The occasion was a call to 15 Chestnut Street where it was thought that smoke was accumulating in the attic of the house. The firemen, after close investigation could find no blaze or apparent cause of smoke and returned to the fire hall. A second try on the horn later on showed that it was working all right.

**Snow Delights Kiddies-But Not All Adults**

The coming of the season's first really big snowstorms may have brought delight to the youngsters such as those above, but it probably left something to be desired by the hard-working householders who had to shovel never ending sidewalks. At the top the little ones get a real thrill from sliding down the slope nature and the plows created. The pictures at the left indicate the amount of snow which descended and illustrates the tremendous amount of work created by an attempt to open sidewalks to pedestrians and maintain street traffic. Both men and machines had their hands full trying to keep up with the task.

The meeting was opened with prayer by the Rector, Canon J. T. Ibbott, followed by the reading of the minutes of the previous meeting. Canon Ibbott, in his message to the congregation, emphasized that the reports to be submitted would show service rendered to Christ by the "faithful." When there is success or failure, Christ alone is the judge. The Rector suggested that all should make "faithfulness" their motto for 1954. Tribute was paid to the vestry for the work accomplished during 1953 and particular mention was made of the Church wardens, Mr. G. G. Wood and Mr. T. D. **Shipping Table Potatoes To U.S. Not Profitable**  
The tablestock quota to the United States is filled, according to information received by Mr. Donald A. MacDonald, chairman of the P. E. I. Potato Marketing Board and Selling Agency. He states that "it therefore becomes apparent that it would not be profitable to ship further potatoes to that country at the existing duty rate of 75c per hundred pounds." It is understood that United States Department of Agriculture and customs officials have made the request that further shipments of seed potatoes shall be at a price level equal to the guaranteed price which producers are now receiving.

**Contracts Signed For New Exhibition Bldg.**

Contracts for the erection of the proposed new Show Building on the Exhibition Grounds, as reported in The Guardian last September 30, were signed yesterday between Messrs. H. J. Kennedy, general manager of the Association, D. S. Wood, Toronto, representing All Steel Buildings Limited, and Frank Curtis, of the County Construction Company. Last autumn it was expected that work would get underway in March and yesterday Mr. Curtis said it was planned to start on April 1 in order to have the structure ready for use by Old Home Week. The building will be approximately 225 feet long and 150 feet wide and will cost \$175,000 with the Federal and Provincial Governments contributing \$35,000 each. It will have a clear area of 120 feet without posts and at its peak the height will be 55 feet. Built of concrete and steel throughout it will rest on steel columns 26 feet high and is planned to seat over 4,000 persons. In general, Mr. Wood said, it will be based on the plan of the main building at the Royal Winter Fair, Toronto. It will be erected at the back of the present grandstand and appropriately where the horse show is presently located and will take up the space from the arena wall between it and the Fox Pavilion down to the cattle show ring. The new building will serve all such show purposes and have the added attraction of providing shelter for spectators and animals alike during inclement weather. Will Replace Paton Building It will also have booths and displays for all types of agricultural products and other items which are customarily shown during Fair Week. The building will replace the Paton Building which was known to all fair-goers for half a century prior to its burning down on April 6, 1945. At that time several smaller buildings, including that housing beef cattle were also destroyed. Present indefinite plans call for the building to be used for a summer show, a fall agricultural show prior to the Maritime Winter Fair, a calf club show and a live stock show. Originally there was also some discussion for using it for an indoor rink in winter. The size of the proposed show room can be measured by those who remember the former site. That building was 80 by 84 feet and originally was built in 1890. However, it had been extensively remodelled in 1934 and 1936 and its full gallery was used to display examples of cookery and the various forms of art. This new building will also have numerous booths where advertisers may show their products as well as concessions and many areas where exhibits of different classes may be judged.
