Loss of flesh and strength, with poor appetite, and perhaps slight cough in the morning or on first lying down at night, should be looked to in time. Persons afflicted with consumption are proverbially unconscious of their real state. Most cases commence with disordered liver, leading to bad digestion and imperfect assimilation of food—hence the emaciation, or wasting of the flesh. It is a form of serofulous disease, and is curable by the use of that greatest of all blood-cleansing, anti-bilious and invigorating compounds, known as Dr. Pierce's Golden Medical Discovery.

A CHINESE laundryman was brutally murdered in Boston on Sunday morning. In his head and body were a dozen wounds any one of which would have caused instant death. His throat was cut from ear to ear, the head being nearly severed from the body. His spinal column was severed just below the back of the neck, while a terrible gash, extended from the mouth to the left ear, which had taken off a portion of the lower jaw and all of the teeth on that side of his mouth. A gash clean across the abdomen, and almost deep enough to have cut a man in twain had completely disemboweled the victim. In either eye were stab wounds so deep that the knife must have passed through the brain. Besides these were many deep wounds in the head and body and a score of minor ones. The Chinaman's que had been cut off close to his head and was found lying on the floor beside the victim. The Chinaman was 38 years of age, and had saved considerable money. The murderer is unknown.
