

No. 858, of the date of the 1st day of July, 1870, to No. 1152, of the date of the 1st day of August, 1870, (both inclusive) will be paid at the Treasury, on demand, together with the interest due thereon.

That most excellent of monthlies, the PHRENOLOGICAL JOURNAL, AND LIFE ILLUSTRATED, comes to us with the February number richly equipped with good reading. There is something in it adapted to every body's taste, without the least taint of the tabular or scientific in its contents. It is a most interesting and useful work. What can be better than the Reporter, the Christian Church, the Disciple, with twelve fine portraits and accompanying sketches of its leading preachers? Temperance, Physical Education, continued. Excursions, a timely tract on a foolish fashion; Homer A. King, the well-known apianist; A Brief History of the Culture; How we Character; The right will to Will; The Threefold death scene of the Bible; The Angel; Excursions; How to write a letter; The Mount of Sion; Honor your Calling; Origin of the American Flag, &c. Our readers should take this Magazine. Price \$3 a year, single numbers 30c. Address S. E. WELLS, New York.

NEWFOUNDLAND.
* These noble, unpeopled valleys are a thousand miles nearer Britain than Canada, and yet they are entirely overlooked. They command the entrance to the Gulf of St. Lawrence, and here a coaling station for steamers might be established. Here, too, on the shores of St. George's Bay, will be the terminus of the Railroad destined one day to traverse Newfoundland, and, by connecting the western shores with St. John's, will furnish the shortest sea-route to Europe. It is calculated that swift steamers could make the passage from Valentia, in Ireland, to St. John's in four and a half days; the railroad across the island would be 250 miles in length; a steamer would run from St. George's Bay to St. John's in 12 or 15 hours, where a branch of the Intercolonial Railway would forward passengers and mails to all parts of the United States and Canada. By this route passengers and mails from London, would reach New York in seven days, a short sea-passage would be secured, and all the dangers from ice, and storms along the American coasts would be avoided. The dangers of crossing the Atlantic would be reduced to a minimum, as in four or five days could be done. From New Dominion Monthly for February.
