New Swiss Discovery F "99"

for Eczemas, Boils, Psoriasis, Leg Ulcers

EMINENT scientists have discovered that the lack of unsaturated fatty acids in the normal diet is one of the main causes of skin diseases, such as Eczemas, Boils, Leg Ulcers and Psoriasis. The modern type diet and the use of refined fats and oils in which these unsaturated fatty acids are often completely lacking, have brought about a deficiency in a great number of individuals.

Remarkable Discovery
A Swiss chemist, Dr. W. Schmitz, succeeded after 10 years of research work in extracting from pure vegetable oils an unsaturated fatty acid with a concentration of 99% and therefore named F "99". Thanks to this hitherto unattained high purity, F "99" is so readily absorbed into the blood stream, that it has a decisive biological activity in the treatment of skin diseases. Its remarkable efficiency has astonished even Skin Specialists of international reputation.

New, natural way to clear up skin troubles
F "99" is not a synthetic drug but a concentrate of natural nutritive substances. It is absolutely harmless and may be given even to infants without any hesitation.

As its name suggests, the F "99" Two-Way Treatment acts internally (capsules or liquid) and externally (ointment).

How to use F "99" Two-Way Treatment
Eczemas F "99" Capsules and Ointment
Children's Eczemas F "99" Liquid and Ointment
Boils (Furunculosis) F "99" Capsules and Ointment
Leg Ulcers F "99" Capsules and Ointment
Psoriasis F "99" Capsules and Ointment
* If in doubt, consult your doctor.
