arrived at Lunenburg together, left Lunenburg same time, arrived at New York together; left New York together and arrived at Lunenburg; left again for P. E. I., arrived there together; loaded same time; left P. E. I. together and arrived home at Lunenburg at same time. Can any two brothers, masters of vessels, give such close sailings as the above; if so let us hear from them.

The Duke of Connaught has been appointed Major-General of the Bengal army.

A French Syndicate is about to send a mission to Central Africa to open up trade with the natives.

The police have raided gambling houses in several large towns of England, and 130 arrests were made.

A telegram from China says the German railway syndicate in China is meeting with no encouragement whatever.

The German Bundesrath has approved the treaty of friendship and commerce between Germany and Zanzibar.

Queen Victoria has declared her intention of issuing a Royal Commission to enquire into the resolutions of the Education Acts.

"Red satin rain umbrellas" have been introduced into Paris. They would be of no use here, for we have no rain of that kind in this country.

All the powers, with the exception of Russia, have agreed to recognize Prince Alexander as Governor of Eastern Roumelia during his life.

"When should a young woman marry?" asks a writer. After a careful consideration of this subject, we have come to the conclusion that they should marry when they get a chance.

M. Pasteur accounts for the death from rabies of the Russian who was being inoculated against hydrophobia by the theory that wolf virus is more deadly and quicker in its action than the virus of a dog and that the man, who had been bitten by a wolf, died before the Pasteur treatment could take effect.

Mrs. Frank, of Reading, Pa., undertook to kindle a fire with coal oil and the can exploded. The burning oil scattered over the body of the woman and on her two children, aged nine and eleven years. The woman ran into the yard, jumped into a cistern and was drowned. The house was set on fire and the children fatally burned.

A quantity of dynamite was recently exploded under the residence of Manager Tyzack, of the Medlemsby Colliery, at Consett, in Durham, Eng. The house was greatly damaged but nobody was injured. The outrage is supposed to have been perpetrated by union miners, who have been locked out from the colliery since January and whose places have been taken by non-unionists.

Willy Johnson, tried at Little Rock, Ark., for the murder of Richard Ellis, has made a confession implicating Ellis' wife, George Wall and John Buchanan. He said Wall hired him and Buchanan to kill Ellis and paid them \$67 for the job. Wall was enamored of Mrs. Ellis and wanted her husband killed so that he could wed her. Johnson was convicted and sentenced to 21 years' imprisonment.

A communication has been received by Sir John Macdonald from the French Canadian half-breeds of St. Laurent, St. Antoine, Batouche, Duck Lake, and St. Louis de Langevin. Extracts from it read as follows:—

"We take pleasure in acknowledging the good intentions of your Government towards us by the promptitude with which it aided us in giving us food as well as seed grain. Knowing the disposition of your Government we entertain the dear hope that during the present session you will take the necessary measures to do justice to the demands that we make with respect."

There appears to be a wide discrepancy between the value of imports into Canada from the United States taken from Canadian entries, and the value of exports from the United States to Canada as shown by United States records. The former account places the total value of merchandise imported into Canada from the United States at \$53,093,031 during the year ending 30th June, 1885, while the United States returns of exports to Canada only estimates the value at \$38,824,234, a difference of \$14,268,797. This wide difference in the two statements may probably find a solution in the fact that, notwithstanding the vigilance of the Customs Department, a very large volume of the trade between the United States and Canada is carried on on false invoices and undervaluation for customs purposes. This being the case the value placed upon imports from the United States by the Dominion officials would be considerably in excess of that estimated by the United States exporter, whose object, to benefit his Canadian customer, would be to make out his invoice to be used for customs entry at as low a figure as possible.
