

### SUPPORT MARCH OF DIMES IN S'SIDE

A total of exactly \$23 was collected for the March of Dimes in voluntary offerings from the seven classrooms of St. Mary's Academy, comprising grades six to 10 inclusive.

However, the pupils of Grade Six-A had their cards completed first so they were chosen to have their photograph taken. Left to right are (seated) Ann Cameron and Anne Kelly; standing, Leona Doucette, Myra Landry, Mary MacDonald and Marina Dunn.

### Chief Justice Ill In S'side

Chief Justice Thane A. Campbell has spent the last week in Prince County Hospital where he has been receiving treatment for a slight illness. It is expected that he will be discharged from hospital within the next few days.

### Low Reading Is Explained

SUMMERSIDE — An explanation as to why temperatures in Wellington, just 10 miles west of Summerside, could be as much as 20 degrees colder than the rest of the Island, was given by officials at the "met" section of RCAF Station Summerside.

It was pointed out that while the air flow over most of the Island came in off the Gulf of St. Lawrence, this might not have been the case at Wellington, which reported a low temperature of -33 degrees on Thursday night, while Summerside did not get below -13 degrees.

The duty forecaster at RCAF Station Summerside explained that these large bodies of water such as the gulf, have a moderating effect on extremes of temperature.

He stated that in his opinion the wide difference in temperatures could not be caused by errors in thermometers, and the motion of air masses seems to be the only reasonable explanation.

A REUNION of Boy Scouts from the Summerside district who attended the 3rd Canadian Jamboree last July at Connaught Rifle Range, near Ottawa, along with other members and leaders of their troops was held Thursday evening at Y-Centre. Among those present who attended the Canadian Jamboree were, left to right: Ernie Lawson, Stemon Park; Ronnie Profit, Kensington; Paul Kelly, Summerside; Bob Hickey, Summerside; Lloyd Kelly, Kensington and Ronnie Hickey, Summerside.

### Jamboree Scouts Attend Reunion

SUMMERSIDE — The second Summerside scout troop held a jamboree reunion at the Summerside Y centre Thursday evening for troops from the Summerside district that have scouts who attended the third Canadian scout jamboree at Connaught Rifle Range near Ottawa in July 1961.

A contingent of 33 scouts and three leaders from P.E.I. attended this jamboree.

Scouts from the Summerside area who attended the jamboree and were present at the reunion last night were Lloyd Kelly, and Ronnie Profit, of the 1st Kensington scout troop; Ernie Lawson of Stemon Park troop; Bob Hickey and Ronnie Hickey of 1st Summerside troop; and Paul Kelly of 2nd Summerside troop.

There were also 23 scouts and three leaders present from the 1st Kensington troop; 22 scouts and three leaders from the Stemon Park troop; 12 scouts and one leader from 1st Summerside troop and 26 scouts and four leaders from the second Summerside scout troop.

LAC Warren Brenkley showed jamboree colored slides and Cpl. Charles Keating showed the official jamboree movie film.

The program was conducted by Sgt. Ivan MacKenzie, assistant district commissioner.

### PASTOR APPOINTED HALIFAX (CP) — Rev. W. B. Oliver, former pastor of Cornwallis Street Baptist Church, Halifax, has been appointed a field representative of the adult education division of the provincial education department. He will work among members of the province's Negro community.

"sacred statement" by Robert S. MacLellan (PC — Inverness - Richmond)—should not be "cluttered up" with such amendments.

MONDAY, Feb. 5  
The Commons meets at 2:30 p.m. to debate a proposed increase in the old age pension. The Senate is adjourned to 8 p.m. Tuesday.

### Crapaud LOL Elects Slate

The election of officers highlighted the annual meeting of the Crapaud District LOL, held recently in the lodge room at Argyle Shore. District Master K. MacDougall presided.

Those elected included B. Trowsdale; worshipping master; C. Ince, deputy master; S. Inman, chaplain; H. Provencher, recording secretary; A. Shaw, financial secretary; B. MacPhail, treasurer; H. MacNeven, deputy lecturer; B. MacDougall, marshal.

Grand master Davis Ward stressed the importance of keeping all members active and attending lodge meetings regularly.

County Master Arthur MacMicken stated that he was very glad to have the opportunity to attend the meeting and to see so many new members.

CHAIR TO WHITE HOUSE TORONTO (CP) — A high-backed Victorian sofa, once the property of a cousin of President Ulysses S. Grant of the United States, will be sent to the White House in Washington, Mrs. W. E. P. DeRoche, whose ancestors were related distantly to the 19th president of the U.S., said Friday she offered the sofa in a letter to Mrs. John Kennedy, wife of the present president. Acceptance of the offer was contained in a letter signed by Mrs. John N. Pearce, curator of the White House.

### Fisheries Minister Provides Spirited Exchange In House

CAPITAL BUREAU OF THE GUARDIAN

OTTAWA — The House of Commons was treated to an unusual sight this week. The normally quiet and mild-mannered minister of fisheries, Hon. J. Angus MacLean, member for Queens, lost his temper and provided the house with some spirited exchanges.

The occasion was a lengthy debate on a government bill to provide \$300,000 in a special winter works program for Newfoundland fishing settlements which have suffered from decreased catches of fish in 1961.

And the match which lit the MacLean fuse was the Liberal opposition's major needler, Hon. J.W. Pickersgill, the member for Bonavista-Twillingate.

While Mr. MacLean's choice of words during the debate was very proper and very parliamentary, many MPs expressed surprise at the forceful and heated manner in which he expressed his views in reply to Mr. Pickersgill's criticisms of the government's aid program.

ONE ISLANDER IN HOUSE  
Only one other Prince Edward Island member was in the House when the debate went on. Mrs. Margaret Macdonald, MP for Kings, was the first member to reach Mr. MacLean and extend congratulations to him when the house adjourned.

Dr. Orville Phillips, MP for Prince, is presently on a trip to his own constituency and Heath-Macquarrie, Mr. MacLean's Queens seat-mate, was visiting Mrs. Macquarrie who is still a patient in an Ottawa hospital following a motor accident.

Mr. MacLean noted that Mr. Pickersgill had taken 50 minutes of the time of the house to express his criticism of the government's measure to aid the Newfoundland fisherman.

"I see it is 10 o'clock now and I am going to sit down, but the honorable member has taken 50 minutes to pour scorn on this item and all I can say is that if I thought an item was as bad as this one is in his opinion, I would not want to be associated with it," Mr. MacLean declared. "So I invite the honorable member who, I presume, is speaking for his party, to get up and move that this item be reduced to \$1 if he feels that way about it."

Mr. MacLean asked if there has ever been anyone who has tried to improve the lot of his fellowmen who, has not been criticized.

NOT WHOLE ANSWER  
"I do not pretend that this is the whole answer to the ills of the fishermen of Newfoundland or that in the administration and distribution of this grant there will not be some who get more or that others are getting too much. There are bound to be difficulties and criticisms," Mr. MacLean admitted.

He said since he had been a minister of fisheries the department has doubled the outlets for subsidized bait to Newfoundland. The subsidy on long liners and large vessels had been increased in order that fishermen can go out and fish where the fish are to be found instead of dependent on them coming close to shore.

"Small as my knowledge may be, I do not intend that it should be overridden by the vast lack of knowledge displayed by the honorable member for Bonavista-Twillingate," the fisheries minister stated.

Earlier in the debate, Mr. Pickersgill said it was obvious that the government regards the western farmers as horses and

the fishermen as rabbits, though he said he was surprised Mr. MacLean would admit it.

"He should admit, I think, that what he has imputed to me was never intended by me. I said the honorable members were not making a fair comparison when they compared things which were not comparable," Mr. MacLean retorted.

Basis of opposition criticism was the fact that the government had just voted \$43 million in acreage payments to western farmers but were not dealing as fairly with the maritime and west coast fishermen.

According to them, dishes and bottles suddenly jump from shelves and hurtle through the air. Ghostly foot-steps echo on the basement stairs. Water taps and gas burners turn themselves on. Carefully made beds get turned down.

Last week, Dr. William Row of Durham, N.C., director of the Psychic Research Foundation, and an associate spent many hours in the house. They refused to offer an explanation for the strange doings other than to comment: "The foundation is interested in the case."

Harry Keller, a county probation officer, is the only outsider who has been in the house when anything happened. He said he and the whole Lincoln family were sitting in the living room when taps started running and gas burners turned on.

"Some Jackson residents believe that abandoned tunnels under the house have caused it to settle. Some think the tunnels could contain air pockets which send currents through the building."

A few half-believe the house is just plain haunted.

NEW IDEA  
SPREADERS - LOADERS

The greatest labour saver on the farm, the front end loader should never be looked on as a manure loader only, as it is the most versatile machine you have. Use it for all your back breaking work such as loading your truck with grain, potatoes, lumber, pulling fence posts or anything requiring heavy lifting.

The manure spreader is becoming more useful each year as with the livestock increase the manure handling has become a daily chore. Winter spreading has become more popular each year as it has been proven that there is no waste in this method and your handling charges are cut in half. The labour costs are your greatest asset.

New Idea is the only machine company who have a spreader to suit your farm, whether it be large or small. There are nine different sizes and models to choose from. This is worth your consideration. Come in and talk it over with us.

ONLY NEW IDEA OFFERS 'EM ALL!

## S'side Dairy Is Third In Canada To Produce New Tri-Milk Product

By GEORGE WOTTON  
Summerside Bureau.

The actual concentrating—which is the withdrawal of the excess water—is carried out under a heavy vacuum which enables the process to be performed at a temperature of only 145 degrees.

NO FLAVOR CHANGE  
Because of this there is absolutely no change in the flavor of the milk. To make doubly sure that there has been no possibility of recontamination, the finished product is pasteurized again immediately before it is placed in the containers. The result of this process is that the milk retains its quality and enables it to be transported to distant areas safely, though it is required that it be kept in cool temperatures at all times. Freezing does not affect it adversely.

Tri-milk is packaged by Amalgamated Dairies in attractive, pint and quart, pure-pak containers and as mentioned earlier, is brought back to its original condition as whole, fresh milk by adding two parts of water to one part of Tri-milk. This is the standard procedure, although it has been found by some consumers that they prefer to add slightly more than two parts of water, whereas others like to add slightly less than this amount. It all depends on individual tastes. Some like milk to be rather thin—white others prefer it rich and heavy.

By the same token, the addition of only one part of water to one part of Tri-milk produces a milk similar to light-cream. The only difference being in the concentration of solids other than butterfat, whereas there is a heavy concentration of butterfat in the case of cream. This type is found to be very suitable for uses such as with cereal.

For tea or coffee Tri-milk is very suitable just as it comes from the carton except that the

### New P.E.I. Ferry's Sea Trials Slated

The new ferry MV Confederation should be ready for sea trials next week, and if all goes well she will be turned over to the CNR about Feb. 15, Halifax Shipyard's superintendent, E.S. Kehoe, said yesterday.

Mr. Kehoe said that the ship is undergoing engine and machinery trials at dockside and should be ready to put to sea next week. Capt. E.R. Pike and a number of the ship's crew are already aboard.

Everything is going well, Mr. Kehoe said, but anything could develop during sea trials. In view of this, he said, a good delivery date margin is allowed so that faults that develop during the trials can be repaired.

There is at this time no apparent reason, however, why the ship can not be turned over to the CNR about the 15th of the month. The turning-over ceremonies will be held in Halifax.

was made public, the people would have a clear idea of the tremendous difficulties that have been involved in the long study.

REBEL SEIZED  
PARIS (Reuters) Police Wednesday announced the arrest here of a man they described as the leader of Secret Army Organization units responsible for plastic bomb attacks in France. Police identified the man as Philippe Castille and said documents seized indicated Castille was the organizer of a series of 17 plane explosions in Paris Jan. 17.

"We are pleased with the progress that has been made to date but we recognize that only the most meticulous and exhaustive examination of all the factors is necessary before the federal government can finally commit itself to a project of this magnitude and difficulty," Mr. Shaw stated.
